Roblox Corporation
(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

3150 South Delaware Street , San Mateo , CA

(Address of Principal Executive Offices)

20-0991664

(I.R.S. Employer Identification No.)

94403

(Zip Code)

(888) 858-2569

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class A common stock, par value of \$0.0001 per share	RBLX	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

(Title of class)

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports); and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (\$232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐	Smaller reporting company	☐
		Emerging growth company	☐

If an emerging growth company, indicate by check mark if the Registrant has elected not to use the extended transition period for complying with any

new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the Registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that has prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of voting Class A common stock held by non-affiliates of the Registrant on June 28, 2024, the last business day of the Registrant's most recently completed second fiscal quarter (based on a closing price of \$37.21 per share on June 28, 2024 as reported on the New York Stock Exchange) was approximately \$ 17.4 billion. Solely for purposes of this disclosure, shares of Class A common stock held by executive officers, directors, and holders of more than 10% of our common stock of the Registrant as of such date have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of February 3, 2025, the Registrant had 618,997,327 shares of Class A common stock and 48,302,658 of Class B common stock, each with a par value of \$0.0001 per share, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrants' definitive proxy statement relating to its 2025 annual meeting of shareholders (the "2025 Proxy Statement") are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated. The 2025 Proxy Statement will be filed with the U.S. Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the federal securities laws, which statements involve substantial risks and uncertainties. Forward-looking statements generally relate to future events or our future financial or operating performance. In some cases, you can identify forward-looking statements because they contain words such as “expect,” “anticipate,” “should,” “believe,” “hope,” “target,” “project,” “plan,” “goals,” “estimate,” “potential,” “predict,” “may,” “will,” “might,” “could,” “would,” “intend,” “shall,” “contemplate,” “opportunity,” or “continue” or the negative of these words or other similar terms or expressions that concern our expectations, strategy, plans, or intentions. Forward-looking statements contained in this Annual Report on Form 10-K include, but are not limited to, statements about:

- our expectations regarding future financial performance, including but not limited to our expectations regarding revenue, cost of revenue, changes in the estimated average lifetime of a paying user, operating expenses, operating losses, operating leverage and our key metrics, and our ability to achieve and maintain future profitability;
 - our ability to successfully execute our business and growth strategy, including our potential to scale and grow our advertising business, our international users, developers, and creators, and our ability to create new revenue opportunities;
 - the sufficiency of our cash and cash equivalents to meet our liquidity needs;
 - economic, seasonal, and industry trends;
 - the functionality and economics of our platform on operating systems and through distribution channels and software application stores;
 - the demand for our platform in general;
 - our ability to retain and increase our number of users, developers, and creators;
 - the impact of inflation and global economic conditions on our operations;
 - our ability to develop enhancements to our platform, and bring them to market in a timely manner;
 - our beliefs about and objectives for future operations;
 - our ability to attract and retain employees and key personnel and maintain our corporate culture;
 - future acquisitions or investments, including infrastructure investments to increase capacity;
 - the ability for developers to build, launch, scale, and monetize experiences for users;
 - our expectations regarding our ability to generate revenue from our users;
 - our ability to convert users into developers and creators;
 - our expectations regarding new target demographics;
 - our ability to continue to provide a safe and civil online environment, particularly for children;
 - our ability to develop and protect our brand;
 - our ability to maintain the security and availability of our platform;
 - our ability to detect and minimize unauthorized use of our platform
 - the impact of disruption in supply chains on our ability to expand or increase the capacity of the platform or replace defective equipment;
 - our business model and expectations and management of future growth, including for headcount growth rate, expansion in international markets and expenditures associated with such growth;
 - our ability to compete with existing and new competitors;
 - our expectations regarding outstanding litigation and legal and regulatory matters;
 - the impact and effects of inaccurate or unfavorable third-party reports, including reports of short sellers, about us, our business or our market;
 - our expectations regarding the effects of existing and developing laws and regulations, including with respect to privacy, data protection, online safety, and the regulation of Robux as a security, both in the U.S. and internationally, including how such laws and regulations may interfere with user, developer and creator access to our platform and experiences;
 - our expectations surrounding Robux as an attractive virtual currency;
 - our goal to increase developer and creator earnings as much as possible;
-

[Table of Contents](#)

- the impact of geopolitical events, including the war in Ukraine, the conflict in the Middle East stemming from Hamas' attack against Israel, and their impacts on economies globally;
- our expectations regarding new accounting standards;
- our ability to achieve and maintain effective control over financial reporting;
- the impact of foreign currency exchange rates and interest rates on results of operations;
- our estimates related to stock-based compensation expenses; and
- generating sufficient cash to service our debt and other obligations that apply to our indebtedness.

We caution you that the foregoing list may not contain all of the forward-looking statements made in this Annual Report on Form 10-K.

You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Annual Report on Form 10-K primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, results of operations and prospects. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties and other factors, including those described in the section titled "Risk Factors" and elsewhere in this Annual Report on Form 10-K. Moreover, we operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Annual Report on Form 10-K. We cannot assure you that the results, events and circumstances reflected in the forward-looking statements will be achieved or occur, and actual results, events or circumstances could differ materially from those described in the forward-looking statements.

Neither we nor any other person assumes responsibility for the accuracy and completeness of any of these forward-looking statements. Moreover, the forward-looking statements made in this Annual Report on Form 10-K relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this Annual Report on Form 10-K to reflect events or circumstances after the date of this Annual Report on Form 10-K or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make.

SPECIAL NOTE REGARDING OPERATING METRICS

We manage our business by tracking several operating metrics, including average daily active users (“DAUs”), hours engaged, bookings, average bookings per DAU (“ABPDAU”), average new and returning monthly unique payers, monthly repurchase rate, and average bookings per monthly unique payer. As a management team, we believe each of these operating metrics provides useful information to investors and others. For information concerning these metrics as measured by us, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

While these metrics are based on what we believe to be reasonable estimates of our user base for the applicable period of measurement, there are inherent challenges in measuring how our platform is used. These metrics are determined by using internal data gathered on an analytics platform that we developed and operate and have not been validated by an independent third party. This platform tracks user account and session activity. If we fail to maintain an effective analytics platform, our metrics calculations may be inaccurate. These metrics are also determined by certain demographic data provided to us by the user, such as age or gender. If our users provide us with incorrect or incomplete information, then our estimates may be inaccurate. Our estimates also may change as our methodologies and platform evolve, including through the application of new data sets or technologies or as our platform changes with new features and enhancements.

We believe that these metrics are reasonable estimates of our user base for the applicable period of measurement, and that the methodologies we employ and update from time-to-time to create these metrics are reasonable bases to identify trends in user behavior. Because we update the methodologies we employ to create metrics, our current period daily active users or other metrics may not be comparable to those in prior periods. For example, in the first quarter of 2023, we revised the methodology we use to calculate average monthly unique payers for payers who purchased prepaid cards through one of our specified distributors (the impact to average new and returning monthly unique payers and average bookings per monthly unique payer in periods prior to the first quarter of 2023 was not significant). Similarly, our metrics may differ from estimates published by third parties or from similarly-titled metrics from other companies due to differences in methodology.

Finally, the accuracy of these metrics may be affected by certain factors relating to user activity and systems and our ability to identify and detect attempts to replicate legitimate user activity, often referred to as botting. See the section titled “Risk Factors—Our user metrics and other estimates are subject to inherent challenges in measurement, and real or perceived inaccuracies in those metrics may significantly harm and negatively affect our reputation and our business.”

DAUs

We define a DAU as a user who has logged in and visited Roblox through our website or application on a unique registered account on a given calendar day. If a registered, logged in user visits Roblox more than once within a 24-hour period that spans two calendar days, that user is counted as a DAU only for the first calendar day. We believe this method better reflects global engagement on the platform compared to a method based purely on a calendar-day cutoff. DAUs for a specified period is the average of the DAUs for each day during that period. As an example, DAUs for the month of September would be an average of DAUs during that 30 day period.

Other companies, including companies in our industry, may calculate DAUs differently.

We track DAUs as an indicator of the size of the audience engaged on our platform. DAUs are also broken out by geographic region to help us understand the global engagement on our platform.

The geographic location data collected is based on the IP address associated with the account when an account is initially registered on Roblox. The IP address may not always accurately reflect a user’s actual location at the time they engaged with our platform. Historically, we have grouped Xbox users into Rest of World for the purposes of our reporting (we note that since the fourth quarter of 2020, Xbox users have represented less than 2% of our total quarterly DAUs and quarterly hours engaged). Beginning in the fourth quarter of 2023, Xbox users are reported in their respective geographies.

Because DAUs measure account activity and an individual user may actively use our platform within a particular day on multiple accounts for which that individual registered, our DAUs are not a measure of unique individuals accessing Roblox. References to “user” or our “user base” in this report refer to users as described in our definition of DAUs. Additionally, if undetected, fraud and unauthorized access to our platform may contribute, from time to time, to an overstatement of DAUs. In many cases, fraudulent accounts are created by bots to inflate user activity for a particular developer’s content on our platform, thus making the developer’s experience (which refer to the titles that have been created by developers) or other content appear more popular than it really is. We strive to detect and minimize fraud and unauthorized access to our platform. See the sections titled “Risk Factors—Our user metrics and other estimates are subject to inherent challenges in measurement, and real or perceived inaccuracies in those metrics may significantly harm and negatively affect our reputation and our business,” and “Risk Factors—Some developers, creators, and users on our Platform may make unauthorized, fraudulent, or illegal use of Robux and other digital goods or experiences on our Platform, including through unauthorized third-party websites or “cheating” programs.”

Hours engaged

We define hours engaged as the time spent by our users on the platform. We calculate total hours engaged as the aggregate of user session lengths in a given period. We estimate this length of time using internal company systems that track user activity on our platform as discrete events, and aggregate these discrete activities into a user session. A given user session on our platform may include, among other things, time spent in experiences, in Roblox Studio, in platform features such as chat and avatar personalization, in the Creator Store, and some amount of non-active time due to limits within the tracking systems and our estimation methodology. As we continue to develop new features and products, we expect that our user session calculation will continue to evolve. We continue to review our user session calculation methodologies and may develop alternative calculation methods to increase consistency and accuracy in future periods.

We track hours engaged as an indicator of the user engagement on our platform. Hours engaged are also broken out by geographic region to help us understand the global engagement on our platform.

We continuously strive to increase the sophistication of our company systems to detect different user activities, including botting, non-active time and other activities across all devices. As we continue to improve our ability to detect and deter certain user behaviors on the Platform and different devices, including unauthorized use of our Platform, we may see an impact to our overall hours engaged as our measurement systems evolve and our efforts to reduce botting become more successful.

See the section titled “Risk Factors—Our user metrics and other estimates are subject to inherent challenges in measurement, and real or perceived inaccuracies in those metrics may significantly harm and negatively affect our reputation and our business.”

Bookings

Bookings represent the sales activity in a given period without giving effect to certain non-cash adjustments, as detailed below. Substantially all of our bookings are generated from sales of virtual currency, which can ultimately be converted to virtual items on the platform. Sales of virtual currency reflected as bookings include one-time purchases or monthly subscriptions purchased via payment processors or through prepaid cards. Bookings are initially recorded in deferred revenue and recognized as revenues over the estimated period of time the virtual items purchased with the virtual currency are available on the platform (estimated to be the average lifetime of a paying user) or as the virtual items purchased with the virtual currency are consumed. Bookings also include an insignificant amount from advertising and licensing arrangements.

We believe bookings provide a timelier indication of trends in our operating results that are not necessarily reflected in our revenue as a result of the fact that we recognize the majority of revenue over the estimated average lifetime of a paying user, which was 27 months as of December 31, 2024. The change in deferred revenue constitutes the vast majority of the reconciling difference from revenue to bookings. By removing these non-cash adjustments, we are able to measure and monitor our business performance based on the timing of actual transactions with our users and the cash that is generated from these transactions. Over the long-term, the factors impacting our revenue and bookings trends are the same. However, in the short-term, there are factors that may cause revenue and bookings trends to differ.

We use this non-GAAP financial information to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that this non-GAAP financial information may be helpful to investors because it provides consistency and comparability with past financial performance. However, non-GAAP financial measures have limitations in their usefulness to investors because they have no standardized meaning prescribed by GAAP and are not prepared under any comprehensive set of accounting rules or principles. In addition, other companies, including companies in our industry, may calculate similarly titled non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our non-GAAP financial information as a tool for comparison. As a result, our non-GAAP financial information is presented for supplemental informational purposes only and should not be considered in isolation from, or as a substitute for financial information presented in accordance with GAAP.

Bookings are also broken out by geographic region based on the billing country of our payers, to help us understand the global engagement and monetization on our platform. The billing address may not always accurately reflect a payer's actual location at the time of their purchase.

ABPDAU

We define ABPDAU as bookings in a given period divided by the DAUs for such period. We primarily use ABPDAU as a way to understand how we are monetizing across all of our users. ABPDAU is also broken out by geographic region to help us understand the global monetization on our platform.

Average New and Returning Monthly Unique Payers and Monthly Repurchase Rate

We define new monthly unique payers as user accounts that made their first payment on the platform, or via redemption of prepaid cards, during a given month. Average new monthly unique payers for a specified period is the average of the new monthly unique payers for each month during that period. Because we do not always have the data necessary to link an individual who has paid under multiple user accounts, an individual may be counted as multiple new monthly unique payers.

We define returning monthly unique payers as user accounts that have made a payment on the platform, or via redemption of prepaid cards, in the current month and in any prior month. Average returning monthly unique payers for a specified period is the average of the returning monthly unique payers for each month during that period. Because we do not always have the data necessary to link an individual who has paid under multiple user accounts, an individual may be counted as multiple returning monthly unique payers.

We define monthly repurchase rate as the returning monthly unique payers in the current month, divided by the sum of the prior month's new monthly unique payers and returning monthly unique payers. Average monthly repurchase rate for a specified period is the average of the monthly repurchase rates for each month during that period.

Average Bookings per Monthly Unique Payer

We define average bookings per monthly unique payer as bookings in the specified period divided by the average monthly unique payers for the same specified period.

Part I

Item 1. BUSINESS

Overview

Roblox operates a free to use immersive platform for connection and communication (the “Roblox Platform” or “Platform”), where every day, millions of users come to create, play, work, learn, and connect with each other in experiences built by our global community of creators. Our vision is to reimagine the way people come together – in a world that is safe, civil, and optimistic. To achieve this vision, we are building an innovative company that, together with the Roblox community, has the ability to strengthen our social fabric and support economic growth for people around the world.

Our Platform consists of the Roblox Client, the Roblox Studio, and the Roblox Cloud. Roblox Client is the application that allows users to seamlessly explore 3D immersive experiences. Roblox Studio is the free toolset that allows developers and creators to build, publish, and operate 3D immersive experiences and other content accessed with the Roblox Client. Roblox Cloud includes the services and infrastructure that power our Platform.

Our mission is to connect a billion users with optimism and civility. We are constantly improving the ways in which our Platform supports shared experiences, ranging from how these experiences are built by an engaged community of developers and creators to how they are enjoyed and safely accessed by users across the globe.

Growth at Roblox has been driven primarily by a significant investment in technology and two mutually reinforcing network effects: content and social.

First, user-generated content, built by our community of developers and creators, powers our Platform. As developers and creators build increasingly high-quality content, more users are attracted to our Platform. With more users on our Platform, greater engagement and monetization opportunities exist, which in turn, makes Roblox more attractive to developers and creators, incentivizing them to design increasingly engaging content and encouraging new developers and creators to start building on our Platform.

Second, our Platform is social. When users join, they typically interact with friends, which inspires them to invite more friends, who in turn, invite their friends, driving organic growth. The more friends that each of our users have interacting on the Platform, the more valuable and engaging the Platform becomes. This drives more users to our Platform through word of mouth from their existing friends on the Platform.

Our User and Creator Community

Roblox is powered by content from our community of developers and creators who build immersive and engaging experiences found only on Roblox, as well as the vast majority of the items for customizing avatars. This content attracts our users to immerse themselves in the millions of experiences found on the Platform. Many of our users may also eventually become developers and creators, and nearly all developers and creators started as users.

Our Users

In the year ended December 31, 2024, 82.9 million average DAUs across over 180 countries enjoyed experiences on Roblox across mobile, desktop, and console platforms, of which on average, approximately 1.0 million were daily unique paying users. Our users are diversified across multiple dimensions, including age, geography, platform, and gender. Each day, users express themselves through their avatars, explore different worlds, and engage with others in the Roblox community. During the year ended December 31, 2024, users spent 73.5 billion hours engaged on our Platform, or an average of 2.4 hours per DAU each day. Over the same period, our users explored an average of over 21 different experiences on the Roblox Platform per month.

Breakdown of Our Users ⁽¹⁾

Global DAU = 82.9 million ⁽¹⁾

(1) Represents the average during the year ended December 31, 2024. Refer to "Special Note Regarding Operating Metrics" for details on operating metrics used. Percentages presented are calculated from the underlying numbers in thousands and may not add to their respective totals due to rounding.

Our Developers and Creators

We offer developers and creators the ability to build engaging, immersive experiences and marketplace items that they can easily share with the Roblox community. We refer to users who create experiences and marketplace items as creators, while developers represent a subset of the creator community that create experiences on the Platform or build and sell custom tools to help other developers create experiences. In this way, our developers and creators enable us to offer a wide variety of experiences and avatar items and cost-effectively crowd-source our experiences, marketplace content, and developer tool ecosystem. In the year ended December 31, 2024 , we had millions of active developers with hours engaged in their experiences across more than 170 countries on the Roblox Platform. Our developer and creator community includes individuals with a wide spectrum of professional capabilities and team sizes, ranging from young students and independent hobbyists, all the way to full-time studios.

We measure the health and success of our developer and creator community based on their earnings and the user engagement in their experiences. As our Platform has scaled, our monetizing developers and creators have enjoyed meaningful earnings expansion over time, reflecting the increasing popularity and opportunities for monetization of our Platform and driving a growing incentive for our developers and creators to continue to build high-quality content.

We offer our creator and developer community several economic models to help support their goals. Specifically, developers and creators can generate earnings (either in Robux or in some circumstances, directly in fiat currency) through the following methods:

1. *Monetizing a developed experience:* Developers qualified for our Developer Exchange Program can earn Robux through:
 - a. *In-experience purchases*, which consist of microtransactions generated from the sale of in-experience virtual items, subscription-based offerings (including access to private servers), access to certain experiences (referred to as paid access), and/or passes granting special in-experience privileges.
 - b. *Engagement-Based Payouts*, which allows developers to earn Robux based on the share of time that Roblox Premium subscribers engage in their experience.
 - c. *Advertisements ("ads")*, which include a range of high-quality, programmatically served ad units through which developers can earn Robux from impressions and/or teleports generated.
2. *Creating and selling or reselling avatar items:* Creators can create and sell entire avatars, accessories, clothes, bodies, and heads for avatars in the Marketplace or inside experiences.
3. *Creating and selling Roblox Studio plugins:* Through the Creator Store, developers and creators can sell Roblox Studio plugins in fiat currency, which are extensions that add additional features or functionality to Roblox Studio and help improve creator workflows.
4. *Affiliate Programs:* Influencers and creators can earn a share of Robux from purchases made by users they direct to Roblox.

As of December 31, 2024, over 24,500 developers and creators qualified for and were registered in our Developer Exchange Program, of which over 7,500 were newly qualified and registered during 2024. In order to be qualified for our Developer Exchange Program and eligible to exchange earned Robux for fiat currency, developers and creators must meet certain conditions, such as having earned the minimum amount of Robux required to qualify for the program, a verified developer account, and an account in good standing. On January 31, 2022, we reduced the minimum amount of earned Robux required to qualify for the program from 100,000 Robux to 50,000 Robux and subsequently on January 31, 2023, we further reduced the minimum requirement from 50,000 Robux to 30,000 Robux. We believe these reductions in the minimum amounts required incentivize our developer and creator community, and promote the long term growth and health of such community. For the year ended December 31, 2024, over 17,000 developers and creators actually exchanged their earned Robux for fiat currency through our Developer Exchange Program.

We invest in our developers and creators by providing a comprehensive set of free tools and services through Roblox Studio, the Roblox Open Cloud, and a range of other creator resources that enable them to easily build, publish, analyze, grow, and monetize experiences. We empower developers and creators to get started with minimal upfront costs as we cover hosting, storage, customer support, localization, certain regulatory requirements, payment processing, and platform fees. We provide appropriate support for all developers and creators to promote engagement and growth in our developer and creator community. This includes managing and moderating our online developer and creator forums and operating special programs for aspiring and top developers and creators such as our annual Roblox Developers Conference. With Roblox Open Cloud, developers and creators can leverage a suite of backend APIs to seamlessly build and scale their experiences.

The investment in our developer community has resulted in an ever-changing offering of diverse content for our users to explore and engage in. The chart below provides detail on the diversity of content our users engage in within experiences. Specifically, this chart reflects the distribution of in-experience hours engaged within the top 1,000 experiences by month from January to December 2024.

Our Products and Technology

The Roblox Platform is the underlying technology and infrastructure that supports shared experiences and is composed of three elements:

- **Roblox Client**—The free application that allows users to explore 3D immersive experiences.
- **Roblox Studio**—The free toolset that allows developers and creators to build, publish, and operate 3D immersive experiences and other content accessed with the Roblox Client.
- **Roblox Cloud**—The services and infrastructure that power the Roblox Client and Roblox Studio.

Since our founding, we have invested heavily in building the Roblox Platform, and as of December 31, 2024, 77% of our employees were dedicated to maintaining, improving, and expanding it. Our technology supports the following key characteristics of the Roblox Platform: Identity, Connection and Communication, Immersive, Low Friction, Variety of Content, Anywhere, Economy, and Safety.

Identity

The Roblox avatar system allows users to create and personalize their unique 3D identities. Our avatar technology supports a wide variety of character styles, ranging from classic avatars with blocky body shapes, to ones with more human proportions, from anime characters, to fantasy avatars, and more. Avatars can also be animated and mirror a user’s movements and facial expressions on the avatar in real time, allowing more interactive and authentic communication. Creators can also build avatar creation tools in their experiences, allowing users to create more personalized avatars.

The Roblox Client features the Avatar Editor, which enables users to manipulate the size and body shape of their avatars as well as equip their avatar with clothing, gear, animations, simulated gestures, or emotes, and other accessories from the Marketplace. Our avatar system allows users to attach practically any accessory to any avatar maximizing the combinatorial variety of avatar configurations supported by the Platform. Users manipulate their avatar through a consistent set of controls for emotes, basic movement, and tap-to-move functionality which adapts to dynamically changing virtual environments. The Roblox Client normalizes camera and avatar control inputs from different device form factors, including mobile, tablet, desktop, and game console, to simplify the process of building multi-user, multi-platform, and avatar-based experiences.

Within most experiences, avatars appear exactly how they were configured in the Avatar Editor, creating a sense of persistent identity. However, developers, when designing experiences, have the freedom to dynamically reconfigure all or part of the participating avatars to meet the specific needs of the developer's experience.

Connection and Communication

The Roblox Client allows users to easily connect with real life friends (through features such as contact importer) and meet new friends (by matching users with similar characteristics, such as country location, for example). The social graph created by these connections is stored in the Roblox Cloud and requires mutual opt-in to avoid unwanted communications.

The social graph is central to human connection and communication. When a user chooses to join an experience, the Roblox Cloud is designed to automatically place that user into the same virtual environment as others connected through the social graph. In addition, most developers allow users to purchase private servers that allow groups of friends to share an exclusive, invite-only instance of a 3D immersive experience.

Additionally, the Roblox Platform facilitates communication with in-experience text-based chat amongst users of all ages joining the same 3D immersive experience. For safety, every text message passes through filters that block content which violates applicable Roblox Community Standards (e.g. personally identifiable information or directing users off platform). Using advanced pattern matching and machine learning, our chat filters are constantly evolving and process billions of messages per day.

We have also expanded our communication features through voice chat, now available in over 30 countries around the world and in several supported languages, allowing users aged 13 and over to communicate using their voice in Roblox experiences. This proximity-based feature simulates realistic communication through lip sync and is based on how close users are in an experience to other users who are speaking in that experience. In addition, avatar animation allows all users to use their camera to animate their avatar with their movement, allowing them to communicate and express themselves in more natural, real-time, and immersive ways.

Recently, we launched Party, a new way to connect and coordinate with friends. With Party, up to six friends can easily join the same instance of an experience and even move together from one experience to another. Users aged 13 and older can also use Party chat to text chat with one another.

Immersive

The Roblox Platform allows developers to build deeply immersive 3D environments where users can share synchronous experiences with others, independent of where they may be physically. The Roblox Client provides users with intuitive camera and input controls that are tuned for each device's form factor. By abstracting these controls from developers, the process of building cross platform 3D immersive experiences is greatly simplified.

Developers use Roblox Studio to easily build 3D immersive experiences that are then rendered and simulated on the Roblox Platform. The Roblox Client leverages efficient low-level hardware-specific device APIs, such as Vulkan for Android devices and Metal for Apple devices, to efficiently render those experiences. Each experience combines thousands of meshes, textures, 3D models, and animations. Using Roblox Studio, developers can also insert immersive ads into their experiences, which are native and 3D ad units that can programmatically serve ads in image, video, and portal ad formats.

Each 3D immersive experience is simulated in the Roblox Cloud with a custom physics engine built for rigid body and constraint-based physics. Using a combination of novel mathematical formulations and aggressive optimization, the engine can simulate a large number of complex mechanisms at high levels of fidelity. To achieve an optimal balance between latency, scale, and consistency, computations for the simulation are distributed across Roblox Clients and the Roblox Cloud.

Assets that make up the 3D immersive experience are stored in a persistent tree hierarchy that is the foundation for collaborative editing and interactive multi-user experiences. The hierarchy can be modified through APIs which serve as a powerful abstraction layer making it easy to create experiences that are consistent across all Roblox Clients, regardless of device type. During simulation, this data is dynamically replicated within the Roblox Cloud and selectively transmitted to Roblox Clients. The Roblox Client then constructs and renders its own view of the 3D immersive experience.

Low Friction

The Roblox Platform gives users the ability to interact with experiences almost instantly, on most popular client devices, and from anywhere in the world over existing broadband and cellular networks. As of December 31, 2024, the Roblox Client operates on iOS, Android, PC, Mac, Xbox, PlayStation, and virtual reality ("VR") hardware such as Meta Quest, and supports VR experiences on PC. With the Roblox Platform, developers can build an experience once and then expect that experience to operate consistently on all supported devices to both take advantage of the capabilities of high end systems and also scale down the experience to work on lower end devices. We continually focus on improving frame rates, increasing stability, and enhancing graphics quality.

The Roblox Client is designed for the rapid movement of users between experiences. Almost immediately upon launching a new experience, the Roblox Client will begin simulating and rendering the virtual world using a partial representation of the environment at a low level of detail. As more and higher fidelity assets are received by the Roblox Client, the fidelity of the experience automatically improves.

Assets are delivered to the Roblox Client through geographically distributed content delivery networks. The Roblox Cloud determines the format, level of detail, and priority of each asset sent in order to optimize for the capabilities and bandwidth available to the client device. The Roblox Client can dynamically load and unload instances and assets as the player moves throughout the experience without waiting for long content preloads, in a process otherwise referred to as streaming. All else being equal, streaming enables faster join times and larger, more complex experiences that can be joined synchronously on different devices regardless of device memory capacity.

The Roblox Cloud enables low-latency, responsive interactivity between millions of concurrent users within 3D environments. When a user joins a 3D immersive experience, the Roblox Cloud assigns that user to a particular game instance based on, among other considerations, the user's social graph, geographic location, spoken language, and age group. Roblox Cloud is designed to automatically scale up and down the number and size of server instances to effectively serve the current user demand for an experience, thereby allowing the Platform to scale up to handle the most popular experiences while also scaling down when demand reduces. Developers can choose to allow up to 200 users within an instance, but may choose fewer to optimize their experience.

Developers have access to high-speed data stores in the Roblox Cloud where information about users and each simulated environment can be persisted. This, along with other services hosted in the Roblox Cloud, make it possible for a developer to build, launch, scale and monetize a 3D immersive experience without any additional tools or services.

The majority of services operated by the Roblox Cloud are hosted in Roblox managed data centers. For some of our high-speed databases, scalable object storage, and message queuing services we leverage Amazon Web Services. Nearly all of the servers tasked with simulating the virtual environment and optimizing assets for Roblox Clients are owned by Roblox and operate from data centers and regional edge data centers widely distributed across 23 cities in North America, Asia-Pacific, and Europe. As of December 31, 2024, the Roblox Cloud uses over 140,000 servers. The Roblox Cloud is designed to be fault tolerant and prepared for disaster recovery and we continue to expand into multiple data centers within and across geographic regions to improve reliability and fault tolerance.

Data centers in the Roblox Cloud are linked through a high-performance dedicated backbone network bypassing the public internet for traffic within and between our data centers and we operate under an open peering policy where we have direct interconnection with Internet providers globally. Operating our own network maximizes performance, security, and increases the immersiveness experienced by our users.

Variety of Content

Developers and creators build nearly all of the content for the Roblox Platform, including a variety of experiences from gaming, to education, to entertainment, and beyond. Their efforts contribute to an expanding content library that included over 14 million active experiences and millions of available Marketplace items during the year ended December 31, 2024.

Developers build, publish, and operate 3D immersive experiences with Roblox Studio, a free suite of tools accessible to all skill levels. Teams can work together using built-in access control management and collaborative editing. Once content is built, it can be replicated and shared across multiple experiences, giving developers the ability to scale their efforts and make rapid updates.

In addition to constructing 3D objects and environments, developers can script complex behaviors into their experience with Roblox Lua. Based on Lua, an interpreted light-weight programming language popular in the gaming industry, Roblox Lua adds an optional static type system and a highly optimized interpreter that maximizes performance on Roblox Clients and in the Roblox Cloud. Using scripts, developers can modify the environment, control object behavior, and create new ways for users to interact with the virtual environment. Within Roblox Studio, developers have access to a powerful script editor which supports autocomplete, debugging, and the ability to emulate the Roblox Client running on supported devices.

Roblox Studio also leverages artificial intelligence ("AI") to help reduce friction for creators and developers, making it easier to build content on the Platform. These AI tools help developers and creators with varying levels of experience. For example, AI tools such as Assistant help beginner developers and creators by answering common questions, while AI tools such as Code Assist or Materials Generator help developers and creators with some coding experience learn how to write and improve code and easily create more complex materials. Finally, AI tools like Avatar Auto-Setup save creators time by turning 3D avatar models into animated avatar technology.

Creators can share their work with other creators through the Creator Store. The Creator Store drives collaboration within our developer community, accelerates creation of new experiences, and provides additional ways for creators to monetize their work. As of December 31, 2024, the Creator Store contained millions of models, meshes, textures, scripts, audio clips, developer tools, and packaged combinations of these items.

We provide developers with reference material, tutorials, community forums, and analytics to build their creations. Creator Hub includes reference material, API documentation, and tutorials for developers. Developer Forum is a private forum for qualified developers which provides insight on new features, community initiatives, recruitment opportunities, bug reporting, and direct engagement with our employees. Edu Hub provides content for educators, students, and parents who are using Roblox as a tool to learn coding, 3D design, and digital civility. All developers on the Roblox Platform have access to dashboards that show daily visits to their experience, as well as earned Robux generated from their experience and Marketplace items.

Within the Roblox Client, users find experiences through personalized content recommendations, curated homepage sorts and search. Personalized AI-driven content recommendations are based on past user behavior, the social graph, and demographic information collected at signup. An emphasis is always placed on experiences where someone you are connected with is present. Additionally, we curate our homepage to highlight experiences from up-and-coming creators, recently updated experiences and new genres helping our users to try more experiences and increasing the diversity of the content with which they engage. The search engine automatically learns user intent, accounting for misspellings, slang, and multilingual queries.

Anywhere

The Roblox Platform serves a global audience. In the year ended December 31, 2024, developers from over 170 countries and users spanning over 180 countries accessed our Platform.

Localization systems embedded within the Roblox Client and Roblox Cloud help to lower cultural barriers and enable our developers to meet certain regional requirements with little to no additional effort.

Developers can build experiences in their native language and then, using machine translation and advanced pattern recognition, the Roblox Cloud automatically translates those experiences into 16 languages including simplified Chinese, traditional Chinese, English, French, German, Indonesian, Italian, Japanese, Korean, Polish, Portuguese, Russian, Spanish, Thai, Turkish, and Vietnamese. Developers also have the ability to customize all or part of their translations if needed.

The Roblox Client can adjust a user's experience and available content based on their age, device type, current location and where the client application was obtained. This allows Roblox to dynamically apply relevant content filters, anti-addiction rules, payment limits, parental consent requirements, and certain other regional requirements.

Economy

Roblox has a vibrant economy built on a virtual currency called Robux, which can be purchased through the Roblox Client and Roblox website or through prepaid cards purchased via online and physical retailers. Roblox works with multiple payment and prepaid card processors including Apple, Blackhawk, Google, Incomm, and Stripe, amongst others. Roblox relies on payment processor partners to store account information.

Users can also acquire Robux through a monthly subscription to Roblox Premium. With a subscription, users receive discounted Robux along with access to exclusive or discounted items in the Marketplace. Developers may also choose to offer additional benefits to active Roblox Premium subscribers in the form of discounted virtual merchandise or access to exclusive in-experience features.

Developers and creators earn Robux by selling virtual content or access to virtual content (including through subscriptions), as well as through the incorporation of immersive ads into their experiences, which are ad units that developers can insert into their experience for Roblox to programmatically serve ad content from advertisers.

Developers can also earn Robux through Engagement-Based Payouts based on the share of time that Roblox Premium users engage in their experiences. Engagement-Based Payouts incentivize developers to invest in the engagement of their experiences. The payout system is designed to protect against fraud and computes a developer's earnings potential on a daily basis.

Roblox allows developers and creators to convert earned Robux into the fiat currency of their choice through our Developer Exchange Program. All Developer Exchange Program requests are reviewed on a risk-based approach to mitigate fraud and money laundering. Developers and creators participating in the program are required to create an account with our third party vendor which collects tax information, conducts certain "know your customer" related diligence, and executes the payouts. Their systems are designed to comply with various global regulatory requirements for monetary transactions. Additionally, developers and creators aged 13 and up can convert earned Robux into ad credits to purchase ads on the Platform.

Safety

Multiple systems are integrated into the Roblox Platform to promote the safety and civility of our users. These systems are designed to enforce our policies, protect users' personal information, and abide by local laws. We leverage text-filtering, voice moderation, content moderation, and other automated systems that proactively identify content and behaviors that may violate our policies.

Content submitted by developers and creators, including images, audio, and video, goes through a multi-step review process before appearing on the Platform. Images and videos are evaluated for Child Sexual Abuse Material using PhotoDNA and Google's Content Safety API with flagged content automatically reported to the National Center for Missing and Exploited Children upon review. Audio files are scanned for IP infringement. Finally, all assets are subject to review by humans or AI trained on our Community Standards. During the year ended December 31, 2024, including automated reviews, we evaluated over 400 million assets. Assets refer to images, audio files, and video files that developers upload to the Roblox Platform to include in their experiences and in the Marketplace.

When experiences are published or updated on the Roblox Platform, they are evaluated by a suite of AI driven tools that identify problematic language, potential bypasses to our safety systems, and content that falls outside our policies. A human review team is continuously operating to evaluate flagged experiences. The Roblox Platform includes a suite of anti-intruder technology leveraging machine learning, throttles, and circuit breakers designed to block automated bot attacks and mitigate the impact of humans who attempt to spam users and disrupt the service. We also leverage targeted penetration testing, a bug bounty program, code reviews, secure by design principles, targeted security testing, and vulnerability scanning to promote the security of the Platform.

Roblox operates a customer service portal that provides self-help information along with ways to contact Roblox via email or from within the Roblox Client. In the year ended December 31, 2024, Roblox responded to millions of customer inquiries and had a human respond to actionable safety issues on average within 18 minutes of their submission.

Safety and Digital Civility

Our highest priority is to create a safe and civil online environment for our users. Because our Platform includes children aged 5 and over, our safety and civility policies are purpose-built to be strict. We have a multi-layered moderation system that is designed to assess all content uploaded to Roblox for potential safety and civility issues. Our safety and civility policies, which include our Community Standards, define acceptable content and communication, and coupled with user behavior, inform a wide range of AI algorithms that automatically moderate content. Those algorithms are backed up by a team of thousands of moderators focused on improving quality and handling the most difficult decisions. On top of that, we have robust user reporting that provide additional coverage. We have no tolerance on our Platform for content or behavior that violates our Community Standards.

We work closely with regulators, authorities, and safety groups in many countries. We endeavor to promptly report any suspected child exploitation or abuse materials to the relevant authorities. Our Platform is designed to comply with the Children's Online Privacy Protection Act ("COPPA") and we regularly monitor and evaluate compliance with other U.S. federal and state and foreign laws and regulations regarding privacy and data protection, including the General Data Protection Regulation ("GDPR").

We partner with leading global organizations focused on child and internet safety, including the WeProtect Global Alliance, Digital Wellness Lab, Family Online Safety Institute, UK Safer Internet Centre, Internet Matters, the Internet Watch Foundation, and kidSAFE, among others. We are also a member of various organizations, such as the Association for United Kingdom Interactive Entertainment and the Technology Coalition, with a goal of cross-industry collaboration, knowledge and technology exchange in areas of user safety, and child safety. As a member of the Technology Coalition and a founding member of its cross-platform signal sharing Lantern program, we are committed to providing transparency and promoting child safety online. We also nominate the board chair position of the Family Online Safety Institute where we educate and provide balanced perspectives to policy makers to help draft thoughtful online safety legislation. We continue to work diligently with other digital platforms to report bad actors and inappropriate content so that they can also take appropriate actions on their platforms.

Our Trust & Safety Systems

We use AI and a dedicated team of human moderators to review content, including images, audio, and video, uploaded into our Platform. Our scanning algorithms also review and monitor communications that flow through Roblox to proactively block and protect users from inappropriate behavior, such as questions about personal information and instructions on how to connect on less protective third-party chat applications. The algorithms in our chat filters are age-sensitive: they monitor both what users can say and see based on their ages.

Throughout our site and in-experience, we provide our users with the ability to report activity that they find objectionable. Users can also block or mute other users with whom they do not want to interact. We also provide parents with customizable parental controls, which allow them to limit access to features like chat, control screen time, and view their child's friends list. In addition, parents can restrict access to experiences based on their content maturity levels. In 2024, we introduced significant updates to our safety systems and parental controls. As part of this launch, we introduced remote management, which allows parents and caregivers to adjust controls and review their child's activity even if they aren't physically together. We also updated the naming of our content labels to give parents greater clarity and restricted access to certain experiences for our youngest users based on user behavior sometimes found in those experiences.

We have a dedicated team and thousands of trust & safety agents whose role is to protect our users by focusing on detecting inappropriate content and behavior 24/7 through a combination of AI and human moderation. We take swift action to address any content, developer, creator, or user that violates our terms of use once detected. We have a Safety Advisory Board, made up of global industry experts that advise on the best practices to protect our community.

We continue to innovate and release new safety features and policies and invest in technology and people to combat bad actors who attempt to undermine our efforts to connect millions of people. Our priority remains the safety and digital civility of our community.

The Roblox Economy

We support our developer and creator community by providing the tools to build, publish, operate, drive discovery, and monetize content. Our economy enables developers and creators to generate income through Roblox. As of December 31, 2024, over 24,500 developers qualified for and were registered in our Developer Exchange Program and therefore met certain conditions, such as having earned the minimum amount of Robux required to qualify, having a verified developer account, and having an account in good standing, and were therefore eligible to exchange their earned Robux for fiat currency. Of such developers and creators, for the year ended December 31, 2024, over 17,000 developers and creators actually exchanged their earned Robux for fiat currency through our Developer Exchange Program.

Business Model

When users sign up for Roblox, they can create an avatar and explore the vast majority of our experiences for free, although the business model for any given experience is ultimately up to its developer. Most free experiences allow users to spend Robux by purchasing experience-specific enhancements. Users can also use Robux to obtain items such as clothing, accessories, and emotes from our Marketplace or within an experience. Roblox retains a portion of every Robux transaction and distributes the rest to developers and creators. Robux can only be purchased from us at a price set by us, and can only be spent within our Platform. Robux have no monetary or intrinsic value outside of our Platform and can only be converted to fiat currency through our Developer Exchange Program. We are aware that some users seek to use unauthorized third-party websites to exchange Robux for fiat currency which is not permitted under our terms of use. We regularly monitor and screen usage of our Platform with the aim of identifying and preventing these activities, as well as regularly send cease-and desist letters to operators of third-party websites offering fraudulent Robux or digital goods offers.

Consistent with our free to use business model, a small portion of our users have historically been payers. For example, in the year ended December 31, 2024, of our average 82.9 million DAUs, only approximately 1.0 million represented our average daily unique paying users. Similarly, in the year ended December 31, 2024, our average daily bookings per DAU was \$0.14, whereas our average daily bookings per daily unique paying user was \$11.48. We believe that maintaining and growing our overall number of users, including the number of users who may not purchase and spend Robux, is important to the success of our business. As a result, we believe that the number of users who choose to purchase and spend Robux will continue to constitute a small portion of our overall users.

Roblox also allows developers, creators, and brands to reach their audiences by purchasing ads. Further, Roblox offers sponsored experiences and sponsored items, whereby developers and creators can pay to purchase ads to increase discoverability of their creations, which appear where experiences and items are discovered, including through search.

How Users Purchase Robux

Users can generally purchase Robux in two ways: as one-time purchases or via Roblox Premium, a subscription service that is billed monthly and includes discounted Robux, access to exclusive in-experience benefits, exclusive and discounted marketplace items and the ability to buy, sell, and trade certain Avatar items. Roblox accepts payments through app stores, credit cards, and prepaid cards. The average price for a Robux for the year ended December 31, 2024 was \$0.01.

How Developers and Creators Earn Robux

Robux are considered "earned" if a developer or creator receives them as payments for a bona fide third-party transaction through the Roblox Platform. We offer developers and creators the following mechanisms to earn Robux:

- sale of access to their experiences and enhancements in their experiences, which may be one-time or recurring;
- Engagement-Based Payouts, which reward developers for the amount of time that Roblox Premium subscribers spend in their experiences;
- generating impressions for ad units within their experiences and teleporting users to other experiences through ad portals; and
- sale of Avatar items to users (through the Marketplace or directly within experiences).

Generally, as users purchase and subsequently spend Robux on Roblox, creators of the virtual item receive 30% of the Robux, the seller or distributor of the virtual item receives 40% of the Robux, and the Platform receives 30% of the Robux. Oftentimes, the creator of the virtual item is also the seller of that item. Creators that sell their own creations within their experiences receive 70% of the Robux spent, as they are acting both as the creator and the seller. Creators that make their virtual items available through the Marketplace receive 30% of the Robux spent, as Roblox is both the seller and the Platform for these transactions. As it relates to generating impressions for ads units and portals, developers earn Robux based on the number of impressions and teleports that occur within their experience.

Earned Robux are deposited into the virtual accounts of the developers and creators, who can convert Robux into fiat currency at an exchange rate which is determined by Roblox in its sole discretion of 1 Robux to \$0.0035 as of December 31, 2024, if they qualify for and are registered in our Developer Exchange Program. In order to be qualified for our Developer Exchange Program and eligible to exchange earned Robux for fiat currency, developers and creators must meet certain conditions, such as having earned the minimum amount of Robux required to qualify for the program, a verified developer account, and an account in good standing. On January 31, 2022, we reduced the minimum amount of earned Robux required to qualify for the program from 100,000 Robux to 50,000 Robux and subsequently on January 31, 2023, we further reduced the minimum requirement from 50,000 Robux to 30,000 Robux. We believe these reductions in the minimum amounts required incentivize our developer and creator community, and promote the long term growth and health of such community. As of December 31, 2024 and 2023, over 24,500 and 16,500 developers and creators were qualified and registered in our Developer Exchange Program, respectively. For the years ended December 31, 2024 and 2023, developers and creators earned \$922.8 million and \$740.8 million, respectively.

Our developers and creators do not always exchange their Robux into fiat currency. Some choose to purchase ad credits to promote their experiences on the Platform or spend the Robux as any other user would.

Our Growth Strategies

We are continually innovating the Roblox Platform, including making significant investments in high fidelity avatars, more realistic experiences, AI tools, and other social features, as well as more diverse opportunities for monetization. We believe that these innovations have the potential to transform how people express themselves, socialize, communicate, play, learn, work, and transact together around the world. We are focused on the following key growth strategies:

- **Roblox Everywhere:** We want to give users the ability to interact with experiences almost instantly across the most popular client devices. As of December 31, 2024, the Roblox Client operates on iOS, Android, PC, Mac, Xbox, PlayStation, and VR hardware, such as Meta Quest, and supports VR experiences on PC. We believe the investments we are making will facilitate a high quality, intuitive experience for users across all devices, and enable developers and creators to publish once and instantly on all supported devices across a global audience.
- **Platform for Everyone:** As we expand the diversity of content, experiences, and communications that people can have on Roblox, we believe there is significant potential to increase our penetration and engagement across all demographics. We ultimately aim to be a brand that serves everyone. We also look to continue expanding new verticals such as brand partnerships, education, and communication .
- **International Expansion:** We believe there is significant potential for us to grow the global reach of our Platform. We believe some of that will occur by the same organic, word of mouth user, creator, and developer growth that we have seen in markets like the U.S., Canada, and the United Kingdom. In addition, we are investing in technology that will also enhance our growth around the world. For example, we believe that features such as automated translation and built-in regional compliance will enable us to scale usage in global markets, allowing developers to publish in multiple languages and allowing users to communicate with each other even when they speak different languages.
- **Vibrant Economy:** We believe there is significant potential to increase monetization on our Platform and we are constantly investing in new ways to empower our developer and creator community. We are actively working on empowering our creator community through initiatives such as User-Generated Content ("UGC") for all and dynamic price floors in the avatar marketplace. We are also supporting our developer community's monetization efforts through in-experience price optimization recommendations, higher revenue shares for paid access experiences, and our Creator Affiliate Program. At the platform-level, we are continuously investing in our Search and Discovery algorithms to advance personalization and drive engagement and spending. Finally, we expect to continue working with leading brands to build unique commerce opportunities and help them reach their audiences at scale within Roblox experiences through immersive ads. Our immersive ads system is designed to be native to the experience in which it is placed and will provide unique commerce opportunities for brands on the Platform. Immersive ads also provide developers and creators with another monetization method on the Platform.
- **Gaming Market Expansion:** We believe there is a strong potential to capture a greater percentage of global gaming revenue within the Roblox ecosystem. According to Newzoo's 2024 Global Games Market Report, it is estimated that 3 billion people will have played games in 2024. We believe our UGC approach, combined with several key differentiators like personalized expressive avatars, a vibrant social graph, and immersive 3D communication provide a unique value proposition to make traditional gaming experiences more social and support new experiences unique to our Platform. Additionally, we continue to innovate behind the scenes to improve the raw performance, quality, and cost-to-serve efficiency of our core Platform, with the goal of making it as easy as possible for creators to build better experiences, including games, and reach more users. Within the traditional gaming ecosystem, we also have a tremendous opportunity to expand content into new genres. Today, genres such as Avatar Roleplay, Simulation, and Survival are popular on our Platform, and we want to help our creators grow into untapped areas of demand such as Shooter, Sports & Racing and RPG experiences.

Brand and Marketing

Our go-to-market approach is driven by the strength and continued enhancement of our brand, organic adoption across our user, creator and developer communities, and an influencer-based marketing strategy, with a goal to demonstrate the Platform's wide-ranging appeal across demographics, geographies, and interests.

Users build a direct relationship with the Roblox brand by establishing an identity and creating their social graph. Users are able to navigate across an integrated universe of experiences on our Platform and engage on the Platform with other users in their social graph. We believe this approach helps to create a flywheel that brings new users to the Platform, and promotes loyalty and engagement.

We have millions of experiences to choose from on Roblox, and developers continue to build new experiences on the Platform and publish them daily. As experiences on the Platform grow in popularity, this success accrues to the Roblox brand and serves to draw in new audiences. Our approach is to amplify these experiences on both earned and owned channels which builds awareness and affinity for Roblox. This approach includes educating our creators, users, and brands on the Platform's capabilities and innovations, all of which elevates each stakeholder's experience.

We operate a highly efficient marketing model. Our approach is highly organic, with our user, creator and developer adoption driven by mutually reinforcing content and social network effects. We also leverage our influencer community to increase brand awareness and our reach across all age demographics. In 2024, we launched an Affiliate Program whereby influencers and creators can earn a share of Robux from purchases made by users they direct to Roblox.

We believe safety and civility is an integral and differentiating part of our brand. We have invested heavily in creating a safe and civil platform, which has allowed us to both grow and retain our user base.

Competition

We compete for both users, developers, and creators. We compete to attract and retain our users' attention on the basis of our content and user experiences. We compete for users and their engagement hours with global technology leaders such as Amazon, Apple, Meta Platforms, Google, Microsoft, and Tencent, global entertainment companies such as Comcast, Disney, ViacomCBS, and Warner Bros Discovery, global gaming companies such as Activision Blizzard (now owned by Microsoft), Electronic Arts, Take-Two, Epic Games, Krafton, and Valve, online content platforms including Netflix, Spotify, and YouTube, as well as social platforms such as Facebook, TikTok, Instagram, Pinterest, X (formerly known as Twitter), Reddit, Discord, and Snap. We are able to compete for these users based on our variety of content, personalized user experience, and various engaging and social features.

We rely on developers and creators to create the content that leads to and maintains user engagement (including maintaining the quality of experiences). We compete to attract and retain developers and creators by providing them with the free tools to easily build, publish, operate, and monetize content. We compete for developers and creators and engineering talent with gaming platforms such as Epic Games, Unity, Meta Platforms, and Valve Corporation, who provide developers and creators the ability to create or distribute interactive content. We are able to compete for these developers and creators because of our comprehensive offering to build, publish, and operate experiences on our Platform, our free and easy-to-use technology, our broad user reach, our economic rewards system, our brand, our reputation for innovation, our developer and creator-centric culture, and our mission.

Seasonality

We have historically experienced seasonality in monetization on our Platform and tend to generate higher levels of bookings in the fourth quarter of the year primarily due to the end-of-year holiday season. We also typically see higher levels of engagement in the months of June, July, and August, which are summer periods in the northern hemisphere, and lower levels of engagement in the post-summer months of September, October, and November. Other periods of seasonality include holidays such as Lunar New Year, Easter, and Ramadan, each of which may differ in timing year-over-year. While bookings are typically strongest in the fourth quarter, this trend may not be reflected in the revenue recognized in the same period due to the timing of our revenue recognition (see section "Revenue Recognition" within Item 8. Consolidated Financial Statements and Supplementary Data, Note 1, "Overview and Summary of Significant Accounting Policies", for further discussion on the Company's revenue recognition policy). These seasonal impacts may be more or less pronounced in the future or different altogether.

Security, Privacy, Data Protection and Regulatory Matters

We are subject to a number of U.S. federal and state and foreign laws and regulations that involve matters central to our business. These laws and regulations may involve privacy, data protection, security, rights of publicity, content regulation, intellectual property, use of AI, online safety, gambling, loot boxes, ratings, competition, protection of minors, including verified parental consent, consumer protection, communication, credit card processing, taxation, anti-bribery, anti-money laundering and corruption, economic or other trade prohibitions or sanctions or securities law compliance or other subjects. Many of these laws and regulations are still evolving and being tested in courts and could be interpreted and applied in a manner that is inconsistent from country to country or state to state and inconsistent with our current policies and practices and in ways that could harm our business. In addition, the application and interpretation of these laws and regulations often are uncertain, particularly in the new and rapidly evolving industry in which we operate. The costs of complying with these laws and regulations are high and likely to increase in the future, particularly as the degree of regulation increases, our business grows and our geographic scope expands. Further, the impact of these laws and regulations may disproportionately affect our business in comparison to our peers in the technology sector that have greater resources. Any failure on our part to comply with these laws and regulations may subject us to significant liabilities or penalties, or otherwise adversely affect our business, financial condition or operating results. It is imperative that we secure the creative assets, performance and user data that are critical to our business. We devote considerable resources to our security program with the intent to continually improve our services and how we securely store and separate user assets. Our intent is to make it easy for our developers and creators to securely build and distribute their content on our Platform.

We rely on a variety of statutory and common-law frameworks and defenses relevant to the content available on our service, including the Digital Millennium Copyright Act (“DMCA”), the Communications Decency Act, and the fair-use doctrine in the U.S., and the Digital Services Act in the European Union (“EU”). However, each of these statutes and regulations are subject to uncertain or evolving judicial interpretation, regulatory guidance and enforcement, and legislative amendments. In addition, pending or recently adopted legislation globally imposes additional obligations or liability on us associated with user behavior and content uploaded by users to our Platform, requires us to publish transparency reports, and requires us to carry out risk assessments and mitigate risks we identify. If the rules, doctrines or currently available defenses change, if international jurisdictions refuse to apply protections similar to those that are currently available, or if a court were to disagree with our application of those rules to our service, we could be required to expend significant resources to try to comply with the new rules or incur liability, and our business, revenue and financial results could be harmed.

We are also subject to U.S. federal and state and foreign laws and regulations regarding privacy and data protection, including with respect to the collection, storage, sharing, use, processing, transfer, disclosure, and protection of personal data. For example, the California Consumer Privacy Act (“CCPA”), went into effect on January 1, 2020. The CCPA requires covered companies to, among other things, provide new disclosures to California consumers, and afford such consumers new abilities to opt-out of the sale of personal information. Additionally, the California Privacy Rights Act (“CPRA”) became effective on January 1, 2023. The CPRA significantly modifies the CCPA, potentially resulting in further uncertainty and requiring us to incur additional costs and expenses in an effort to comply. Similar legislation has been proposed or adopted in other states. Aspects of the CCPA and these other state laws and regulations, as well as their enforcement, remain unclear, and we may be required to modify our practices in an effort to comply with them. California has also enacted the California Age-Appropriate Design Code Act (“ADCA”), which originally was scheduled to take effect on July 1, 2024. The ADCA would have implemented into law certain principles taken from the U.K.’s Age Appropriate Design Code (“AADC”), which went into effect in September 2021, and imposed substantial new obligations upon companies that offer online services, products, or features “likely to be accessed” by children, defined under the ADCA as anyone under 18 years of age. Due to legal challenges, the ADCA has not yet gone into effect.

In addition, foreign data protection, privacy, consumer protection, communication, content regulation, and other laws and regulations may be more restrictive and burdensome. For example, GDPR imposes stringent operational requirements for entities processing personal information and significant penalties for non-compliance. Under GDPR, fines up to 20 million Euros or up to 4% of the annual global revenues of the infringer, whichever is greater, can be imposed for violations. In addition, the EU’s Digital Services Act (“DSA”), which became fully applicable on February 17, 2024 imposes new content moderation obligations, notice and transparency obligations, advertising restrictions and other requirements on digital platforms to protect consumers and their rights online. Noncompliance with the DSA could result in fines of up to 6% of annual global revenues, which are in addition to the ability of civil society organizations and non-governmental organizations to lodge class action lawsuits. The United Kingdom’s Online Safety Act (“OSA”) was enacted in October 2023 and will gradually be fully implemented as Ofcom publishes its guidance and codes of practice with the first set of obligations in force in March 2025. The OSA introduces, among other things, duties to protect children online, complete risk assessments, and remove illegal content. Noncompliance with the OSA could lead to investigations and other proceedings, substantial fines of up to £18 million or 10% of global revenues of the previous year and possible criminal liability on senior managers and company officers, and the imposition of business disruption measures such as access restriction orders. The evolving regulatory landscape internationally results in uncertainty and could require us to incur additional costs and expenses to comply.

Children’s privacy and online safety has also been a focus of recent enforcement activity and subjects our business to potential liability that could adversely affect our business, financial condition or operating results. The Federal Trade Commission and state attorneys general in the U.S. have in recent years increased enforcement of relevant legal frameworks, including COPPA, which requires companies to obtain parental consent before collecting personal information from children under the age of 13. The FTC released final amendments to its Children’s Online Privacy Protection Rule (“COPPA Rule”) on January 16, 2025, that, among other things, expand the scope of covered information, provide for revised notices, and impose new data retention and information security obligations. Following an executive order that froze all then-pending federal regulations as of January 20, 2025, the amended COPPA Rule is pending further review and may be subject to additional modifications. In addition, GDPR prohibits certain processing of personal information of children under the age of 13-16 (depending on the country) without parental consent. The CCPA requires companies to obtain the consent of children in California under the age of 16 (or parental consent for children under the age of 13) before selling their personal information. Also, actual or perceived noncompliance with the AADC may result in audits or other proceedings by the United Kingdom’s Information Commissioner Office, the body set up to uphold information rights in the United Kingdom, and other regulators in the EEA or Switzerland, as noncompliance with the AADC may indicate noncompliance with applicable data protection law. Although we take reasonable efforts to comply with these laws and regulations, we may in the future face claims under COPPA, the GDPR, the CCPA, the ADCA, the AADC, DSA and OSA or other laws or actual or asserted obligations relating to children’s privacy. There are also a number of legislative proposals pending before the U.S. Congress, various state legislative bodies and foreign governments concerning content regulation and data protection that could affect us if enacted in the future.

We take a variety of technical and organizational security measures and other measures designed to protect our data, including data pertaining to our users, employees and business partners. Despite measures we put in place, we may be unable to anticipate or prevent unauthorized access to such data.

Non-compliance with any applicable laws and regulations could result in penalties or significant legal liability. Although we take reasonable efforts to comply with applicable laws and regulations, there can be no assurance that we will not be subject to regulatory action, including fines, in the event of an incident or as the result of a regulatory investigation. We or our third-party service providers could be adversely affected if legislation or regulations are expanded to require changes in our or our third-party service providers' business practices or if governing jurisdictions interpret or implement their legislation or regulations in ways that negatively affect our or our third-party service providers' business, results of operations, or financial condition.

Government authorities outside the U.S. may also seek to restrict access to or block our Platform, prohibit or block the hosting of certain content available through our Platform or impose other restrictions that may affect the accessibility or usability of our Platform in that country for a period of time or even indefinitely. In addition, some countries have enacted laws that allow websites to be blocked for hosting certain types of content or may require websites to remove certain restricted content. Our privacy policy and terms and conditions of use describe our practices concerning, the use, transmission, and disclosure of user information and are posted on our website.

For additional information, please see the sections titled "Risk Factors—Risks Related to Our Business—If the security of our Platform is compromised, it could compromise our and our developers', creators', and users' private information, disrupt our internal operations, and harm public perception of our Platform, which could cause our business and reputation to suffer," "Risk Factors—Risks Related to Our Business—Some developers, creators, and users on our Platform may make unauthorized, fraudulent, or illegal use of Robux and other digital goods or experiences on our Platform, including through unauthorized third-party websites or "cheating" programs," and "Risk Factors—Risks Related to Government Regulations—Because we store, process, and use data, some of which contains personal information, we are subject to complex and evolving federal, state, and international laws and regulations regarding privacy, cybersecurity, data protection, and other matters. Many of these laws and regulations are subject to change and uncertain interpretation, and could result in investigations, claims, changes to our business practices, increased cost of operations, and declines in user growth, retention, or engagement, any of which could significantly harm our business."

Intellectual Property

Our intellectual property is an important aspect of our business, and our success depends in part on our ability to enforce and defend our intellectual property rights. We rely on a combination of patents, copyrights, trademarks, trade secrets, know-how, license agreements, contractual provisions, non-disclosure agreements, and confidentiality procedures to establish and protect our intellectual property rights. In addition to the protection provided by our intellectual property rights, we maintain a policy requiring our employees, consultants, and other third parties to enter into confidentiality and proprietary rights agreements to control access to our intellectual property.

As of December 31, 2024, we owned more than 180 U.S. patents relating to aspects of our actual or contemplated operations and technologies. Our issued patents are scheduled to expire between 2025 and 2043. We also had more than 260 pending patent applications in the U.S. and abroad. There can be no assurance that each of our patent applications will result in the issuance of a patent. In addition, any resulting issued patents may have claims narrower than those in our patent applications. We seek to protect our proprietary inventions relevant to our business through patent protection; however, we are not dependent on any particular patent or application for the operation of our business.

We have registered "Roblox," "Robux," and our corporate logo as trademarks in the U.S. and other jurisdictions. In total (including our subsidiary entities), we are the owner of over 460 trademark filings and have over 20 trademark applications in the U.S. and foreign countries as of December 31, 2024. There can be no assurance that each of our trademark applications will result in the issuance of a trademark or that each resulting trademark registration will be able to be maintained. As of December 31, 2024, we were the registered holder of over 790 domestic and international domain names. We continually monitor the registration of our domain names, trademarks, and service marks in the U.S. and in certain locations outside the U.S.

Despite our efforts, we may not be able to obtain or maintain sufficient protection for or successfully enforce our intellectual property. Any current and future patents, trademarks and other intellectual property or other proprietary rights we own or license, or otherwise have a right to use, may be contested, circumvented or found unenforceable or invalid. Our existing and future patents, copyrights, trademarks, trade secrets, domain names and other intellectual property rights may not provide us with competitive advantages, distinguish our products from those of our competitors or prevent competitors from launching comparable products. We may also be dependent on third-party content, technology and intellectual property in connection with our business. Further, we may not be able to prevent third parties from infringing, diluting or otherwise misappropriating or violating our intellectual property rights, and we may face challenges to the validity or enforceability of our intellectual property rights. We cannot guarantee that our business does not and will not infringe or misappropriate the rights of third parties. We expect to continue to face allegations from third parties, including our competitors and “non-practicing entities,” that we have infringed or otherwise violated their intellectual property rights. While we do not anticipate that these allegations, if they were to result in litigation against us, would have a materially adverse impact on our business, financial condition or operating results, there can be no guarantee that such lawsuits would not have a materially adverse impact on us. Further, certain federal statutes in the U.S. may apply to us with respect to various activities of our users, including the DMCA, provide immunity from monetary damages for online service providers such as us from, among other things, infringing content uploaded to our Platform by our users provided we comply with certain statutory requirements. The immunity is part of a statutory safe harbor. To enjoy the benefits of the safe harbor and be immune from monetary damages for infringing content uploaded by our users, we have to register a designated agent with the U.S. Copyright Office and maintain that filing on a periodic basis with the U.S. Copyright Office. We must also expeditiously remove any infringing content upon acquiring actual knowledge of such infringement or, in the absence of actual knowledge, if we become aware of facts or circumstances from which infringing activity is apparent. We must also adopt, reasonably implement, and inform users of our Platform about a policy that provides for the termination in appropriate circumstances of users who are repeat infringers of the copyrights of third parties. If we fail to comply with the conditions for qualifying for safe harbor protection, we may be subject to monetary damages for infringing content on our Platform. The damages for copyright infringement can range from \$750 to \$30,000 per work infringed and, in the case of willful infringement, up to \$150,000 per work infringed. Alternatively, copyright owners could seek to recover their actual damages and our profits. As we host millions of user uploaded works, we could be subject to significant damages claims if we are determined not to comply with the DMCA safe harbors. Intellectual property disputes are common in our sector, and, as we face increasing competition or grow our business, there is an ongoing risk that we may become involved in legal disputes involving intellectual property claims. In addition to the protection provided by our intellectual property rights, we maintain a policy requiring our employees, consultants, and other third parties to enter into confidentiality and proprietary rights agreements to control access to our intellectual property.

For additional information on risks relating to intellectual property, please see the sections titled “Risk Factors—Risks Related to Intellectual Property—Claims by others that we infringe their proprietary technology or other rights, the activities of our users, or the content of the experiences on our Platform could subject us to liability and harm our business,” “Risk Factors—Risks Related to Intellectual Property—Failure to protect or enforce our intellectual property rights or the costs involved in such enforcement would harm our business,” and “Risk Factors—Risks Related to Intellectual Property—We use open source software as part of, and in connection with certain experiences on, our Platform, which may pose particular intellectual property and security risks to and could have a negative impact on our business.”

Human Capital

As of December 31, 2024, we employed 2,474 full time employees. In addition, we had thousands of trust & safety agents across the globe. In order to continue to evolve the Roblox Platform, we must continue to invest in attracting and retaining key talent, especially those focused on product and engineering. We monitor our progress with human capital metrics such as turnover, time to fill open roles, ratio of internally developed talent to external hires, ratio of technical talent to overall employees, and employee engagement. Our brand, market position, reputation for innovation, and developer and creator-centric culture support our ability to recruit best-in-class engineering talent. As of December 31, 2024, we had over 1,800 employees in product and engineering functions, accounting for approximately 77% of our total full time employees, and over 100 of our full time employees were located outside of the U.S.

We completed the Company’s return-to-office (“RTO”) plan in the summer of 2024, which required a subset of the Company’s remote employees to begin working from our San Mateo headquarters for three days a week in an effort to further promote engaging, collaborative, and productive team environments.

We have embraced four core values since we founded Roblox and focus on incorporating them into our daily actions:

- **Respect the Community.** We consider our impact on the world, strive to respect everyone’s best interests, and communicate authentically. We prioritize community before company, company before team, and team before individual.
- **We are Responsible.** We are responsible for both the intended and unintended consequences of our actions.

- **Take the Long View.** We set a long term vision, even when making short term decisions. Challenge the status quo, think big, and look for innovation in whatever we do.
- **Get Stuff Done.** We drive execution by taking initiative and relentlessly iterating towards the long term goal.

To help focus our core values and to promote and support fairness, belonging and diversity, we have established several affinity groups. Our affinity groups are inclusive, voluntary, and employee-led whose aim is to promote inclusion at the Company and allow networking, mentorships, and other opportunities for professional and personal development. They include groups for women, racial and ethnic minorities, and people who identify as LGBTQIA+.

Corporate Information

We were incorporated in 2004. Our principal executive offices are located at 3150 South Delaware Street, San Mateo, California 94403, and our telephone number is (888) 858-2569. Our website address is www.corp.roblox.com. Information contained on, or that can be accessed through, our website is not incorporated by reference into this Annual Report on Form 10-K. “Roblox,” “Robux,” our logo and our other registered or common law trademarks, service marks or trade names appearing in this Annual Report on Form 10-K are the property of Roblox Corporation. Other trademarks and trade names referred to in this Annual Report on Form 10-K are the property of their respective owners. Solely for convenience, trademarks and trade names referred to in this Annual Report on Form 10-K, including logos, artwork and other visual displays, may appear without a trademark symbol, but such references are not intended to indicate in any way that we will not assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensor to these trademarks and trade names. We do not intend our use or display of other entities’ trade names, trademarks or service marks to imply a relationship with, or endorsement or sponsorship of us by, any other entity.

Available Information

We file electronically with the U.S. Securities and Exchange Commission (“SEC”), our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act. We make available on our website at ir.roblox.com, free of charge, copies of these reports and other information as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

Investors, the media and others should note that we intend to announce material information to the public through filings with the SEC, the investor relations page on our website, at www.ir.roblox.com, press releases, public conference calls and webcasts. We use these channels, as well as social media, our blog at <https://blog.roblox.com/> and our Creator Hub page at <https://create.roblox.com/docs>, including our Developer Forum at <https://devforum.roblox.com/>, to communicate with our developers and creators, users, and the public about our company, our Platform and other issues, and the information disclosed by the foregoing channels could be deemed to be material information. As such, we encourage investors, the media and others to follow the channels listed above and to review the information disclosed through such channels. However, information contained on, or that can be accessed through, these channels does not constitute a part of this prospectus and is not incorporated by reference herein. Any updates to the list of disclosure channels through which we will announce information will be posted on the investor relations page on our website.

Item 1A. Risk Factors

RISK FACTORS

A description of the risks and uncertainties associated with our business is set forth below. You should carefully consider the risks described below, as well as the other information in this Annual Report on Form 10-K, including our consolidated financial statements and "Management's Discussion and Analysis of Financial Condition and Results of Operations." The occurrence of any of the events or developments described below could materially and adversely affect our business, financial condition, results of operations, and growth prospects. In such an event, the market price of our Class A common stock could decline, and you may lose all or part of your investment. Additional risks and uncertainties not presently known to us or that we currently believe are not material may also impair our business, financial condition, results of operations, and growth prospects.

Risk Factors Summary

Below is a summary of the principal factors that make an investment in our Class A common stock speculative or risky:

- We have a history of net losses and we may not be able to achieve or maintain profitability in the future.
- Our business is affected by seasonal demands, and our financial condition and results of operations will fluctuate from quarter to quarter, which makes our financial results difficult to predict and may not fully reflect our underlying performance.
- If our business becomes constrained by changing legal and regulatory requirements, including with respect to online safety, privacy, cybersecurity and data protection, AI, online platform liability, communication, verifiable parental consent and user-generated content, or enforcement by government regulators, including fines, orders, or consent decrees in the US or other jurisdictions in which we operate, our operating results will suffer.
- We experienced rapid growth in prior periods and our prior growth may not be indicative of our future growth or the growth of our market.
- We depend on effectively operating with third-party operating systems, hardware, and networks that we do not control; changes to any of these or our Platform may significantly harm our user retention, growth, engagement, and monetization, or require us to change our data collection and privacy, cybersecurity, and data protection practices, business models, operations, practices, advertising activities or application content, which could restrict our ability to maintain our Platform through these systems, hardware, and networks and would adversely impact our business.
- The success of our business model is contingent upon our ability to provide a safe online environment for our users, many of whom are children, to experience and if we are not able to provide such an environment, our business will suffer dramatically.
- If we are not able to provide sufficiently reliable services to our developers, creators, and users and maintain the performance of our Platform in the event of outages, constraints, disruptions, degradations or regulatory actions in our services and our Platform, our business and reputation will suffer.
- If the security of our Platform is compromised, it could compromise our and our developers', creators', and users' private information, disrupt our internal operations and harm public perception of our Platform, which could cause our business and reputation to suffer.
- Because we recognize revenue from bookings over the estimated average lifetime of a paying user or as the virtual items are consumed, changes in our business may not be immediately reflected in our operating results.
- We may incur liability as a result of content published using our Platform or as a result of claims related to content generated by our developers, creators, and users, including copyright infringement, and legislation regulating content on our Platform may require us to change our Platform or business practices.
- We must continue to attract and retain highly qualified personnel in very competitive markets to support our growth, and the loss of one or more of the members of our senior management team or other key personnel (or the inability to attract senior management or other key personnel) could significantly harm our business.
- The public trading price of our Class A common stock is volatile and may decline.
- The dual class stock structure of our common stock has the effect of concentrating voting control in our Founder, which may limit or preclude your ability to influence corporate matters, including the election of directors and the approval of any change of control transaction.
- Securities or industry analysts or other third parties may publish inaccurate or unfavorable research about us, our business or our market which may cause the market price and trading volume of our Class A common stock to decline.

Risks Related to Our Business

We have a history of net losses and we may not be able to achieve or maintain profitability in the future.

We have incurred net losses since our inception, and we expect to continue to incur net losses in the foreseeable future. We incurred net losses attributable to common stockholders of \$935.4 million, \$1,151.9 million and \$924.4 million for the years ended December 31, 2024, 2023, and 2022, respectively. As of December 31, 2024, we had an accumulated deficit of \$3,995.6 million. We also expect our operating expenses to continue to increase, and if our growth does not increase to offset these anticipated increases in our operating expenses, our business, results of operations, and financial condition will be harmed, and we may not be able to achieve or maintain profitability. We expect our costs and investments to continue to increase in future periods as we intend to continue to make investments to grow our business, including an expected increase in infrastructure and stock-based compensation expenses. These efforts may be more costly than we expect and may not result in increased revenue or growth of our business. In addition to the expected costs to grow our business, we have incurred and expect to continue to incur significant additional legal, accounting, and other expenses as a public company. Compliance with these rules and regulations continues to increase our legal and financial compliance costs and demand on our systems, and requires significant attention from our senior management that could divert their attention away from the day-to-day management of our business. If we fail to increase our revenue to sufficiently offset the increases in our operating expenses, we will not be able to achieve or maintain profitability in the future.

Our business is affected by seasonal demands, and our financial condition and results of operations will fluctuate from quarter to quarter, which makes our financial results difficult to predict and may not fully reflect our underlying performance.

Historically, our business has been highly seasonal, with the highest percentage of our bookings occurring in the fourth quarter when holidays permit our users to spend increased time on our Platform and lead to increased spend on pre-paid Robux gift cards, and we expect this trend to continue. We also typically see higher levels of engagement in the months of June, July, and August, which are summer periods in the northern hemisphere, and lower levels of engagement in the post-summer months of September, October, and November. Other periods of seasonality include holidays such as Lunar New Year, Easter, and Ramadan, each of which may differ in timing year over year and therefore have impacted and may continue to impact our quarterly results. We may also experience fluctuations due to factors that may be outside of our control that affect user, developer, or creator engagement with our Platform.

Accordingly, our quarterly results of operations have fluctuated in the past and will fluctuate in the future, both based on the seasonality of our business as well as external factors impacting the global economy, our industry and our company. Our results of operations and financial condition in any given quarter can be influenced by numerous factors, many of which we are unable to predict or are outside of our control, including, but not limited to: our ability to maintain and grow our user base, user engagement, developer base and developer engagement; the level of demand for our Platform; the ability of our developers to monetize their experiences; increased competition; our pricing model including any discounts that we offer; the maturation of our business; our ability to introduce new revenue streams such as advertising; legislative or regulatory changes; macroeconomic conditions, such as high inflation, recessionary or uncertain environments, and fluctuating foreign currency exchange rates; our ability to maintain operating margins, cash used in operating activities, and free cash flow; system failures or actual or perceived breaches or other incidents relating to privacy or cybersecurity; adverse litigation judgments, settlements, or other litigation and dispute-related costs; adverse media coverage or unfavorable publicity; the effectiveness of our internal control over financial metric reporting; the amount and timing of our stock-based compensation expenses; changes in our effective tax rate; and changes in accounting standards, policies, guidance, interpretations, or principles. As a result, you should not rely on our past quarterly results of operations as indicators of future performance. You should take into account the risks and uncertainties frequently encountered by companies in rapidly evolving market segments.

We are subject to laws and regulations worldwide, many of which are unsettled and still developing, which could increase our costs or adversely affect our business, including preventing our ability to operate our Platform in certain jurisdictions.

As a global platform with users, developers and creators in over 170 countries, we are subject to a myriad of laws and regulations that affect our business, including but not limited to, laws and regulations regarding online gaming, online safety, online platform liability, content moderation, intellectual property ownership and infringement, consumer protection, protection of minors, including the use of verifiable parental consent, privacy, biometrics, cybersecurity, data protection and data localization requirements, the use of prepaid cards, subscriptions, advertising, electronic marketing, AI, anti-competition, freedom of speech, labor, real estate, taxation, escheatment, export and national security, tariffs, anti-corruption, campaign finance, gambling, loot boxes, ratings and telecommunications, all of which are continuously evolving and developing. We have policies and procedures designed to promote compliance with applicable laws and regulations, but we cannot assure you that we will not experience violations of such laws and regulations or our policies and procedures.

The widespread availability of 3D user-generated content online is relatively new, and the regulatory framework is new and continuously evolving with increased legislative initiatives and agency focus on areas including the protection of minors online and users' personal information, among other areas. The scope and interpretation of these laws and regulations that are or may be applicable to us, are often uncertain and may be conflicting from jurisdiction to jurisdiction and compliance with laws, regulations and similar requirements may be burdensome and expensive. Moreover, in some cases these new regulations can be enforced by private parties in addition to governmental agencies.

There are a suite of global laws focusing on the area of online safety and content moderation, including notice and transparency obligations. The United Kingdom's Online Safety Act ("OSA") will gradually be fully implemented as the Office of Communications ("Ofcom") publishes its guidance and codes of practice with the first set of obligations in force in March 2025. The OSA introduces, among other things, duties to protect children and other users online, complete risk assessments, and remove illegal content. Noncompliance with the OSA could lead to investigations and other proceedings, substantial fines of up to £18 million or 10% of the prior year's global revenues and possible imposition of criminal liability on senior managers and company officers, and the imposition of business disruption measures such as access restriction orders. The EU's Digital Services Act ("DSA") imposes new content moderation obligations, notice and transparency obligations, advertising restrictions and other requirements on digital platforms to protect consumers and their rights online. Noncompliance with the DSA could result in fines of up to 6% of annual global revenues, which are in addition to the ability of civil society organizations and non-governmental organizations to commence class action lawsuits. Australia's Online Safety Act of 2021 has recently been amended to require certain social media platforms, which may include our Platform, take reasonable steps by the end of 2025 to prevent Australians under the age of 16 from having accounts.

Additionally, we are subject to regulations with respect to advertising, in particular, advertising to minors, and advertising regulations could differ based on the jurisdiction of a user. For example, in the U.S. the Federal Trade Commission ("FTC") and other regulators restrict deceptive or unfair commercial activities, including in relation to targeted advertising and advertising to minors. As we evolve our advertising products, we may not be able to implement an advertising model that is compliant with regulations in all jurisdictions in which we operate, and advertising regulations could differ based on the jurisdiction of our users.

In the U.S. we are subject to both federal and state legislative initiatives and regulations, such as the proposed Kids Online Safety Act and various state safety regulations, which have and may continue to vary significantly. For example, in 2024 the State of Texas enacted new restrictions on purchasing by minors, including requiring verified parental consent for minors to purchase digital items, including on our Platform. These additional restrictions will likely have an adverse impact on our revenue and bookings from users in Texas in the near term.

In addition, there are ongoing academic, political, and regulatory discussions in the U.S., Canada, European Union, United Kingdom, Australia and other jurisdictions regarding whether certain mechanisms that may be included in experiences on our Platform, such as features commonly referred to as "loot boxes," and certain genres of experiences, such as social casino, that may reward gambling-like behavior, should be subject to a higher level or different type of regulation than other genres of experiences to protect consumers, in particular minors and persons susceptible to addiction, and, if so, what such regulation should include. In some countries such as Belgium and the Netherlands, "loot box" mechanics may be considered gambling, and are restricted as a result. In Australia gaming content containing "loot boxes" requires a mature age rating (age 15+). Other jurisdictions are considering similar limitations or bans on "loot boxes."

Governmental agencies in any of the countries in which we, our users, developers, or creators are located from time to time have sought and continue to seek to and could in the future seek to impose restrictions on our Platform, our website, operating system platforms, application stores or the internet generally. Compliance with these existing and new regulations, uncertainty over changes in laws and regulations, uncertainty over the scope and interpretation of laws and regulations that may be applicable to us, and conflicting laws and obligations, have led to, and will continue to lead to increases in the cost of compliance, moderation and doing business and exposes us to possible litigation, fines or other injunctive and monetary penalties. We have been required to and could in the future be required to modify or remove certain content in the experiences on our Platform, change the default settings of our Platform, and modify or disable certain features on our Platform in various jurisdictions. These requirements may impact user engagement, the functionality and effectiveness of our Platform, our ability to operate across demographics and geographies, our developer's ability to monetize their experiences in some geographies and reduce the overall use or demand for our Platform, which would harm our business, financial condition, and results of operations. We have been required to and could in the future be required to change our business model for specific jurisdictions or subsets of our users, take on more onerous obligations, including, but not limited to, applying for government-issued licenses to operate, establishing a local presence in certain jurisdictions, developing localized product offerings, and storing user information on servers in a country within which we operate. The costs of compliance with, and other burdens imposed by, these laws, regulations, standards, and obligations, could be prohibitively expensive. Requirements to change age ratings of our Platform or of specific content on our Platform may make our Platform less attractive for the younger users and harm our business, financial condition and results of operations. Furthermore, any inability to adequately address these burdens, has led to, and in the future could lead to suspension of our Platform in certain jurisdictions. Restrictions on our ability to offer our Platform or on users' ability to engage with others on our Platform may have a significant adverse impact on the revenue and bookings that we derive from those jurisdictions, which could materially adversely affect our operating results and our business. We may be required to expend substantial resources or to modify our Platform substantially to comply with evolving laws and regulations, which would harm our business, financial condition and results of operations. In addition, the increased attention upon liability issues as a result of lawsuits and legislative proposals could harm our reputation or otherwise impact the growth of our business.

Moreover, the adoption of any laws or regulations adversely affecting the growth, popularity or use of the internet, including laws impacting Internet neutrality, could decrease the demand for our Platform and increase our operating costs. The legislative and regulatory landscape regarding the regulation of the internet and, in particular, internet neutrality, in the U.S and internationally is subject to uncertainty. Users generally need to access the internet, including in geographically diverse areas, and also mobile platforms such as the Apple App Store and the Google Play Store, to engage with experiences on our Platform. If governmental or other entities block, limit or otherwise restrict developers, creators, and users from accessing our Platform, or users from engaging with experiences on our Platform, we may need to take on more onerous obligations, limit the functionality of our Platform, and/or establish certain local entities, each of which could adversely affect our results of operations or subject us to additional fines and penalties.

We experienced rapid growth in prior periods, and our prior growth rates may not be indicative of our future growth or the growth of our market.

We experienced rapid growth in prior periods relative to our quarterly forecast and historic trends, which may not be indicative of our financial and operating results in future periods. The activity levels experienced in prior periods were attributed in part to the impact of the COVID-19 lockdowns in 2020 and 2022, which led to increased demand for our business, were not sustainable, and our growth rates have moderated in most markets. The long-term impact to our business, operations, and financial results will depend on numerous evolving factors that we may not be able to accurately predict. For example, our bookings increased 171% from the year ended December 31, 2019 to the year ended December 31, 2020, while our bookings increased 24% from the year ended December 31, 2023 to the year ended December 31, 2024. Our revenue, bookings, and user base growth rates have slowed and may continue to slow, and we may not experience any growth in bookings or our user base during periods where we are comparing against historical periods. We believe our overall market acceptance, revenue growth, and increases in bookings depend on a number of factors, some of which are not within our control. There can be no assurance that users will not reduce their usage or engagement with our Platform or reduce their discretionary spending on our Platform, which would adversely impact our revenue and financial condition. If we are unable to continue to maintain the attractiveness of our Platform to developers, creators, and users, they may no longer seek new experiences in our Platform, which would result in decreased market acceptance, fewer bookings, and lower revenue and could harm our operations.

We depend on effectively operating with third-party operating systems, hardware, and networks that may make changes affecting our operating costs, as well as our ability to maintain our Platform which would hurt our ability to operate our business.

For the year ended December 31, 2024, 30% of our revenue was attributable to Robux sales through the Apple App Store and 16% of our revenue was attributable to Robux sales through the Google Play Store. Because of the significant use of our Platform on mobile devices, our application must remain interoperable with these and other popular mobile app stores and platforms, and related hardware. We are subject to the standard policies and terms of service of these operating systems, as well as policies and terms of service of the various software application stores that make our application and experiences available to our developers, creators, and users. These policies and terms of service govern the availability, promotion, distribution, content, and operation of applications and experiences on such operating systems and stores. Each provider of these operating systems and stores has broad discretion to change and interpret its terms of service and policies with respect to our Platform and those changes may be unfavorable to us and our developers', creators', and users' use of our Platform. If an operating system provider or application store limits or discontinues access to, or changes the terms governing, its operating system or store for any reason, it could adversely affect our business, financial condition, or results of operations.

Additionally, an operating system provider or application store could also limit or discontinue our access to its operating system or store if it establishes more favorable relationships with one or more of our competitors, launches a competing product itself, or it otherwise determines that it is in its business interests to do so. If competitors control the operating systems and related hardware our application runs on, they could make interoperability of our Platform more difficult or display their competitive offerings more prominently than ours. There is no guarantee that new devices, platforms, systems and software application stores will continue to support our Platform or that we will be able to maintain the same level of service on these new systems. If it becomes more difficult for our users, developers or creators to access and engage with our Platform, our business and user retention, growth, and engagement could be significantly harmed.

Similarly, at any time, our operating system providers or application stores can change their policies on how we operate on their operating system or in their application stores by, for example, applying content moderation for applications and advertising or imposing technical or code requirements. These actions by operating system providers or application stores may affect our ability to collect, process, and use data as desired and could negatively impact our ability to leverage data about the experiences our developers create which in turn could impact our resource planning and feature development planning for our Platform.

We rely on third-party distribution channels and third-party payment processors to facilitate purchases by our Platform users. If we are unable to maintain a good relationship with such providers, if their terms and conditions change, or fail to process or ensure the safety of users' payments, our business will suffer.

Purchases of Robux and other products (e.g., prepaid gift cards) or services on our Platform are facilitated through third-party online distribution channels and third-party payment processors. We utilize these distribution channels, such as Amazon, Apple, Blackhawk, ePay, Google, Incomm, PayPal, Stripe, Microsoft, Sony's PlayStation Network and Xsolla, to receive cash proceeds from purchases of Robux. For our experiences accessed through mobile platforms such as the Apple App Store and the Google Play Store and consoles, we are required to share a portion of the proceeds from in-game sales with the platform and console providers. For operations through the Apple App Store and Google Play Store, we are obligated to pay up to 30% of any money paid by users on our Platform to Apple and Google and this amount could increase. For operations through console providers, such as Microsoft Xbox and Sony PlayStation, we are obligated to pay around 30% of any money paid by users on our Platform, and these amounts could also increase. These costs are expected to remain a significant operating expense for the foreseeable future. If the amount these platform providers charge increases, it could have a material impact on our ability to pay developers and our results of operations. Each provider of an operating system, application store or console may also change its fee structure or add fees associated with access to and use of its operating system, which could have an adverse impact on our business. There has been litigation, as well as governmental inquiries over application store fees, and Apple or Google could modify their platform in response to such litigation and inquiries in a manner that may harm us. Any scheduled or unscheduled interruption in the ability of our users to transact with these distribution channels could adversely affect our payment collection and, in turn, our revenue and bookings.

Additionally, we do not directly process purchases made on our Platform or the exchange of earned Robux for fiat currency through our Developer Exchange Program. Information on those purchases or exchanges (e.g., debit and credit card numbers and expiration dates, personal information, and billing addresses) is disclosed to the third-party online platform and service providers facilitating purchases or exchanges of Robux for fiat currency by users (such as Stripe, Xsolla, and Tipalti). We do not have control over the security measures of those providers, and their security measures may not be adequate. We could be exposed to litigation and possible liability if our users' (including our developers') transaction information involving their purchases or exchanges for fiat currency are compromised, which could harm our reputation and our ability to attract users and may materially adversely affect our business.

We also rely on the stability of such distribution channels and their payment transmissions, and third-party payment processors for the continued payment services provided to our users. If any of these providers fail to process or ensure the security of users' payments for any reason, our reputation may be damaged and we may lose our paying users and developers interested in our Developer Exchange Program, developers may be discouraged from creating on our Platform, and users may be discouraged from making purchases on our Platform in the future, which, in turn, would materially and adversely affect our business, financial condition, and prospects.

In addition, from time to time, we or our partners encounter fraudulent use of payment methods, which could impact our results of operations and if not adequately controlled and managed could create negative consumer perceptions of our Platform services. If we are unable to maintain our fraud and chargeback rate at acceptable levels, card networks may impose fines, our users' card approval rate may be impacted and we may be subject to additional card authentication requirements. The termination of our ability to process payments on any major payment method would significantly impair our ability to operate our business. Further, the Consumer Financial Protection Bureau ("CFPB") has issued a regulation to exercise authority to conduct supervisory examinations over large nonbank technology companies offering digital funds transfer and payment wallet apps. Accordingly, the third-party online distribution channels and third-party payment processors on which we rely, to the extent they are covered by the CFPB's regulation, may face external pressures that could impose additional compliance costs, impact their ability to offer digital payment services, and affect our relationships with them over time or have other adverse impacts upon our business and our ability to serve users and developers.

The success of our business model is contingent upon maintaining a strong reputation and brand, including our ability to provide a safe online environment for our users, many of whom are children, to experience, and if we are not able to provide such an environment, our business will suffer dramatically.

Our Platform hosts a number of experiences intended for audiences of varying ages, a significant percentage of which are designed to be experienced by children. As a user-generated content platform, it is relatively easy for developers, creators, and users to upload content that can be viewed broadly. We continue to make significant efforts to provide a safe, civil and enjoyable experience for users of all ages. Although illicit activities are in violation of our terms and policies, and we attempt to block objectionable material and ban bad actors from our Platform, we are unable to prevent all such violations from occurring and banned actors have, at times, been able to evade our detection systems and regain access to our Platform through alternative accounts.

We invest significant technical and human resources to prevent inappropriate content on our Platform by using a range of tools and policies, including several designed to review all images, audio, and video at the time of upload in order to block inappropriate content before users have a chance to encounter it on our Platform. Notwithstanding our efforts, from time to time, inappropriate content is successfully uploaded onto our Platform and can be viewed by others prior to being identified and removed by us. Additionally, in some of our experiences users are able to generate in-experience content which may not be detectable by our automated moderation systems.

Moreover, measures intended to make our Platform more attractive to an older, age verified audience, such as less highly moderated or unmoderated chat and the introduction of experiences with mature content, and new methods of communication could fail to gain sufficient market acceptance by its intended audience and may create the perception that our Platform is not safe for younger users. This in turn has caused and may continue to cause some operating system providers, application stores, or regulatory agencies to require a higher age rating for our Platform, which could cause us to become less available to younger users and harm our business, financial condition, and results of operations. For example, USK, who are responsible for game ratings in Germany, increased our age rating from USK12 to USK16 in January 2025. We have at times experienced negative media coverage related to content that is age-restricted on our Platform but is mischaracterized in the media as being accessible to younger users and therefore has impacted our reputation as a safe online environment for children. At times, content that is age-restricted, but not violative of our terms for teenagers, may still be in poor taste or considered crude, and therefore lead to negative media attention.

Further, children may attempt to evade our age verification system, which could lead them to be exposed to inappropriate content or behavior by participating in experiences that are not age-appropriate or gaining access to features we have restricted to older users. While we have introduced Content Maturity Labels that enable users to make informed decisions about the experiences they interact with and we have introduced additional parental controls that help parents and caregivers manage their child's experience on our Platform, users from time to time, notwithstanding our efforts, have been able to evade our systems, and have been exposed to content that may not be age-appropriate. In addition, as more of our brand partners, developers, and creators offer physical products for sale through our Platform, younger users may be able to purchase products that may not be age-appropriate. Unintentional access to content or physical products could cause harm to our audience and to our reputation of providing a safe environment for younger users. If we are unable to sufficiently limit, or are perceived as not being able to sufficiently limit, all or substantially all age-inappropriate content and physical products to only users who have been verified as being the appropriate age for such content or goods, then parents and children could lose their trust in the safety of our Platform, which would harm our overall acceptance by these audiences and would likely result in significantly reduced revenue, bookings, profitability, and ultimately, our ability to continue to successfully operate our Platform.

In addition to limiting content to age-appropriate audiences and blocking other inappropriate content, we have statutory obligations under U.S. federal law to block or remove child pornography and report apparent offenses to the National Center for Missing and Exploited Children. While we have dedicated technology and trained human moderator staff that can detect and remove sexual content involving children, there have been instances where such content has been uploaded, and any unforeseen future non-compliance by us or allegations of non-compliance by us with respect to U.S. federal laws on child pornography or the sexual exploitation of children could significantly harm our reputation, create criminal liability, and could be costly and time consuming to address or defend. We may also be subject to additional criminal liability related to child pornography or child sexual exploitation under other domestic and international laws and regulations.

We believe that maintaining, protecting, and enhancing our reputation and brand is critical to grow the number of developers, creators, and users on our Platform, especially given the safe and civil atmosphere that we strive to achieve for our users, many of whom are children. Maintaining, protecting, and enhancing our brand will depend largely on our ability to continue to provide reliable high-quality, engaging, and shared experiences on our Platform. If users, developers, or creators do not perceive our Platform to be reliable or of high quality, the value of our brand could diminish, thereby decreasing the attractiveness of our Platform. Further, we have faced and are currently defending allegations that our Platform has been used by criminal offenders to identify and communicate with children and to possibly entice them to interact off-Platform, outside of the restrictions of our moderated chat, content blockers, and other on-Platform safety measures. While we devote considerable resources to prevent this from occurring, we are unable to prevent all such interactions from taking place. We have also received and expect to continue to receive a high degree of media coverage alleging the use of our Platform for illicit or objectionable ends. For example, we have experienced negative media publicity from traditional media sources and self-described short seller investors, related to the age of some of our developers, the content that developers produce, our operating metrics and disclosures, the strength of our moderation practices, and the conduct of users on our Platform that may be deemed illicit, explicit, profane, or otherwise objectionable. Additional unfavorable publicity has covered our privacy, cybersecurity or data protection practices, terms of service, product changes, product quality, litigation or regulatory activity, our use of generative AI, the actions of our users, and the actions of our developers or creators whose products are integrated with our Platform.

Our reputation and brand could also be negatively affected by the actions of developers, contractors and users that are hostile, inappropriate, or illegal, whether on or off our Platform. Actual or perceived incidents or misuses of user data or other privacy or security incidents, the substance or enforcement of our community standards, the quality, integrity, characterization and age-appropriateness of content shared on our Platform, or the actions of other companies that provide similar services to ours, have and could adversely affect our reputation and lead to scrutiny and inquiries from governments and regulators. Any criminal incidents or allegations involving Roblox, whether or not we are directly responsible, could adversely affect our reputation as a safe place for children and hurt our business. Any negative publicity could create the perception that we do not provide a safe online environment and may have an adverse effect on the size, engagement, and loyalty of our developer, creator, and user community, which would adversely affect our business and financial results. Maintaining, protecting, and enhancing our reputation and brand may require us to make substantial investments, and these investments may not be successful.

If we fail to retain users or add new users, or if our users decrease their level of engagement with our Platform, revenue, bookings, and operating results will be harmed.

We view DAUs as a critical measure of our user engagement, and adding, maintaining, and engaging users has been and will continue to be necessary to our continued growth. Our DAU growth rate has fluctuated in the past and may slow in the future due to various factors including: the introduction of new or updated experiences or virtual items on our Platform; our ability to personalize and feature relevant experiences to our users; performance issues with our Platform; the removal of popular experiences or virtual items on our Platform including due to copyright or other legal violations that may or may not be within our control; the availability of our Platform across markets and user demographics, which may be impacted by regulatory or legal requirements, including the use of verifiable parental consent; changes to the default settings on our Platform overall or for specific user groups; higher market penetration rates and competition from a variety of entertainment sources for our users and their time. In addition, our strategy seeks to expand the age groups and geographic markets that make up our users. If and when we achieve maximum market penetration rates among any particular user cohort overall and in particular geographic markets, future growth in DAUs will need to come from other age or geographic cohorts, which may be difficult, costly, or time consuming for us to achieve. Accessibility to the internet and bandwidth or connectivity limitations as well as regulatory requirements, may also affect our ability to further expand our user base in a variety of geographies. If the growth rate in our key metrics such as DAUs or hours engaged slows or becomes stagnant, or we have a decline in one of our key metrics such as DAUs or hours engaged, or we fail to effectively monetize new or existing users, our financial performance could be significantly harmed.

Our business plan assumes that the demand for interactive entertainment offerings will increase for the foreseeable future. However, if this market shrinks or grows more slowly than anticipated or if demand for our Platform does not grow as quickly as we anticipate, whether as a result of competition, product obsolescence, budgetary constraints of our developers, creators, and users, technological changes, unfavorable economic conditions, uncertain geopolitical or regulatory environments or other factors, we may not be able to increase our revenue and bookings sufficiently to ever achieve profitability and our stock price would decline.

Moreover, a large number of our users are under the age of 13. This demographic may be less brand loyal and more likely to follow trends, including viral trends, than other demographics. These and other factors may lead users to switch to another entertainment option rapidly, which can interfere with our ability to forecast usage or DAUs and would negatively affect our user retention, growth, and engagement. We also may not be able to penetrate other demographics in a meaningful manner to compensate for the loss of DAUs in this age group. Falling user retention, growth, or engagement rates could seriously harm our business.

We depend on our developers to create digital content that our users find compelling, and if we fail to properly incentivize our developers and creators to develop and monetize content, our business will suffer.

Our Platform relies on our developers and creators to create experiences and virtual items on our Platform for our users, and we believe the interactions between and within the developer, creator, and user communities on our Platform create a thriving and organic ecosystem, and this network effect drives our growth. To facilitate and incentivize the creation of experiences and virtual items by developers, our Platform offers developers an opportunity to earn Robux, a virtual currency on our Platform, which, as described in our terms of use, is a license to engage in experiences and/or obtain virtual items. When virtual items are acquired on our Platform, the originating developer or creator earns a portion of the Robux paid for the item. Developers are able to exchange their accumulated earned Robux for fiat currency under certain conditions outlined in our Developer Exchange Program. In addition, we have paid access experiences where developers can offer access to their experiences to users for a set price in fiat currency and in exchange earn a higher revenue share of these user purchases. While we have millions of developers and creators on our Platform, 50% of in-experience hours engaged in experiences were spent in the top 50 experiences in the month ending December 31, 2024. We continuously review and revise our Platform policies to enhance regulatory compliance and the trust and safety of our Platform. Changes to our Platform policies may reduce the ability of developers to monetize their experience. The loss of any of our top developers could have a material impact on our business, financial condition, and operations. If we fail to provide a sufficient return to developers, they may elect to develop user-generated content on other platforms, which would result in a loss of revenue.

We spend substantial amounts of time and money to research, develop, and enhance versions of our Platform to incorporate additional features, improve functionality or other enhancements and prioritize user safety and security in order to meet the rapidly evolving demands of our developers, creators, and users. Developments and innovations on our Platform may rely on new or evolving technologies which may at times be still in development and may never be fully developed. Maintaining adequate research and development resources, such as the appropriate personnel and development technology, to meet the demands of the market is essential. Despite our efforts, users, developers, or creators may become dissatisfied with our Platform technology, billing or payment policies, our handling of personal data, or other aspects of our Platform. If we fail to adequately address these or other user, developer, or creator complaints, negative publicity about us or our Platform could diminish confidence in and the use of our Platform. If we do not provide the right technologies, education or financial incentives to our developers and creators, they may develop fewer experiences or virtual items or be unable to or choose not to monetize their experiences, and our users may elect to not participate in the experiences or acquire the virtual items, and, thus, our Platform, revenue, and bookings could be adversely affected. Additionally, if we fail to anticipate developers' and creators' needs, the quality of the content they create may not attract users to engage with experiences and result in a decline of users on our Platform. When we develop new or enhanced features for our Platform, we typically incur expenses and expend resources upfront to develop, market, promote, and sell new features, and we may not be able to realize some or all of the anticipated benefits of these investments.

If we experience outages, constraints, disruptions, or degradations in our services, Platform support and/or technological infrastructure, our ability to provide sufficiently reliable services to our customers and maintain the performance of our Platform could be negatively impacted, which could harm our relationships with our developers, creators, and users, and, consequently, our business.

Our users expect fast, reliable, and resilient systems to enhance their experience and support their activity on our Platform, which depends on the continuing operation and availability of our Platform from our global network of data centers controlled and operated by us and our external service providers, including third-party "cloud" computing services. We also provide services to our developer and creator community through our Platform, including DevForum and Creator Hub for tutorials, hosting, customer service, regulatory compliance, and translation, among many others. The experiences and technologies on our Platform are complex software products and maintaining the sophisticated internal and external technological infrastructure required to reliably deliver these experiences and technologies is expensive and complex. The reliable delivery and stability of our Platform has been, and could in the future be, adversely impacted by outages, disruptions, failures, or degradations in our network and related infrastructure or those of our partners or service providers, including those stemming from vulnerabilities in authentication mechanism, service spoofing, or the complexities of managing micro-systems architecture.

We have experienced outages from time to time since our inception when the Platform is unavailable for all or some of our users, developers, and creators, including in October 2024, May 2022, October 2021, and at other times during our history. In addition, there may be times when access to our Platform for users, developers, and creators may be temporarily unavailable or limited. This could be due to proactive actions we take while we provide critical updates or as an unexpected outcome of routine maintenance, which most recently occurred in July 2023. Outages can be caused by a number of factors, including a move to a new technology or security vulnerabilities in new or existing technologies, the demand on our Platform exceeding the capabilities of our technological infrastructure, delays or failures resulting from natural disasters, manmade disasters, or other catastrophic events, the migration of data among data centers and to third-party hosted environments, a cyber event or act of terrorism, and issues relating to our reliance on third-party software, third-party application stores, and third parties that host our Platform in areas where we do not operate our own data centers. The unavailability of our Platform, particularly if outages should become more frequent or longer in duration, could cause our users to seek other entertainment options, including those provided by our competitors, which may adversely affect our financial results. If we or our partners or third party service providers experience outages and our Platform is unavailable or if our developers, creators, and users are unable to access our Platform within a reasonable amount of time or at all, as a result of any such events, our reputation and brand may be harmed, developer, creator and user engagement with our Platform may be reduced, and our revenue, bookings and profitability could be, and has been in the past, negatively impacted. We may also experience a negative impact to our financial results as a result of decreased usage on our Platform or decrease of payouts to developers and creators. We may not have full redundancy for all of our systems at all times and our disaster recovery planning may not be sufficient to mitigate the risks posed by technological exploitation used by threat actors and to address all aspects of any consequence or incident or allow us to maintain business continuity at profitable levels or at all. Further, in the event of damage or service interruption, our business interruption insurance policies will not adequately compensate us for losses that we may incur. These factors in turn could further reduce our revenues, subject us to liability, or otherwise harm our business, financial condition, or results of operations.

In addition to the events described above, our data and our technological infrastructure may also be subject to government laws, administrative actions or regulations, changes to legal or permitting requirements, and litigation that could stop, limit, or delay operations. Despite a reliability program focused on anticipating and solving issues that may impact the availability of our Platform and precautions taken at our data centers, such as disaster recovery and business continuity arrangements, the occurrence of spikes in usage volume, the occurrence of a natural disaster, a cyber event or act of terrorism, a decision to close the facilities without adequate notice, our inability to secure additional or replacement data center capacity as needed, or other unanticipated problems at our data centers could result in interruptions or delays on our Platform, impede our ability to scale our operations or have other adverse impacts upon our business and adversely impact our ability to serve our developers, creators, and users.

Customer support personnel and technologies are critical to resolve issues and to allow developers, creators, and users to realize the full benefits that our Platform provides and provide an excellent customer experience. High-quality support is important for the retention of our existing developers, creators, and users and to encourage the expansion of their use of our Platform. We rely on third party service providers to assist in our customer support. Our third party providers, employees, developers or users have been and may in the future be a source of exploitation for bad actors to attempt to compromise our systems and information. If a threat actor is successful in using one or more of our third party service providers, employees, developers, or users to compromise our systems or personal information of our users, it could impact our business and results of operation as well as our reputation.

We must continue to invest in the infrastructure required to support our Platform. If we do not help our developers, creators, and users quickly resolve issues and provide effective ongoing support, our ability to maintain and expand our Platform to existing and new developers, creators, and users could suffer. In addition, if we do not make sufficient investments in servers, software or personnel in support of our infrastructure, to scale effectively and accommodate increased demands placed on our infrastructure, the reliability of our underlying infrastructure will be harmed and our ability to provide a quality experience for our developers, creators, and users will be significantly harmed. This would lead to a reduction in the number of developers, creators, and users on our Platform, a reduction in our revenues, bookings, and ability to compete, and our reputation with existing or potential developers, creators, or users could suffer.

The lack of comprehensive encryption for communications on our Platform may increase the impact of a security breach or incident.

Communications on our Platform are not comprehensively encrypted at this time. As such, any security breach or incident that involves unauthorized access, acquisition, disclosure, or use of communications on our Platform may be particularly impactful to our business. We may experience greater incident response forensics, data recovery, legal fees, and costs of notification related to any such potential incident or vulnerabilities, and we may face an increased risk of reputational harm, regulatory enforcement, and consumer litigation, which could further harm our business, financial condition, results of operations, and future business opportunities.

If the security of our Platform is compromised, it could compromise our and our developers', creators', and users' private information, disrupt our internal operations, and harm public perception of our Platform, which could cause our business and reputation to suffer.

We collect and store personal data and certain other sensitive and proprietary information in the operation of our business, including developer, creator, user and employee information, and other confidential data. While we have implemented measures designed to prevent unauthorized access to or loss of our confidential data, malware, ransomware, viruses, hacking, social engineering, spam, and phishing attacks across our organization, these types of attacks have occurred and may occur on our Platform, our systems, and those of our third-party service providers again in the future. Because of the popularity of our Platform, we believe that we are an attractive target for these sorts of attacks and have seen the frequency of these types of attacks increase over time.

The techniques used by malicious actors to obtain unauthorized access to, or to sabotage our systems or networks, or to utilize our systems maliciously, are constantly evolving and generally are not recognized in the industry until launched against a target. Despite the measures we have taken, we at times have not been able to anticipate these techniques, detect, or react in a timely manner, or implement preventive measures, which has resulted in and could continue to result in, delays in our detection or remediation of, or other responses to, security breaches and other security-related incidents. In addition, the use of open source software in our Platform has exposed us to security vulnerabilities in the past and will likely continue to expose us to security vulnerabilities in the future. For example, in December 2021, a vulnerability in popular logging software, Log4j, was publicly announced, and while we have taken steps to patch these and similar vulnerabilities in our systems, we cannot guarantee that all vulnerabilities have been patched in every system upon which we are dependent or that additional critical vulnerabilities of open source software which we rely upon will not be discovered. Our use of AI in our products and business practices may increase or create additional cybersecurity and privacy risks, including risks of security breaches and incidents.

Our Platform and services operate in conjunction with, and we are dependent upon, third-party products, services, and components. Our ability to monitor our third-party service providers' cybersecurity is limited, and in any event, attackers may be able to circumvent our third-party service providers' cybersecurity measures. There have been and may continue to be significant attacks on certain of our third-party providers, and we cannot guarantee that our or our third-party providers' systems and networks have not been breached or that they do not contain exploitable defects or bugs that could result in a breach of or disruption to our systems and networks or the systems and networks of third parties that support us and our Platform and service. Security vulnerabilities, errors, or other bugs in these third-party products, services, or components, and security exploits targeting them or even simply the allegation of a vulnerability or security exploit targeting one of these third-party products, services, or components, has at times and could continue to cause us to face increased costs, claims, liability, reduced revenue, and harm to our reputation or competitive position. We and our service providers may be unable to anticipate these techniques, react, remediate, or otherwise address any security vulnerability, breach, or other incident in a timely manner, or implement adequate preventative measures.

If any unauthorized access to our network, systems or data, including our sensitive and proprietary information, personal data from our users, developers, or creators, or other data, or any other loss or unavailability of, or unauthorized use, modification, disclosure, or other processing of personal data or any other security breach or incident, occurs or is believed to have occurred, whether as a result of third-party action, employee negligence, error or malfeasance, defects, social engineering techniques, ransomware attacks, or otherwise, our reputation, brand and competitive position could be damaged, our and our users', developers' and creators' data and intellectual property could potentially be lost or compromised, and we could be required to spend capital and other resources to alleviate problems caused by such actual or perceived breaches or incidents and remediate our systems. In the past, we have experienced social engineering and phishing attacks, and if similar attacks occur and are successful, this could have a negative impact on our business or result in unfavorable publicity. Additionally, we contract with certain third parties to store and process certain data for us, including our distribution channels, and these third parties face similar risks of actual and potential security breaches and incidents, which could present similar risks to our business, reputation, financial condition, and results of operations.

We incur significant costs in an effort to detect and prevent security breaches and other security-related incidents, including those to secure our product development, test, evaluation, and deployment activities, and we expect our costs will increase as we make improvements to our systems and processes to prevent future breaches and incidents. The economic costs to us to reduce cyber or other security problems, such as spammers, errors, bugs, flaws, "cheating" programs, defects or corrupted data, could be significant and may be difficult to anticipate or measure. Even the perception of these issues may cause developers, creators, and users to use our Platform less or stop using it altogether, and the costs could divert our attention and resources, any of which could result in claims, demands, and legal liability to us, regulatory investigations and other proceedings, and otherwise harm our business, reputation, financial condition, or results of operations. There could also be regulatory fines or other remedies imposed in connection with certain data breaches that take place around the world. Further, certain laws and regulations relating to privacy, biometrics, cybersecurity, and data protection, such as the California Consumer Privacy Act ("CCPA"), allow for a private right of action, which may lead to consumer litigation for certain data breaches that relate to specified categories of personal information. From time to time, we do identify product vulnerabilities, including through our bug bounty program. Although we have policies and procedures in place designed to promptly characterize the potential impact of such vulnerabilities and develop appropriate patching or upgrade recommendations and also maintain policies and procedures related to vulnerability scanning and management of our internal corporate systems and networks, such policies and procedures may not be followed or detect every issue, and from time to time, we have, and may in the future again, need to proactively disable access to our Platform in order to provide necessary patching or upgrades.

Although we maintain cyber and privacy insurance, subject to applicable deductibles and policy limits, such coverage may not extend to all types of incidents relating to privacy, data protection, or cybersecurity, and it may be insufficient to cover all costs and expenses associated with such incidents. Further, such insurance may not continue to be available to us in the future on economically reasonable terms, or at all, and insurers may deny us coverage as to any future claim. The successful assertion of one or more large claims against us that exceed available insurance coverage, or the occurrence of changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, including our financial condition, operating results, and reputation.

The expansion of our Platform outside the United States exposes us to risks inherent in international operations.

We operate our Platform throughout the world and are subject to risks and challenges associated with international business. For the year ended December 31, 2024, approximately 79% of our DAUs and 37% of our revenue was derived from outside the U.S. and Canada region. We intend to continue to expand internationally, and this expansion is a critical element of our future business strategy. However, as we continue to expand internationally, including into developing countries where consumer discretionary spending is relatively weak, while our DAUs increase, the growth rate of our bookings could decelerate due to weaker spending by users from those regions, and our ABPDAU has been and may continue to be negatively impacted. While we have a number of developers, creators, and users outside of the U.S., we have limited offices located outside of the U.S. and Canada, and there is no guarantee that our international expansion efforts will be successful. The risks and challenges associated with expanding our international presence and operations include:

- greater difficulty in enforcing contracts and accounts receivable collection, and longer collection periods;
- higher costs of doing business internationally, including increased accounting, travel, infrastructure, legal and compliance costs;
- double taxation of our international earnings and potentially adverse tax consequences due to changes in the tax laws of the U.S. or the foreign jurisdictions in which we operate;
- compliance with multiple, ambiguous, or evolving laws and regulations, including those relating to employment, tax, content regulation, online safety, privacy, data protection, anti-corruption, import/export, customs, anti-boycott, sanctions and embargoes, antitrust, data transfer, storage and security, content monitoring, preclusion, and removal, online entertainment offerings, advertising and consumer protection in general, and industry-specific laws and regulations, particularly as these rules apply to interactions with users under the age of 18;
- uncertainty regarding the imposition of and changes in the U.S.' and other governments' trade regulations, trade wars, tariffs, other restrictions or other geopolitical events, including, without limitation, the evolving relations between the U.S. and China, evolving relations with Russia due to Russia's invasion of Ukraine, and the conflict in the Middle East stemming from Hamas' attack against Israel;
- expenses related to monitoring and complying with differing labor and employment regulations, especially in jurisdictions where labor and employment laws may be more favorable to employees than in the U.S.;
- increased exposure to fluctuations in exchange rates between the U.S. dollar and foreign currencies in markets where we do business;
- challenges inherent to efficiently recruiting and retaining qualified employees in foreign countries and maintaining our company culture and employee programs across all of our offices;
- management communication and integration problems resulting from language or cultural differences and geographic dispersion;
- the uncertainty of protection for intellectual property in some countries;
- the uncertainty of our exposure to third-party claims of intellectual property infringement and the availability of statutory safe harbors in some countries;
- foreign exchange controls that might prevent us from repatriating cash earned outside the U.S.;
- risks associated with trade restrictions and foreign legal requirements, and greater risk of unexpected changes in regulatory requirements, tariffs and tax laws, trade laws, and export and other trade restrictions;
- risks relating to the implementation of exchange controls, including restrictions promulgated by the Office of Foreign Asset Control ("OFAC"), and other similar trade protection regulations and measures;
- exposure to regional or global public health issues, and to travel restrictions and other measures undertaken by governments in response to such issues;
- general economic and political conditions in these foreign markets, including political and economic instability in some countries and regions;
- localization of our services, including translation into foreign languages and associated expenses and the ability to monitor our Platform in new and evolving markets and in different languages to confirm that we maintain standards, including trust and safety standards, consistent with our brand and reputation;
- regulatory frameworks or business practices favoring local competitors;
- changes in the perception of our Platform by governments in the regions where we operate or plan to operate; and

- natural disasters, acts of war, and terrorism, and resulting changes to laws and regulations, including changes oriented to protecting local businesses.

These and other factors could harm our ability to generate revenue and bookings outside of the U.S. and, consequently, adversely affect our business, financial condition and results of operations. We may not be able to expand our business and attract users in international markets and doing so will require considerable management attention and resources. International expansion is subject to the particular challenges of supporting a business in an environment of multiple languages, cultures, customs, legal systems, alternative dispute systems, regulatory systems and commercial infrastructures. We may not be able to offer our Platform in certain countries, and expanding our international focus may subject us to risks that we have not faced before or increase risks that we currently face. For example, in August 2024 we learned that our Platform was blocked in the Republic of Türkiye and we are working with the local authorities with the goal of resolving it.

If we are unable to successfully grow our user base, compete effectively with other platforms, and further monetize our Platform, our business will suffer.

We have made, and are continuing to make, investments to enable our developers and creators to design and build compelling content and deliver it to our users on our Platform. Existing and prospective developers may not be successful in creating content that leads to and maintains user engagement (including maintaining the quality of experiences); they may fail to expand the types of experiences that they can build for users; or our competitors may entice our developers, users and potential users away from, or to spend less time with, our Platform, each of which could adversely affect users' interest in our Platform and lead to a loss of revenue opportunities and harm our results of operations. The multitude of other entertainment options, online gaming, and other interactive experiences is high, making it difficult to retain users who are dissatisfied with our Platform and seek other entertainment options.

Additionally, we may not succeed in further monetizing our Platform and user base. As a result, our user growth, user engagement, financial performance and ability to grow revenue could be significantly harmed if we fail to increase or maintain DAUs; our user growth outpaces our ability to monetize our users, including if our user growth occurs in markets that are not profitable; we fail to provide the tools and education to our developers and creators to enable them to monetize their experiences and developers do not create engaging or new experiences for users; we fail to increase the overall number of developers and creators on our Platform; we fail to establish a successful advertising model; we fail to increase or maintain the amount of time spent on our Platform, the number of experiences, or variety of genres of experiences, that our users engage with, or the usage of our technology for our developers; we fail to increase the features of our Platform, allowing it to more broadly serve the entertainment, education, communication and business markets; we fail to increase penetration and engagement across all demographics, including our goal of reaching ten percent of the global gaming software market, or measures intended to make our Platform more attractive to older-age verified users create the perception that our Platform is not safe for young users; or the experiences on our Platform do not maintain or gain popularity.

Continuing to manage our growth effectively may require expanding our internal IT systems, technological operations infrastructure, financial infrastructure, and operating and administrative systems and controls. In addition, we have expended in the past and may in the future expend significant resources to launch new features and changes on our Platform that we are unable to monetize, which may significantly harm our business. Any future growth would add more complexity to our organization and require effective coordination across our organization, and an inability to do so would adversely affect our business, financial conditions, and results of operations.

Only a small portion of our users regularly purchase Robux compared to all users who use our Platform in any period. Our ability to continue to attract and retain paying users will depend in part on our ability to consistently provide our paying users with a quality experience and features. If our users do not perceive our offerings, or the offerings of our developers and creators, to be of value, or if we introduce new or adjust existing features or pricing in a manner that is not favorably received by them, we may not be able to attract and retain payers or be able to convince users to become paying users of such additional service offerings, and we may not be able to increase the amount of revenue from our user base. If users fail to purchase Robux at rates similar to or greater than they have historically and if we fail to attract new paying users, or if our paying users fail to continue interacting with the Platform and purchasing Robux as they increase in age, our revenue will suffer. Users may reduce their spend on our Platform for many reasons, including a perception that they do not use the service sufficiently, the need to reduce household expenses, competitive services that provide a better value or experience or as a result of changes in pricing. If our efforts to attract and retain paying users are not successful, our business, operating results, and financial condition may be adversely impacted.

If we are not successful in our efforts to develop virtual platform-wide events or live experiences on our Platform, our business could suffer.

We have undergone efforts to develop the live and limited time events and experiences available on our Platform, such as virtual platform-wide events, concerts, classrooms, and other meeting types, and to offer commercial partners with branding opportunities in conjunction with key events, such as a product launch. There is no guarantee that these efforts will be successful or that users will engage with these experiences. New features or enhancements and changes to the existing features of our Platform, such as virtual reality applications, could fail to attain sufficient market acceptance for many reasons, including failure to predict market demand accurately in terms of functionality and to supply features that meet this demand in a timely fashion; defects, errors, or failures; negative publicity about performance, safety, privacy, or effectiveness; delays in releasing new features or enhancements on our Platform; and introduction or anticipated introduction of competing products by competitors. The failure to obtain market acceptance for these live experiences would negatively affect our business, financial condition, results of operations, and brand.

Introduction of new technology could harm our business and results of operations.

The market for an immersive platform for connection and communication is a new and evolving market characterized by rapid, complex, and disruptive changes in technology and user, developer, and creator demands that could make it difficult for us to effectively compete. The expectations and needs of our users, developers, and creators are constantly evolving. Our future success depends on a variety of factors, including our continued ability to innovate, introduce new products and services efficiently, enhance and integrate our products and services in a timely and cost-effective manner, extend our core technology into new applications, and anticipate technological developments. If we are unable to react quickly to new technology trends—for example the continued growth of generative AI solutions which affects the ways developers create experiences or may affect the way users consume virtual goods—it may harm our business and results of operation. The expertise in AI, as well as other emerging technologies, can be difficult and costly to obtain given the increasing focus on AI development and competition for talent. Further, social and ethical issues relating to the use of new and evolving technologies such as AI in our offerings, may result in reputational harm and liability, and may cause us to incur additional research and development costs to resolve such issues. AI presents emerging ethical issues and if we enable or offer solutions that draw controversy due to their perceived or actual impact on society, we may experience brand or reputational harm, competitive harm, or legal liability. Failure to address AI ethics issues by us or others in our industry could undermine public confidence in our use of AI.

We have incorporated, and are continuing to develop and deploy, AI in our products and the operations of our business. Our use of generative AI in aspects of our Platform may present risks and challenges that could increase as AI solutions become more prevalent. The Roblox Cloud may be more relied upon in the future to facilitate increasingly complex decision-making as it integrates hardware and accelerated machine learning AI, including generative AI, for a broad range of compute tasks, including enhanced non-player characters, improved personalization, synthetic content generation, and enhanced automation of the player experience. However, AI algorithms may be flawed. Datasets may be insufficient or contain biased information. It is possible that at some point the Roblox Cloud may make decisions unpredictably or autonomously, which can raise new or exacerbate existing ethical, technological, legal, and other challenges, and may negatively affect the performance of the Roblox Platform and the user, developer, and creator experience. While we have and will continue to implement safeguards, these deficiencies and other failures of AI systems could subject us to competitive harm, regulatory action, legal liability, and brand or reputational harm.

There are also many new and evolving laws and regulations focused on the use of AI. For example, on May 21, 2024, the Council of the European Union approved the latest draft of the Artificial Intelligence Act (“AI Act”) which was published in the Official Journal of the EU on July 12, 2024. The AI Act proposes a framework of prohibitions as well as disclosure, transparency and other regulatory obligations based on various levels of risk for businesses introducing AI systems in the EU. Once the AI Act becomes effective, certain provisions could require us to alter or restrict our use of AI both in features or products available to our users and in our systems that interact with our users, depending on respective levels of risk-categorization, types of systems, and manner of use, under the AI Act. The AI Act also may require us to comply with monitoring and reporting requirements. As a result, we may need to devote substantial time and resources to evaluate our obligations under the AI Act and to develop and execute a plan designed to promote compliance. Noncompliance with the AI Act could result in fines of up to €35 million or 7% of annual global turnover for the previous year, whichever is higher. There have been numerous other laws and bills proposed at the U.S. federal and state level, as well as internationally, aimed at regulating the deployment or provision of AI systems and services. This includes the Colorado AI Act, which was passed and will become effective February 1, 2026, and, similar to the AI Act, provides for a regulatory risk-based framework.

Our user metrics and other estimates are subject to inherent challenges in measurement, and real or perceived inaccuracies in those metrics may significantly harm and negatively affect our reputation and our business.

We regularly review metrics, including our DAUs, hours engaged, unique payers, user demographics, and ABPDAU to evaluate growth trends, measure our performance, and make strategic decisions. These metrics are calculated using internal data gathered on an analytics platform that we developed and operate and have not been validated by an independent third party. Our metrics are based on estimates and may also differ from estimates published by third parties or from similarly titled metrics of our competitors due to differences in methodology or underlying assumptions. If our metrics, which are based on estimates, are inaccurate, then investors will have less confidence in our company and our prospects, which could cause the market price of our Class A common stock to decline, and our reputation and brand could be harmed.

These metrics are based on what we believe to be reasonable estimates and underlying assumptions for the applicable period of measurement, but there are inherent challenges in measuring how our Platform is used. As a result, the metrics may misstate the number of DAUs, monthly unique payers, average monthly repurchase rate, hours engaged, ABPDAU, and average bookings per monthly unique payer. The methodologies used to measure these metrics require significant judgment and are also susceptible to algorithm or other technical errors. In addition, we are continually seeking to improve our metrics, which are based on estimates, and such metrics may change due to improvements or changes in our methodology or underlying assumptions. We regularly review our processes and assumptions for calculating these metrics, and from time to time we discover inaccuracies in our metrics or make adjustments to improve their accuracy, which can result in our use of updated metrics in a current period and corresponding adjustments to our historical metrics. Our ability to recalculate our historical metrics to reflect any change in methodology of a metric in a current period may be impacted by data limitations, limitations in functionality of and user behaviors on different platforms, or other factors that require us to apply different methodologies for such adjustments over current and historic periods.

Additionally, there are users who have multiple accounts, fake user accounts, or fraudulent accounts created by bots to inflate user activity for a particular user, developer or creator on our Platform. These actions may be to make the developer's or creator's experience or other content appear more popular than it really is or they may be to enable users to level up or otherwise progress in an experience more rapidly. Detecting and taking action with respect to such issues requires considerable judgment and is technically challenging. We strive to detect and minimize fraud, the use of bots, and unauthorized use of our Platform, and while these practices are prohibited in our terms of service and we implement measures to detect and suppress that behavior, when we are unsuccessful, our operating results may be negatively affected.

In addition, some of our demographic data may also be incomplete or inaccurate. For example, because users self-report their dates of birth, our age demographic data may differ from our users' actual ages. If our users provide us with incorrect or incomplete information regarding their age or other attributes, then our estimates may prove inaccurate.

Errors or inaccuracies in our metrics or data could also result in incorrect business decisions and inefficiencies. For instance, if a significant understatement or overstatement of active users or hours engaged were to occur, we may expend resources to implement unnecessary business measures or fail to take required actions to attract a sufficient number of users to satisfy our growth strategies. If our investors or developers do not perceive our user, geographic, or other demographic metrics to be accurate representations of our user base, or if we discover material inaccuracies in our user, geographic, or other demographic metrics, our reputation may be seriously harmed. Our estimates also may change as our methodologies and Platform evolve, including through the application of new data sets, the introduction of new metrics or technologies, or as our Platform changes with new features and enhancements. Such changes could lead to investor confusion or the perception that our estimates, methodologies and underlying assumptions are unreliable, which could also cause our developers, creators, and brand and other partners to be less willing to allocate their budgets or resources to our Platform, which could seriously harm our business.

We rely on suppliers for data center capacity and certain components of the equipment we use to operate our Platform and any disruption in the availability of data center capacity or components could delay our ability to expand or increase the capacity of our Platform or replace defective equipment.

We rely on suppliers for data center capacity and several components of the equipment we use to operate our Platform. Our reliance on these suppliers exposes us to risks, including reduced control over costs and constraints based on the current availability, terms, and pricing of these components and data center capacity. While the network equipment and servers we purchase generally are commodity equipment and we believe an alternative supply source for network equipment and servers on substantially similar terms could be identified quickly, our business could be adversely affected until those efforts are completed. In addition, the technology equipment industry has experienced component shortages and delivery delays, and we have and may in the future experience shortages or delays, including as a result of increased demand in the industry, such as due to rapid growth in AI demand, natural disasters, export and import control restrictions, or our suppliers lacking sufficient rights to supply the components in all jurisdictions in which we have data centers and edge data centers that support our Platform. For example, supply chain constraints for servers and other networking equipment required for our operations has resulted and could in the future result in disruptions and delays for these components and the delivery and installation of such components at our data centers and edge data centers. If our supply of certain components is disrupted or delayed, there can be no assurance that additional supplies or components can serve as adequate replacements for the existing components or that supplies will be available on terms that are favorable to us, if at all. Any disruption or delay in the supply of hardware components or data center availability may delay the opening of new data centers, edge data centers, co-location facilities or the creation of fully redundant operations, limit capacity expansion, or replacement of defective or obsolete equipment at existing data centers and edge data centers or cause other constraints on our operations that could damage our ability to serve our developers, creators, and users.

Some developers, creators, and users on our Platform may make unauthorized, fraudulent, or illegal use of Robux and other digital goods or experiences on our Platform, including through unauthorized third-party websites or “cheating” programs.

Robux and digital goods on our Platform have no monetary value outside of our Platform, but users have made and may in the future make unauthorized, fraudulent, or illegal sales and/or purchases of Robux, other digital goods and Roblox accounts on or off of our Platform, including through unauthorized third-party websites in exchange for fiat currency or to facilitate online wagers. For example, some users have made fraudulent use of credit cards owned by others to purchase Robux and offer the purchased Robux for sale at a discount on third-party websites. For the year ended December 31, 2024, total chargebacks to us from all fraud was approximately 3.41% of bookings.

While we regularly monitor and screen usage of our Platform with the aim of identifying and preventing these activities, and regularly monitor third-party websites for fraudulent Robux or digital goods offers as well as regularly send cease-and-desist letters to operators of these third-party websites, we are unable to control or stop all unauthorized, fraudulent, or illegal transactions in Robux or other digital goods that occurs on or off of our Platform. Although we are not responsible for such unauthorized, fraudulent, and/or illegal activities conducted by these third parties, our user experience may be adversely affected, and users and/or developers may choose to leave our Platform if these activities are pervasive. These activities have and may in the future result in negative publicity, disputes, and legal claims, and measures we take in response may be expensive, time consuming, and disruptive to our operations.

In addition, unauthorized, fraudulent, and/or illegal purchases and/or sales of Robux, Roblox accounts, or other digital goods on or off of our Platform, including through third-party websites, bots, fake accounts, or “cheating” or malicious programs that enable users to exploit vulnerabilities in the experiences on our Platform or our partners’ websites and platforms, and could reduce our revenue and bookings by, among other things, decreasing revenue from authorized and legitimate transactions, increasing chargebacks from unauthorized credit card transactions, or causing us to lose revenue and bookings from dissatisfied users who stop engaging with the experiences on our Platform. Additionally, such prohibited activity could increase costs that we incur to develop technological measures to curtail unauthorized transactions and other malicious programs, or could reduce other operating metrics.

Under our community rules for our Platform, which developers, creators, and users are obligated to comply with, we reserve the right to temporarily or permanently ban individuals for breaching our Terms of Use or Community Standards, including by engaging in any illegal activity on the Platform. We have banned individuals as a result of unauthorized, fraudulent, or illegal use of our Platform, Robux or other digital goods on our Platform. We have also employed technological measures to help detect unauthorized Robux transactions and continue to develop additional methods and processes through which we can identify unauthorized transactions and block such transactions. However, there can be no assurance that our efforts to prevent or minimize these unauthorized, fraudulent, or illegal transactions will be successful.

We have made and are continuing to make investments in privacy, data protection, user safety, cybersecurity, and content review efforts to combat misuse of our services and user data by third parties, including investigations of individuals we have determined to have attempted to access and, in some cases, have accessed, user data without authorization. Our internal teams also continually monitor and address any unauthorized attempts to access data stored on servers that we own or control or data available to our third-party customer service providers. As a result of these efforts, we have discovered and disclosed, and anticipate that we will continue to discover and disclose, additional incidents of misuse of or unauthorized access of user data or other undesirable activity by third parties. We have taken steps to protect the data that we have access to, but despite these efforts, our security measures, or those of our third-party service providers, could be insufficient or breached as a result of third-party action, malfeasance, employee errors, service provider errors, technological limitations, defects or vulnerabilities in our Platform or otherwise. Additionally, many of our employees and third-party service providers with access to user data currently are and may in the future be working remotely, which may increase our employees' or our third-party service providers' risk of security breaches or incidents. Moreover, the risk of state-supported and geopolitical-related cyber-attacks may increase with geopolitical events. We have sometimes failed to discover and in the future may not discover all such incidents or activity or be able to respond to or otherwise address them, promptly, in sufficient respects or at all. Such incidents and activities have in the past, and may in the future, involve the use of user data or our systems in a manner inconsistent with our terms, contracts or policies, the existence of false or undesirable user accounts, theft of in-game currency or virtual items in valid user accounts, and activities that threaten people's safety on- or offline. We may also be unsuccessful in our efforts to enforce our policies or otherwise remediate any such incidents. Any of the foregoing developments, whether actual or perceived, may negatively affect user trust and engagement, harm our reputation and brands, require us to change our business practices in a manner adverse to our business, and adversely affect our business and financial results. Any such developments have and may continue to subject us to future litigation and regulatory inquiries, investigations, and proceedings, including from data protection authorities in countries where we offer services and/or have users, which could subject us to monetary penalties and damages, divert management's time and attention, and lead to enhanced regulatory oversight.

We focus our business on our developers, creators, and users, and acting in their interests in the long-term may conflict with the short-term expectations of analysts and investors.

A significant part of our business strategy and culture is to focus on long-term growth and developer, creator, and user experience over short-term financial results. We expect our expenses to continue to increase in the future as we broaden our developer, creator, and user community, as developers, creators, and users increase the amount and types of experiences and virtual items they make available on our Platform and the content they consume, as we continue to seek ways to increase payments to our developers and as we develop and further enhance our Platform, expand our technical infrastructure and data centers, and hire additional employees to support our expanding operations. As a result, in the near- and medium-term, we may continue to operate at a loss, or our near- and medium-term profitability may be lower than it would be if our strategy were to maximize near- and medium-term profitability. We expect to continue making significant expenditures to grow our Platform and develop new features, integrations, capabilities, and enhancements to our Platform for the benefit of our developers, creators, and users. We will also be required to invest in our internal IT systems, technological operations infrastructure, financial infrastructure, and operating, compliance and administrative systems and controls. Such expenditures may not result in improved business results or profitability over the long-term. If we are ultimately unable to achieve or improve profitability at the level or during the time frame anticipated by securities or industry analysts, investors and our stockholders, the trading price of our Class A common stock may decline.

We may require additional capital to meet our financial obligations and support business growth, and this capital might not be available on acceptable terms or at all.

We intend to continue to make significant investments to support our business growth and may require additional funds to respond to business challenges, improve our Platform and operating infrastructure or acquire complementary businesses, personnel, and technologies. Accordingly, we may need to engage in additional equity or debt financings. If we raise additional funds through future issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences, and privileges superior to those of our Class A common stock. Any debt financing that we secure in the future could involve offering security interests and undertaking restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. General market conditions including trading volatility affecting technology companies may reduce our ability to access capital on favorable terms or at all. Also, to the extent outstanding additional shares subject to options and warrants to purchase our capital stock are authorized and exercised, there will be further dilution. The amount of dilution could be substantial depending on the size of the issuance or exercise. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired, and our business, financial condition or results of operations may be harmed.

The popularity of our Lua scripting language is a key driver of content creation and engagement with our Platform, and if other programming languages or platforms become more popular with our developers, it may affect engagement with and content creation for our Platform.

Roblox experiences are programmed using our Lua scripting language on the Roblox Platform. In order to enhance the attractiveness of our Platform to potential developers, we have made our Lua scripting language available without charge. Lua scripting language permits developers on the Roblox Platform to develop customized add-on features for their own or others' use, and we have provided education to our developers on how to write add-on programs using Lua scripting language. As part of this strategy, we have encouraged the development of an active community of Lua programmers similar to those which have emerged for other software platforms. The widespread use and popularity of our Lua scripting language is critical to creating engaging content on and demand for our Platform. If developers do not find our Lua scripting language or our Platform simple and attractive for developing content or determine that our Lua scripting language or other features of our Platform are undesirable or inferior to other scripting languages or platforms, or Lua scripting language becomes unavailable for use by the developers for any reason, they may shift their resources to developing content on other platforms, and our business may be harmed.

We rely on Amazon Web Services for a portion of our cloud infrastructure in certain areas, and as a result any disruption of AWS would negatively affect our operations and significantly harm our business.

We rely on Amazon Web Services ("AWS") as a third-party provider for a portion of our backend services, including for some of our high-speed databases, scalable object storage, and message queuing services, as well as virtual cloud infrastructure. For location-based support areas, we outsource certain aspects of the infrastructure relating to our cloud-native Platform. As a result, our operations depend, in part, on AWS' ability to protect their services against damage or interruption from natural or manmade disasters. Our developers, creators, and users need to be able to access our Platform at any time, without interruption or degradation of performance. Although we have disaster recovery plans that utilize multiple AWS availability zones to support our cloud infrastructure, any incident affecting their infrastructure that may be caused by natural or manmade disasters and other similar events beyond our control, could adversely affect our cloud-native Platform. Any disruption of or interference with our use of AWS could impair our ability to deliver our Platform reliably to our developers, creators, and users.

Additionally, if AWS were to experience a hacking attack or other security incident, it could result in unauthorized access to, damage to, disablement or encryption of, use or misuse of, disclosure of, modification of, destruction of, or loss of our data or our developers', creators', and users' data or disrupt our ability to provide our Platform or service. A prolonged AWS service disruption affecting our cloud-native Platform for any of the foregoing reasons would adversely impact our ability to serve our users, developers, and creators and could damage our reputation with current and potential users, developers, and creators, expose us to liability, result in substantial costs for remediation, cause us to lose users, developers, and creators, or otherwise harm our business, financial condition, or results of operations. We may also incur significant costs for using alternative hosting cloud infrastructure services or taking other actions in preparation for, or in reaction to, events that damage or interfere with the AWS services we use.

We have entered into an enterprise agreement with AWS and a supplemental private pricing addendum that will remain in effect until June 2026. In the event that our AWS service agreements are terminated, or there is a lapse of service, elimination of AWS services or features that we utilize, we could experience interruptions in access to our Platform as well as significant delays and additional expense in arranging for or creating new facilities or re-architecting our Platform for deployment on a different cloud infrastructure service provider, which would adversely affect our business, financial condition, and results of operations.

We must continue to attract and retain users, developers, and creators, and highly qualified personnel in very competitive markets to continue to execute on our business strategy and growth plans, and the loss of key personnel or failure to attract and retain users, developers, and creators could significantly harm our business.

We compete for users, developers, and creators. We compete to attract and retain our users' attention and their hours engaged with other global technology leaders such as Amazon, Apple, Meta Platforms, Google, Microsoft, and Tencent, global entertainment companies such as Comcast, Disney, ViacomCBS, and Warner Bros Discovery, global gaming companies such as Activision Blizzard (now owned by Microsoft), Electronic Arts, Take-Two, Epic Games, Krafton, NetEase, and Valve, online content platforms including Netflix, Spotify, and YouTube, as well as social platforms such as Facebook, TikTok, Instagram, WhatsApp, Pinterest, X, Reddit, Discord and Snap.

We also rely on developers and creators to create the content that leads to and maintains user engagement (including maintaining the quality of experiences). We compete to attract and retain developers and engineering talent with gaming and metaverse platforms such as Epic Games, Unity, Meta Platforms, and Valve Corporation, which also give developers the ability to create or distribute interactive content. We do not have any agreements with our developers that require them to continue to use our Platform for any time period. Some of our developers have developed attractive businesses in developing content, including games, on our Platform. While we have millions of developers and creators on our Platform, 50% of in-experience hours engaged in experiences were spent in the top 50 experiences in the month ending December 31, 2024. In the future, if we are unable to continue to provide value to these developers and they have alternative methods to publish and commercialize their offerings, they may not continue to provide content to our Platform. Should we fail to provide compelling advantages to continued use of our ecosystem to developers, they may elect to develop content on competing interactive entertainment platforms. Should we fail to control botting and other forms of automated play on our Platform, developers, creators and users may find our Platform less attractive and may elect to engage on competing interactive entertainment platforms. If a significant number of our developers no longer provide content, we fail to increase the number of developers using our Platform, or developers and creators whose experiences account for a substantial portion of our Hours Engaged choose to leave our Platform, we may experience an overall reduction in the quantity and quality of our experiences, which could adversely affect users' interest in our Platform and lead to a loss of revenue opportunities and harm our results of operations.

We expect competition to continue to increase in the future. Many of our existing competitors have, and some of our potential competitors could have, substantial competitive advantages, such as larger sales and marketing budgets and resources; broader and more established relationships with users, developers, and creators; greater resources to make acquisitions and enter into strategic partnerships; lower labor and research and development costs; larger and more mature intellectual property portfolios; and substantially greater financial, technical, and other resources.

Additionally, we depend on the continued services and performance of our Founder, President, CEO and Chair of our Board of Directors, David Baszucki, members of our senior management team, and other key personnel. David Baszucki has been responsible for our strategic vision, and should he stop working for us for any reason, it is unlikely that we would be able to immediately find a suitable replacement. We do not maintain key man life insurance for David Baszucki, and do not believe any amount of key man insurance would allow us to recover from the harm to our business if David Baszucki were to leave the Company for any reason. Similarly, members of our senior management team and other key personnel are highly sought after and others may attempt to encourage these individuals to leave the Company. The loss of one or more of the members of the senior management team or other key personnel for any reason, or the inability to attract new or replacement members of our senior management team, other key personnel, or highly qualified employees could disrupt our operations, create uncertainty among investors, adversely impact employee retention and morale, and significantly harm our business.

Our business and results of operations are affected by fluctuations in currency exchange rates.

As we continue to expand our international operations, we become more exposed to the effects of fluctuations in currency exchange rates. We generally collect revenue from our international markets in the local currency. For the year ended December 31, 2024, approximately 79% our DAUs and 37% of our revenue was derived from outside the U.S. and Canada region. While we periodically adjust the price of Robux to account for the relative value of this local currency to the U.S. dollar, these adjustments are not immediate nor do they typically exactly track the underlying currency fluctuations. As a result, rapid appreciation of the U.S. dollar against these foreign currencies has harmed and may in the future harm our reported results and cause the revenue derived from our foreign users and overall revenue to decrease. In addition, even if we do adjust the cost of our Robux in foreign markets to fluctuations in the U.S. dollar, such fluctuations could change the costs of purchasing Robux to our users outside of the U.S., which may adversely affect our business, results of operations and financial condition, or improve our financial performance.

We also incur expenses for employee compensation and other operating expenses at our non-U.S. locations in the local currency. Additionally, global events as well as geopolitical developments, and inflation have caused, and may in the future cause, global economic uncertainty, and uncertainty about the interest rate environment, which could amplify the volatility of currency fluctuations. Fluctuations in the exchange rates between the U.S. dollar and other currencies could result in the dollar equivalent of our expenses being higher which may not be offset by additional revenue earned in the local currency. This could impact our reported results of operations. To date, we have not engaged in any hedging strategies and any such strategies, such as forward contracts, options, and foreign exchange swaps related to transaction exposures that we may implement in the future to mitigate this risk may not eliminate our exposure to foreign exchange fluctuations. Moreover, the use of hedging instruments may introduce additional risks if we are unable to structure effective hedges with such instruments.

We plan to continue to make acquisitions and investments in other companies, which could require significant management attention, disrupt our business, dilute our stockholders, and significantly harm our business.

As part of our business strategy, we have made and intend to make acquisitions and investments to add or access specialized employees and complementary companies, features, and technologies. Our ability to acquire and successfully integrate larger or more complex companies, features, and technologies is unproven. In the future, we may not be able to find other suitable acquisition or investment candidates, and we may not be able to complete acquisitions, investments or similar strategic transactions on favorable terms, if at all. The pursuit of potential acquisitions or investments may divert the attention of management and cause us to incur significant expenses related to identifying, investigating, and pursuing suitable targets, whether or not they are consummated. Our previous and future acquisitions and investments may not achieve our goals, and any future acquisitions or investments we complete could be viewed negatively by users, developers, creators, partners, or investors. In addition, if we fail to successfully close transactions or integrate new teams into our corporate culture, or fail to integrate the features and technologies associated with acquisitions or investments, our business could be significantly harmed. Any integration process may require significant time and resources, and we may not be able to manage the process successfully. We may not successfully evaluate or use the acquired products, technology, and personnel, or accurately forecast the financial impact of an acquisition, including accounting charges which could be recognized as a current period expense. We also may not achieve the anticipated benefits of synergies from the target business, may encounter challenges with incorporating the acquired features and technologies into our Platform while maintaining quality and security standards consistent with our brand, or may fail to identify security vulnerabilities in acquired technology prior to integration with our technology and Platform. We may also incur unanticipated liabilities that we assume as a result of acquiring companies, including claims related to the acquired company, its offerings or technologies or potential violations of applicable law or industry rules and regulations arising from prior or ongoing acts or omissions by the acquired business that were not discovered during diligence. We will pay cash, incur debt, or issue equity securities to pay for any acquisitions or investments, any of which could significantly harm our financial results. In addition, it generally takes several months after the closing of an acquisition to finalize the purchase price allocation. Therefore, it is possible that our valuation of an acquisition may change and result in unanticipated write-offs or charges, impairment of our goodwill, or a material change to the fair value of the assets and liabilities associated with a particular acquisition, any of which could significantly harm our business. Selling equity to finance any such acquisition would also dilute our stockholders. Incurring debt would increase our fixed obligations and could also include covenants or other restrictions that would impede our ability to manage our operations.

The U.S. government recently introduced regulations that require notification of or prohibit certain transactions by U.S. persons with entities in China or with linkages to China (the "Outbound Investment Rules"). The Outbound Investment Rules could apply to certain intracompany activities between Roblox and Roblox China Holding Corp or Luobu, as well as other Roblox investments or activities with entities in China or with linkages to China. The Outbound Investment Rules regulations could also limit the ability of others to transact certain business with the Company if those transactions involve or benefit, directly or indirectly Roblox China Holding Corp, Luobu or other Company operations in China. Where the Outbound Investment Rules apply to a given transaction, it might limit our ability to carry out our long-term business strategy.

Our acquisition and investment strategy may not succeed if we are unable to remain attractive to target companies or expeditiously close transactions. If we develop a reputation for being a difficult acquirer or having an unfavorable work environment, or if target companies view our Class A common stock unfavorably, we may be unable to consummate key acquisition transactions essential to our corporate strategy and our business may be significantly harmed.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited, each of which could significantly harm our business.

As of December 31, 2024, we had federal net operating loss carryforwards of \$2,382.3 million, which do not expire, federal net operating loss carryforwards of \$10.7 million, which begin to expire in 2037, state net operating loss carryforwards of \$1,433.7 million, which begin to expire in 2025, and foreign net operating loss carryforwards of \$64.8 million, which begin to expire in 2025. Utilization of our net operating loss carryforwards and other tax attributes may be subject to limitations on utilization or benefit due to the ownership change limitations provided by Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the "Code"), and other similar provisions. All of the \$2,382.3 million of federal net operating losses are carried forward indefinitely but the deductibility of these losses is generally limited to 80% of current year taxable income. Our net operating loss carryforwards may also be subject to limitations under state law. For example, California legislation enacted in June 2024 limits the use of state net operating loss carryforwards and tax credits for tax years beginning on or after January 1, 2024 and before January 1, 2027. If our net operating loss carryforwards and other tax attributes expire before utilization or are subject to limitations, our business and financial results could be harmed.

If our estimates or judgments relating to our critical accounting policies are based on assumptions that change or prove to be incorrect, our results of operations could fall below expectations of securities analysts and investors or our publicly announced guidance, and changes in our business may not be immediately reflected in our operating results.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, as described in the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” For example, the majority of the virtual items available on our Platform are durable virtual items, which, when acquired, are recognized ratably over the estimated period of time the virtual items are available to the user (estimated to be the average lifetime of a paying user). Every quarter, we complete an assessment of our estimated average lifetime of a paying user, which is used for revenue recognition of durable virtual items and calculated based on historical monthly retention data for each paying user cohort to project future participation on our Platform. We calculate the average historical monthly retention data by determining the weighted average of monthly paying users that have spent time on our Platform. In 2021, our estimated average lifetime of a paying user was 23 months. In the first quarter of 2022, we updated our estimated average lifetime of a paying user from 23 months to 25 months and in the third quarter of 2022 we increased the estimated average lifetime of a paying user from 25 months to 28 months. The estimated average lifetime of a paying user remained at 28 months through the first quarter of 2024. In the second quarter of 2024, the estimated average lifetime of a paying user decreased to 27 months. Based on the carrying amount of deferred revenue and deferred cost of revenue as of March 31, 2024, the change resulted in an increase in our fiscal year 2024 revenue and cost of revenue by \$98.0 million and \$20.4 million, respectively.

Much of the revenue we report in each quarter is the result of purchases of Robux during previous periods. Consequently, a decline in purchases of Robux in any one quarter will not be fully reflected in our revenue and operating results for that quarter. Any such decline, however, will negatively impact our revenue and operating results in future quarters. Accordingly, the effect of significant near-term downturns in purchases of Robux for a variety of reasons may not be fully reflected in our results of operations until future periods.

In addition to revenue recognition and estimates of the average lifetime of a paying user, our accounting policies that involve judgment include those related to assumptions used for estimating the fair value of common stock to calculate stock-based compensation, capitalization of internal-use software costs, valuation of goodwill and intangible assets, certain accrued liabilities, and valuation allowances associated with income taxes. If our assumptions change or if actual circumstances differ from those in our assumptions, our results of operations could be adversely affected, which could cause our results of operations to fall below the expectations of securities analysts and investors, resulting in a decline in the market price of our Class A common stock.

Our results of operations may be harmed if we are required to collect sales, value added, or other similar taxes for the purchase of our virtual currency, for the sale of digital content, or purchase of physical goods, between our developers, creators, and users.

Although we, either directly or through our third-party distribution channels, collect and remit taxes from users in certain countries and regions on the sale of our virtual currency, there are some jurisdictions in which we operate where we do not currently collect taxes from users. The application of tax laws pertaining to the collection of sales, value added, and similar taxes to e-commerce businesses, such as ours, is a complex and evolving area. For example, many countries have recently enacted tax laws that require non-resident providers to register for and levy value added taxes on electronically provided services to such country’s residents. This would require us to calculate, collect, and remit value added taxes in some jurisdictions, even if we have no physical presence in such jurisdictions. Further, we may need to invest substantial amounts to modify our solutions or our business model to be able to collect and remit sales, value added, or similar taxes under such tax laws in the future.

Further, many jurisdictions have also adopted or are considering adopting marketplace facilitator laws that shift the burden of tax collection to online marketplaces. In certain states, we may be characterized as a marketplace facilitator for the sale of digital content or physical goods between our developers, creators, and users, and in such instances, we may need to invest substantial amounts to modify our solutions or business model to be able to meet any reporting and collection obligations with respect to sales, value added, or similar taxes. A successful assertion by a jurisdiction that we should have been or should be collecting additional sales, value added, or other taxes for the sale of content or physical goods between our developers, creators, and users, could, among other things, result in substantial tax payments, create significant administrative burdens for us, discourage potential users, developers, or creators from subscribing to our Platform, or otherwise harm our business, results of operations, and financial condition.

We may not realize the benefits expected through our China joint venture.

In February 2019, we entered into a joint venture agreement with Songhua River Investment Limited, referred to as Songhua, an affiliate of Tencent Holdings Limited ("Tencent Holdings"), under which we created Roblox China Holding Corp (the "China JV"), of which we own a 51% ownership interest. Through a wholly-owned subsidiary based in Shenzhen, branded as "Luobu," the China JV is engaged in the development, localization, and licensing to Chinese creators of a Chinese version of Roblox Studio. Luobu also develops and oversees relations with local Chinese developers and helps them build and publish experiences and content for our global Platform. In December 2020, Shenzhen Tencent Computer Systems Co. Ltd ("Tencent"), received a required publishing license from the Chinese government, which enabled Tencent to publish a localized version of the Roblox Client as a game in China under the name "Luobulesi." The license could be withdrawn if Tencent fails to comply with applicable existing or future regulations. Such withdrawal could significantly impair or eliminate the ability to publish and operate Luobulesi in China. The Luobulesi app is not currently available to users in China while we and Tencent build the next version of Luobulesi.

Tensions between the U.S. and China have resulted in trade restrictions that could harm our ability to participate in Chinese markets and numerous additional such restrictions have been threatened by both countries. Sustained uncertainty about, or worsening of, current global economic conditions and further escalation of trade tensions between the U.S. and China could result in a global economic slowdown and long-term changes to global trade, including retaliatory trade restrictions that could restrict our ability to participate in the China JV. We may find it difficult or impossible to comply with these or other conflicting regulations in the U.S. and China, which could make it difficult or impossible to achieve our business objectives in China or realize a return on our investment in this market.

Relations may also be compromised if the U.S. pressures the Chinese government regarding its monetary, economic, or social policies. Changes in political conditions in China and changes in the state of China-U.S. relations are difficult to predict and could adversely affect the operations or financial condition of the China JV. In addition, because of our proposed involvement in the Chinese market, any deterioration in political or trade relations might result in our products being perceived as less attractive in the U.S. or elsewhere. In January 2025, the U.S. Department of Defense ("DOD") added Tencent Holdings to its list of Chinese military companies operating directly or indirectly in the United States under section 1260H of the National Defense Authorization Act for Fiscal Year 2021 ("1260H List"). Beginning in June 2026, this may restrict our ability to resell goods and services of Tencent Holdings to the DOD. The designation may also result in negative publicity for us and the China JV. Further regulatory changes adding Tencent Holdings to additional lists or export and sanctions related restricted or prohibited parties or further controls on entities viewed as connected to the Chinese military could impact our ability to work with Tencent Holdings. The Committee on Foreign Investment in the U.S. ("CFIUS") has continued to apply a more stringent review of certain foreign investment in U.S. companies, including investment by Chinese entities, and has made inquiries to us with respect to Tencent Holding's equity investment in us and involvement in the China JV. We cannot predict what effect any further inquiry by CFIUS into our relationship with Tencent and Tencent Holdings, developments with respect to the 1260H List, or changes in China-U.S. relations overall may have on our ability to effectively support the China JV or on the operations or success of the China JV.

The Chinese economic, legal, and political landscape also differs from other countries in many respects, including the level of government involvement and regulation, control of foreign exchange, and uncertainty regarding the practical enforceability of intellectual property rights. The laws, regulations and legal requirements in China are also subject to frequent changes and the exact obligations under and enforcement of laws and regulations are often subject to unpublished internal government interpretations and policies which makes it challenging to ascertain compliance with such laws. We may incur increased operating expenses related to cybersecurity and data protection in China, including with respect to access to Chinese user data and confidential company information as well as any network interconnections and cross border system integrations.

In addition to market and regulatory factors, any future success of the China JV will require a collaborative effort with Tencent to build and operate Luobu and Luobulesi as together, they will form the exclusive basis for growing our penetration in the China market. In addition, upon the occurrence of certain events, such as a termination of certain of the contractual relationships applicable to Luobu, a change of control of us, or the acquisition of 20% of our outstanding securities by certain specified Chinese industry participants, we may be required to purchase Songhua's interest in the China JV at a fair market value determined at the time of such purchase. Any future requirement to purchase the interest in China JV from Songhua may have a material adverse effect upon our liquidity, financial condition, and results of operations both as a result of the purchase of such interests and the fact that we would need to identify and partner with an alternative Chinese partner in order for operations to continue in the China market.

Risks Related to Government Regulations

Because we store, process, and use data, some of which contains personal information, we are subject to complex and evolving federal, state, and international laws and regulations regarding privacy, cybersecurity, data protection, and other matters. Many of these laws and regulations are subject to change and uncertain interpretation, and could result in investigations, claims, changes to our business practices, increased cost of operations, and declines in user growth, retention, or engagement, any of which could significantly harm our business.

We are subject to a variety of laws and regulations in the U.S. and other countries that involve matters central to our business, including privacy, cybersecurity, and data protection. The regulatory frameworks for these matters worldwide are rapidly evolving and are likely to remain uncertain for the foreseeable future.

Certain privacy, biometrics, cybersecurity, and data protection laws and regulations have placed and will continue to place significant privacy, data protection, and cybersecurity obligations on organizations such as ours and may require us to continue to change our policies and procedures. For example, the European Union's ("EU") General Data Protection Regulation ("GDPR") imposes stringent data protection requirements regarding EU personal data, and its provisions include increasing the maximum level of fines that EU regulators may impose for the most serious breaches of noncompliance of €20 million or 4% of annual global revenues of the previous year, whichever is greater. Such fines would be in addition to (i) the rights of individuals to sue for damages in respect of any data privacy breach which causes them to suffer harm, (ii) the right of individual member states to impose additional sanctions over and above the administrative fines specified in the GDPR, and (iii) the ability of supervisory authorities to impose orders requiring companies to modify their practices. If we are found not to be compliant with GDPR or similar requirements, including obligations to comply with data protection requirements when transferring personal data from the European Economic Area ("EEA"), Switzerland, and the United Kingdom ("U.K.") to the U.S., we may be subject to significant fines and the risk of civil litigation.

The United Kingdom maintains the Data Protection Act of 2018 and the UK GDPR, which collectively implement and complement the GDPR and provide for penalties for noncompliance of up to the greater of £17.5 million or 4% of annual global revenues of the previous year. On June 28, 2021, the European Commission announced a decision of "adequacy" concluding that the United Kingdom ensures an equivalent level of data protection to the GDPR, which provides some relief regarding the legality of continued personal data flows from the EEA to the U.K. Such adequacy decision must, however, be renewed after four years and may be modified or revoked in the interim. We cannot fully predict how the Data Protection Act, the UK GDPR of 2018 and other United Kingdom data protection laws or regulations may develop in the medium to longer term, nor the effects of divergent laws and guidance regarding how data transfers to and from the United Kingdom will be regulated.

In addition, various local, national, and foreign laws and regulations apply to our operations, including the Children's Online Privacy Protection Act ("COPPA"), in the U.S., Article 8 of the GDPR and similar regulations in other jurisdictions. COPPA imposes strict requirements on operators of websites or online services directed to children under 13 years of age (or 16 years of age under other regulatory regimes). We estimate that approximately 40% of our DAUs were under the age of 13 during the year ended December 31, 2024. COPPA requires companies to obtain verifiable parental consent before collecting personal information from children under the age of 13. Both the U.S. federal government and the states can enforce COPPA and violations of COPPA can lead to significant fines. The FTC released final amendments to its COPPA Rule on January 16, 2025, that, among other things, expand the scope of covered information, provide for revised notices, and impose new data retention and information security obligations. Following an executive order that froze all then-pending federal regulations as of January 20, 2025, the amended COPPA Rule is pending further review and may be subject to additional modifications. No assurances can be given that our compliance efforts will be sufficient to avoid allegations of COPPA violations, and any non-compliance or allegations of non-compliance could expose us to significant liability, penalties and loss of revenue, significantly harm our reputation, and could be costly and time consuming to address or defend. To the extent we rely on consent for processing personal data under the GDPR, consent or authorization from the holder of parental responsibility is required in certain cases for the processing of personal data of children under the age of 16, and member states may enact laws that lower that age to 13. Additionally, in certain jurisdictions the law may allow minors to disaffirm their contracts, including our Terms of Use. If minors on our Platform are able to avoid enforcement of our Terms of Use under applicable law, it could have a material adverse impact on our business, financial condition, results of operations, and cash flow.

We continue to monitor updated guidance from the United Kingdom's Information Commissioner Office ("ICO") on the Age Appropriate Design Code ("AADC"), which focuses on online safety and protection of children's privacy online. The AADC became enforceable on September 2, 2021. Noncompliance with the AADC may result in publicized investigations, substantial fines, audits or other proceedings by the ICO, and other regulators in the EEA or Switzerland, as noncompliance with the AADC may indicate noncompliance with applicable data protection law. We may incur liabilities, expenses, costs, and other operational losses under the GDPR and laws and regulations of applicable EU Member States and the United Kingdom relating to privacy, cybersecurity, and data protection in connection with any measures we take to comply with them.

Other jurisdictions have adopted laws and regulations addressing privacy, data protection, and cybersecurity, many of which share similarities with the GDPR. For example, Law no. 13.709/2018 of Brazil, the Lei Geral de Proteção de Dados Pessoais or LGPD, entered into effect on September 18, 2020, authorizing a private right of action for violations. Penalties may include fines of up to 2% of the organization's revenue in Brazil in the previous year or 50M reais (approximately \$9.5 million U.S. dollars). The LGPD applies to businesses (both inside and outside Brazil) that process the personal data of users who are located in Brazil. The LGPD provides users with the similar rights as the GDPR regarding their data. A Brazilian Data Protection Authority, Brazilian National Data Protection Authority (Autoridade Nacional de Proteção de Dados) has been established to provide rules and guidance on how to interpret and implement the LGPD's requirements, including regarding notice of processing, data transfer requirements, and other compliance obligations, such as security measures, recordkeeping, training, and governance. Additionally, the Personal Information Protection Law, ("PIPL") of the People's Republic of China ("PRC"), was adopted on August 20, 2021, and went into effect on November 1, 2021. The PIPL shares similarities with the GDPR, including extraterritorial application, data minimization, data localization, and purpose limitation requirements, and obligations to provide certain notices and rights to citizens of the PRC. The PIPL allows for fines of up to 50 million renminbi or 5% of a covered company's revenue in the prior year. Our approach with respect to regimes such as the LGPD, PIPL, and other foreign legislation may be subject to further evaluation and change, our compliance measures may not be fully adequate and may require modification, we may expend significant time and cost in developing and maintaining a privacy governance program, data transfer or localization mechanisms, or other processes or measures to comply with such regimes, and any implementing regulations or guidance under these regimes, and we may potentially face claims, litigation, investigations, or other proceedings or liability regarding such regimes and may incur liabilities, expenses, costs, and other operational losses under such regimes and any measures we take to comply with them.

In addition, the CCPA, which established a new privacy framework for covered businesses in California, such as ours, went into effect in January 2020, requiring us to modify our data processing practices and policies and incur compliance related costs and expenses. The CCPA provides for civil penalties for violations, as well as a private right of action for data breaches, which may increase the likelihood and cost of data breach litigation. The CCPA was significantly modified and supplemented by the California Privacy Rights Act ("CPRA"), which was approved in November 2020. The CPRA went into effect on January 1, 2023 and, among other things, gives California residents the ability to limit the use of their sensitive information, provides for penalties for CPRA violations concerning California residents under the age of 16, and establishes a new agency to implement and enforce the law. Further, the CCPA has prompted similar legislative developments in other states in the U.S., including laws enacted in Virginia, Colorado, Utah, Connecticut, Florida, Iowa, Indiana, Montana, Tennessee, Oregon, Delaware, Texas, New Hampshire, New Jersey, Kentucky, Maryland, Nebraska, Rhode Island and Minnesota. These developments create the potential for a patchwork of overlapping but different state laws. Other states, including California, Utah and Arkansas, have passed legislation imposing substantial new obligations upon companies that offer online services, products, or features "likely to be accessed" by children 17 years of age or under, or certain types of social media and digital services, respectively. The California legislation includes certain requirements and principles from the AADC including, among other things, data protection impact assessments and the implementation of privacy by design. The laws in Utah, Florida, and Arkansas impose restrictions and obligations in connection with users who are, or are deemed to be, under 18, including access restrictions and restrictions on abilities for minors to create accounts. Many states have also passed their own laws that require verifiable parental consent before allowing children to create an account or that otherwise impact companies that process children's personal data. In June 2024, the New York governor signed a bill into law that prohibits covered social media companies from providing individuals under 18 with "addictive feeds," as a significant part of their services and imposes obligations on such companies that prohibits the collection, use, sharing, and sale personal data of individuals under 18 unless it is strictly necessary, or where informed consent is obtained. Some countries also are considering or have passed legislation requiring local storage and processing of data, or similar requirements, which could increase the cost and complexity of operating our products and services and other aspects of our business. The impact of these recent regulations and potential future regulations related to privacy, cybersecurity, data protection, and related matters, such as age verification, are far-reaching, create a patchwork of overlapping but different laws, and have required and may continue to require us to, modify practices, policies, features and Platform defaults, incur substantial costs and expenses, and at times restrict our operations. Additionally, requirements for verified parental consent before allowing children to create an account may limit the use of our Platform or reduce our overall demand for our Platform, which could harm our business, financial condition, and results of operations.

We believe we take reasonable efforts to comply with all applicable laws, regulations, and other legal obligations and certain industry codes of conduct relating to privacy, cybersecurity, and data protection. However, it is possible that the obligations imposed on us by applicable laws and regulations, industry codes of conduct or other actual or asserted obligations relating to privacy, cybersecurity, data protection, or related matters may be interpreted and applied in inconsistent manners and may conflict with other rules or our practices in certain jurisdictions. Additionally, due to the nature of our service, we are unable to maintain complete control over cybersecurity or the implementation of measures that reduce the risk of a security breach or incident. For example, our customers may accidentally disclose their passwords or store them on a mobile device that is “SIM swapped,” lost, or stolen, creating the perception that our systems are not secure against third-party access. Any failure or perceived failure by us to comply with our privacy policies, our obligations to users or other third parties relating to privacy, cybersecurity, data protection, or related matters, or our other policies or actual or asserted obligations relating to privacy, cybersecurity, data protection, or related matters, or any actual or perceived compromise of security, including any such compromise that results in the unauthorized loss, unavailability, modification, release, transfer, or other processing of personal information or other user, developer or creator data, may result in governmental investigations and enforcement actions, litigation, claims or public statements against us by consumer advocacy groups or others and could cause our developers, creators, and users to lose trust in us, any or all of which could have an adverse effect on our business, financial condition, or results of operations.

Legal and regulatory restrictions on virtual currencies like Robux, prepaid gift cards and payment-related activities may adversely affect our Platform, experiences, and virtual items on our Platform, which may negatively impact our revenue, bookings, business, and reputation.

The regulations that apply to virtual currencies in the jurisdictions in which we operate are subject to change. It is possible that regulators in the U.S. or elsewhere may take regulatory actions in the future that restrict our ability to license Robux, allow users to acquire or use other digital goods available on our Platform, or that prohibit developers or creators on our Platform from earning Robux. In addition, we make prepaid gift cards available for sale internationally that may be used to redeem Robux and our Developer Exchange Program allows developers to exchange their accumulated earned Robux for fiat currency under certain conditions. We are or may be subject to a variety of laws and regulations globally, including those governing anti-money laundering and prepaid cards. Regulators may impose restrictions or bans on our ability to operate our Developer Exchange Program or on the sale of prepaid gift cards. Any such restrictions or prohibitions may adversely affect our Platform, business, revenue, bookings and our developers. In the United States, the SEC, its staff, and similar state regulators have deemed certain virtual currencies to be securities subject to regulation under the federal and state securities laws. While we do not consider Robux to be a security, if Robux were subject to the federal or state securities laws of the U.S., we may be required to redesign our Platform considerably, in a manner that would be disruptive to operations and costly to implement, which may threaten the viability of the Platform. We may also be subject to enforcement or other regulatory actions by federal or state regulators, as well as private litigation, which could be costly to resolve. For example, some existing laws regarding the regulation of currency, money transmitters and other financial institutions, and unclaimed property have been interpreted to cover virtual currencies, like Robux.

The increased use of interactive entertainment offerings like ours by consumers, including younger consumers, have prompted and may continue to prompt calls for more stringent consumer protection laws and regulations throughout the world that may impose additional burdens on companies such as ours making virtual currencies like Robux available for sale. The U.S. Consumer Financial Protection Bureau (“CFPB”) has announced that it is monitoring business practices in video gaming marketplaces and gaming currencies for compliance with federal consumer financial protection laws, and has proposed new interpretations of existing law that would regulate both under the Electronic Funds Transfer Act. Increased regulatory scrutiny may increase compliance obligations and require us to devote legal and other resources and make changes to our Platform to address such regulation, which may negatively impact our revenue and profitability. Any inability, or perceived inability, to comply with existing or new compliance obligations issued by the CFPB or any other regulatory authority could lead to regulatory investigations, or result in administrative or enforcement action, such as fines, penalties, and/or enforceable undertakings and adversely affect us and our results of operations.

Although we have structured our virtual currency, prepaid gift cards and the Developer Exchange Program with applicable laws and regulations in mind, in some jurisdictions, the application or interpretation of applicable laws and regulations is not clear and a regulator could subject us to monetary fines or other penalties such as a cease and desist order, or we may be required to make product changes, any of which could have an adverse effect on our business and financial results. If a relevant regulator disagreed with our analysis of and compliance with applicable laws, we may be required to seek licenses, authorizations, or approvals from those regulators, which may be dependent on us meeting certain capital and other requirements and may subject us to additional regulation and oversight, all of which could significantly increase our operating costs.

Regulatory scrutiny, changes in current laws or regulations or the imposition of new laws and regulations in the U.S. or elsewhere that prohibit us from making Robux available on our Platform would require us to make significant changes to our Platform or require us to take on more onerous compliance obligations, which would materially impair our business, financial condition, and operating results.

We are subject to various governmental export control, trade sanctions, and import laws and regulations that require our compliance and may subject us to liability if we violate these controls.

In some cases, our software and experiences are subject to export control laws and regulations, including the Export Administration Regulations administered by the U.S. Department of Commerce and trade and economic sanctions, including those administered by OFAC, which we collectively refer to as Trade Control Laws and Regulations. Thus, we are subject to laws and regulations that could limit our ability to offer access or full access to our Platform and experiences to certain persons and in certain countries or territories. For example, certain U.S. laws and regulations administered and enforced by OFAC, may limit our ability to give certain users, developers, and creators access to aspects of our Platform and experiences. Trade Control Laws and Regulations are complex and dynamic, and monitoring and ensuring compliance can be challenging. In addition, we rely on our payment processors for compliance with certain of these Trade Control Laws and Regulations, including preventing paid activity by users, developers, and creators that attempt to access our Platform from various jurisdictions comprehensively sanctioned by OFAC, including Cuba, Iran, North Korea, Syria, and sanctioned regions of Ukraine. Users, developers, and creators from certain of these countries and territories have access to our Platform and experiences and there can be no guarantee we will be found to have been in full compliance with Trade Control Laws and Regulations during all relevant periods. Any failure by us or our payment processors to comply with the Trade Control Laws and Regulations may lead to violations of the Trade Control Laws and Regulations that could expose us to liability. Additionally, following Russia's invasion of Ukraine, the United States and other countries imposed certain economic sanctions and severe export control restrictions against Russia and Belarus and have continued to strengthen these controls. These countries could impose even broader sanctions and additional export restrictions or take other actions that could impact our business. Any failure to comply with applicable laws and regulations could have negative consequences for us, including reputational harm, government investigations, and monetary penalties.

In addition, various foreign governments may also impose controls, export license requirements, and/or restrictions applicable to our Platform and experiences. Compliance with such applicable regulatory requirements may create delays in the introduction of our Platform in some international markets or prevent certain international users from accessing our Platform.

Changes in tax laws and unclaimed property audits by governmental authorities could have a material adverse effect on our business, cash flow, results of operations or financial conditions.

We are subject to tax laws, regulations, and policies of several taxing jurisdictions. Changes in tax laws, as well as other factors, could cause us to experience fluctuations in our tax liability and reporting obligations and effective tax rates and otherwise adversely affect our tax positions, cost of compliance, and/or our tax liabilities. Certain jurisdictions, such as Canada, the United Kingdom and France, have enacted a digital services tax on certain digital revenue streams. Other jurisdictions, such as Brazil, have proposed indirect tax reform which may impose value added tax on the sales of electronically supplied services. Such laws and other attempts to impose taxes on e-commerce activities would likely increase the cost to us of operating our business, discourage potential customers from subscribing to our Platform, or otherwise adversely affect our business, results of operations or financial conditions. In addition, a number of U.S. states, the U.S. federal government, and foreign jurisdictions have implemented and may impose reporting or recording-keeping obligations for digital platforms. These new requirements may require us to modify our data processing and reporting practices and policies, which may cause us to incur substantial costs and expenses to comply.

In addition, the Organization for Economic Cooperation and Development has proposed the Pillar One framework as part of the OECD/G20 Base Erosion and Profit Shifting Project, which would revise existing profit allocation and nexus rules to require profit allocation based on location of sales versus physical presence for certain large multinational businesses, but if implemented, could result in the removal of unilateral digital services tax initiatives described above.

Any developments or changes in federal, state, or international tax laws or tax rulings could adversely affect our compliance costs, effective tax rate, and our operating results.

In addition, we are subject to unclaimed property escheat laws which require us to turn over to certain government authorities the property of others held by us that has been unclaimed for a specified period of time. We are subject to state audits with regard to our escheatment practices. The legislation and regulations related to unclaimed property matters tend to be complex and subject to varying interpretations by government authorities. Although we believe that the positions we have taken are reasonable, authorities may challenge certain of the positions we have taken, which may also potentially result in additional liabilities for unclaimed property, interest and penalties in excess of accrued liabilities. An unfavorable resolution of assessments by a governmental authority could have a material adverse effect on our financial condition, results of operations and cash flows in future periods.

We are subject to the Foreign Corrupt Practices Act and similar anti-corruption and anti-bribery laws, and anti-money laundering laws, and non-compliance with such laws can subject us to criminal or civil liability and harm our business, financial condition and results of operations.

We are subject to the Foreign Corrupt Practices Act, U.S. domestic bribery laws, the UK Bribery Act and other anti-corruption and anti-bribery laws, and anti-money laundering laws in the countries in which we conduct activities. Anti-corruption and anti-bribery laws have been enforced aggressively in recent years and are interpreted broadly to generally prohibit companies, their employees, agents, representatives, business partners, and third-party intermediaries from authorizing, offering or providing, directly or indirectly, improper payments or benefits to recipients in the public or private sector in order to influence official action, direct business to any person, gain any improper advantage, or obtain or retain business. These laws also require that we keep accurate books and records and maintain internal controls and compliance procedures designed to prevent any such actions.

With regard to our international business, we have engaged with business partners and third-party intermediaries to market our solutions and obtain necessary permits, licenses, and other regulatory approvals. We or our employees, agents, representatives, business partners or third-party intermediaries have had direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities. We can be held liable for the corrupt or other illegal activities of our employees, agents, representatives, business partners or third-party intermediaries, even if we do not authorize such activities and notwithstanding having policies, training, and procedures designed to address compliance with these laws, we cannot assure you that no violations of our policies or these laws will occur.

Detecting, investigating, and resolving actual or alleged violations of anti-corruption and anti-bribery laws and anti-money laundering laws can require a significant diversion of time, resources, and attention from senior management, as well as significant defense costs and other professional fees. In addition, noncompliance with these laws could subject us to whistleblower complaints, investigations, sanctions, settlements, prosecution, enforcement actions, fines, damages, other civil or criminal penalties or injunctions against us, our officers, or our employees, disgorgement of profits, suspension or debarment from contracting with the U.S. government or other persons, reputational harm, adverse media coverage, and other collateral consequences. If any subpoenas or investigations are launched, or governmental or other sanctions are imposed, or if we do not prevail in any possible civil or criminal proceeding, our reputation, business, financial condition, prospects and results of operations and the price of our Class A common stock could be harmed. Responding to any investigation or action will likely result in a materially significant diversion of management's attention and resources and significant defense costs and other professional fees.

We may incur liability as a result of content published using our Platform or as a result of claims related to content generated by our developers, creators, and users, including copyright infringement, and legislation regulating content on our Platform may require us to change our Platform or business practices.

Our success relies in part on the ability of developers and creators to drive engagement with content that is challenging, engaging, fun, interesting, and novel. Developers and creators are responsible for clearing the rights to all of the content they upload to our service or physical goods that they make available for sale, but some developers or creators may upload content or link goods that infringes the rights or violates the terms of use of third parties in violation of our Terms of Use. We rely upon legal protections in various jurisdictions to protect us from claims of monetary damages for content that is uploaded to and stored on our system at the direction of our users, or counterfeit goods and copyright-infringing material made available for sale, but those protections may change or disappear over time, increasing our exposure for claims of copyright or other intellectual property infringement. If we should lose or fail to qualify for statutory or other legal protections that immunize us from monetary damages for intellectual property infringement, the damages could be significant and have a material impact on our business. While we have implemented measures designed to limit our exposure to claims of intellectual property infringement, intellectual property owners may allege that we failed to take appropriate measures to prevent infringing activities on our systems, that we turned a blind eye to infringement, or that we facilitated, induced or contributed to infringement.

Even though we are not required to monitor uploaded content for copyright infringement in the U.S., we have chosen to do so through the services of a third-party audio monitoring service. We now monitor all uploaded sound recordings to exclude recordings owned or controlled by the major record labels and any other record labels who provide their music to the third-party audio monitoring service. These record labels register certain of their content with our service provider. When audio is uploaded to our Platform, we check the service provider's system to exclude recordings owned or controlled by these record labels from being published on our Platform. If our monitoring proves ineffective or we cease to rely upon a third-party monitoring service to exclude certain content from our Platform, our risk of liability may increase.

In the past, certain record companies and music publishers, either directly or through their authorized representatives, claimed that we are subject to liability for allegedly infringing content that was uploaded and may continue to exist on our Platform. We vigorously disputed such claims of infringement by such labels and publishers and reached settlements. However, we could be subject to additional claims in the future. An adverse judgment against us in any such lawsuit could require us to settle any claims for an undetermined amount which could have a material impact on our business, financial condition, or results of operations.

We may also be required to enter into license agreements with various licensors, including record labels, music publishers, performing rights organizations, and collective management organizations, to obtain licenses that authorize the storage and use of content uploaded by our users. We may not be able to develop technological solutions to comply with these license agreements on economically reasonable terms and there is no guarantee that we will be able to enter into agreements with all relevant rights holders on terms that we deem reasonable. Compliance may therefore negatively impact our financial prospects.

The EU enacted copyright laws such as the Copyright Directive that came into effect on June 6, 2019, that may require us to use best efforts in accordance with the high industry standards of professional diligence to exclude infringing content from our Platform that may be uploaded by our users. In addition, the monitoring and reporting obligations of the DSA may apply also with respect to copyright infringements that would fall outside the scope of the Copyright Directive.

Risks Related to Intellectual Property

Claims by others that we infringe their proprietary technology or other rights, the activities of our users, or the content of the experiences on our Platform could subject us to liability and harm our business.

We have been and may in the future become subject to intellectual property disputes, costs, and awards of damages and/or injunctive relief as a result of these disputes, and we are subject to liability for our intellectual property that we license to third parties. Our success depends, in part, on our ability to develop and commercialize our Platform without infringing, misappropriating, or otherwise violating the intellectual property rights of third parties. However, there is no assurance that our technologies or Platform will not be found to infringe, misappropriate, or otherwise violate the intellectual property rights of third parties. We also have entered into agreements with third parties to manufacture and distribute merchandise based on user content on our Platform, and there is a possibility that such content could be found to be infringing. Lawsuits are time-consuming and expensive to resolve and they divert management's time and attention. Further, because of the substantial amount of discovery required in connection with intellectual property litigation, we risk compromising our confidential information during this type of litigation. Companies in the internet, technology, and gaming industries own large numbers of patents, copyrights, trademarks, domain names, and trade secrets and frequently enter into litigation based on allegations of infringement, misappropriation, or other violations of intellectual property or other rights. As we face increasing competition and gain a higher profile, the possibility of intellectual property rights and other claims against us grows. Our technologies may not be able to withstand any third-party claims against their use. In addition, many companies have the capability to dedicate substantially greater resources to enforce their intellectual property rights and to defend claims that may be brought against them.

We have a number of issued patents. We have also filed a number of additional U.S. and foreign patent applications, but these applications may not successfully result in issued patents. Any patent litigation against us may involve patent holding companies or other adverse patent owners that have no relevant product revenue, and therefore, our patents and patent applications may provide little or no deterrence as we would not be able to reach meaningful damages if we assert them against such entities or individuals. If a third party is able to obtain an injunction preventing us from exercising intellectual property rights, or if we cannot license or develop alternative technology for any infringing aspect of our business, we could be forced to limit or cease access to our Platform or cease business activities related to such intellectual property. In addition, we may need to settle litigation and disputes on terms that are unfavorable to us. We may be required to make substantial payments for legal fees, settlement fees, damages, royalties, license, or other fees in connection with a claimant securing a judgment against us. Although we carry general liability insurance, our insurance may not cover potential claims of this type or may not be adequate to cover all liability that may be imposed. We cannot predict the outcome of lawsuits and cannot ensure that the results of any such actions will not have an adverse effect on our business, financial condition, or results of operations. Any intellectual property claim asserted against us, or for which we are required to provide indemnification, may require us to cease selling or using or to recall products that incorporate the intellectual property rights that we allegedly infringe, misappropriate, or violate; make substantial payments for legal fees, settlement payments, or other costs or damages; obtain a license, which may not be available on reasonable terms or at all, to sell or use the relevant technology; or redesign or rebrand the allegedly infringing products to avoid infringement, misappropriation, or violation, which could be costly, time-consuming, or impossible.

Furthermore, certain federal statutes in the U.S. may apply to us with respect to various activities of our users, including the Digital Millennium Copyright Act of 1998 (“DMCA”) and Section 230 of the Communications Decency Act (“CDA”). For example, we filter communications to eliminate speech we determine to be offensive based on our objective of creating a civil and safe place for all users. Bills have recently been proposed in Congress calling for a range of changes to Section 230 of the CDA which include a complete repudiation of the statute to modifications of it in such a way as to remove certain social media companies from its protection. The FCC may also consider reforms to Section 230 of the CDA, which could include taking action to limit the scope of Section 230 of the CDA and certain liability protections provided to online service providers and other entities. The U.S. Supreme Court has also heard two cases in its most recent term that may result in substantial changes to the scope of protection provided to interactive computer services such as Roblox. If Section 230 of the CDA were so repealed, amended, or modified by judicial determination we could potentially be subject to liability if we continue to censor speech, even if that speech were offensive to our users, or we could experience a decrease in user activity and revenues if we are unable to maintain a safe environment for our users if certain blocking and screening activities are prohibited by law. In addition, certain states have either passed or are debating laws that would create potential liability for moderating or removing certain user content. While we believe these laws are of dubious validity under the U.S. Constitution and in light of Section 230 of the CDA, they nevertheless present some risk to our content-moderation efforts going forward.

While we rely on a variety of statutory and common-law frameworks and defenses, including those provided by the DMCA, the CDA, the fair-use doctrine in the U.S. and the DSA in the EU, differences between statutes, limitations on immunity, requirements to maintain immunity, and moderation efforts in the many jurisdictions in which we operate may affect our ability to rely on these frameworks and defenses, or create uncertainty regarding liability for information or content uploaded by developers, creators, or users or otherwise contributed by third parties to our Platform. As an example, Article 17 of the Directive on Copyright in the Digital Single Market was passed in the EU, which affords copyright owners some enforcement rights that may conflict with U.S. safe harbor protections afforded to us under the DMCA. Member states in the EU are in the process of determining how Article 17 will be implemented in their particular country. In addition, the EU’s DSA became fully applicable on February 17, 2024. The DSA imposes additional obligations as provided under the E-Commerce Directive and includes new content moderation obligations, notice and transparency obligations, advertising restrictions and other requirements on digital platforms to protect consumers and their rights online. In countries in Asia and Latin America, generally there are no similar statutes to the CDA or the DSA. The laws of countries in Asia and Latin America generally provide for direct liability if a platform is involved in creating such content or has actual knowledge of the content without taking action to take it down. Further, laws in some Asian countries also provide for primary or secondary liability, which can include criminal liability, if a platform fails to take sufficient steps to prevent such content from being uploaded. Although these and other similar legal provisions provide limited protections from liability for platforms like ours, if we are found not to be protected by the safe harbor provisions of the DMCA, CDA or other similar laws, or if we are deemed subject to laws in other countries that may not have the same protections or that may impose more onerous obligations on us, including Article 17, we may owe substantial damages, and our brand, reputation, and financial results may be harmed.

Additionally, any content used to create, or created by using, generative AI tools may not be subject to copyright protection, the determination of which may adversely affect our intellectual property rights in, or ability to commercialize or use, such tools or the content. In the United States, a number of civil lawsuits have been initiated related to the foregoing and other issues, the outcome of any one of which may, amongst other things, require us to limit the ways in which we use AI in our business. While AI-related lawsuits to date have generally focused on the AI service providers themselves, our use of any output produced by generative AI tools may expose us to claims, increasing our risks of liability.

Even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and harm our business and operating results. Moreover, there could be public announcements of the results of hearings, motions, or other interim proceedings or developments, and if securities analysts or investors perceive these results to be negative, it could have a substantial adverse effect on the price of our Class A common stock. We expect that the occurrence of asserted infringement claims will grow as the market for our Platform grows. Accordingly, our exposure to damages resulting from infringement claims could increase, and this could further exhaust our financial and management resources.

Indemnity provisions in various agreements potentially expose us to substantial liability for intellectual property infringement and other losses.

Some of our agreements with third parties include indemnification provisions under which we agree to indemnify these third parties for losses suffered or incurred as a result of claims of intellectual property infringement, or other liabilities relating to or arising from our software, services, Platform, or other contractual obligations. Large indemnity payments could harm our business, results of operations, and financial condition. Although we typically contractually limit our liability with respect to such indemnity obligations, those limitations may not be fully enforceable in all situations, and we may still incur substantial liability under the applicable agreements. Any dispute with a third-party with respect to such obligations could have adverse effects on our relationship with such a party and harm our business and results of operations.

Failure to protect or enforce our intellectual property rights or the costs involved in such enforcement would harm our business.

Our success depends to a significant degree on our ability to obtain, maintain, protect, and enforce our intellectual property rights, including our proprietary software technology, our know-how, and our brand. We rely on a combination of trademarks, trade secret laws, patents, copyrights, service marks, contractual restrictions, and other intellectual property laws and confidentiality procedures to establish and protect our proprietary rights. However, the steps we take to obtain, maintain, protect, and enforce our intellectual property rights may be inadequate. We will not be able to protect our intellectual property rights if we are unable to enforce our rights or if we do not detect unauthorized use of our intellectual property rights. If we fail to protect our intellectual property rights adequately, or fail to continuously innovate and advance our technology, our competitors could gain access to our proprietary technology and develop and commercialize substantially identical products, services, or technologies. In addition, defending our intellectual property rights might entail significant expense and may not ultimately be successful.

Further, any patents, trademarks, or other intellectual property rights that we have or may obtain may be challenged or circumvented by others or invalidated or held unenforceable through administrative processes, including re-examination, inter partes review, interference and derivation proceedings, and equivalent proceedings in foreign jurisdictions, such as opposition proceedings or litigation. In addition, despite our pending patent applications, there is no assurance that our patent applications will result in issued patents. Even if we continue to seek patent protection in the future, we may be unable to obtain or maintain patent protection for our technology. In addition, any patents issued from pending or future patent applications or licensed to us in the future may not provide us with competitive advantages or may be successfully challenged by third parties. Furthermore, legal standards relating to the validity, enforceability, and scope of protection of intellectual property rights are uncertain. Despite our precautions, it may be possible for unauthorized third parties to copy our Platform and use information that we regard as proprietary to create products that compete with ours. Patent, trademark, copyright, and trade secret protection may not be available to us in every country in which our products are available. The value of our intellectual property could diminish if others assert rights in or ownership of our trademarks and other intellectual property rights, or trademarks that are similar to our trademarks. We may be unable to successfully resolve these types of conflicts to our satisfaction. In some cases, litigation or other actions may be necessary to protect or enforce our trademarks and other intellectual property rights. In addition, the laws of some foreign countries may not be as protective of intellectual property rights as those in the U.S., and mechanisms for enforcement of intellectual property rights may be inadequate. As we expand our global activities, our exposure to unauthorized copying and use of our Platform and proprietary information will likely increase.

We rely, in part, on trade secrets, proprietary know-how, and other confidential information to maintain our competitive position. While we enter into confidentiality and invention assignment agreements with our employees and consultants and enter into confidentiality agreements with other third parties, including suppliers and other partners, we cannot guarantee that we have entered into such agreements with every entity that has or may have had access to our proprietary information, know-how, and trade secrets or that has or may have developed intellectual property in connection with an engagement with us. Moreover, there are no assurances that these agreements will be effective in controlling access to, distribution, use, misuse, misappropriation, reverse engineering, or disclosure of our proprietary information, know-how, and trade secrets. Further, these agreements may not prevent our competitors from independently developing technologies that are substantially equivalent or superior to our Platform. These agreements may be breached, and we may not be able to detect any such breach and may not have adequate remedies for any such breach even if we know about it.

We use open source software as part of, and in connection with certain experiences on, our Platform, which may pose particular intellectual property and security risks to and could have a negative impact on our business.

We have in the past and may in the future continue to use open source software in our codebase and our Platform. Some open source software licenses require users who make available open source software as part of their proprietary software to publicly disclose all or part of the source code to such proprietary software or make available any derivative works of such software free of charge, under open source licensing terms. The terms of various open source licenses have not been interpreted by courts, and there is a risk that such licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our use of the open source software. Enforcement activity for open source licenses can also be unpredictable. Were it determined that our use was not in compliance with a particular license, we may be required to release our proprietary source code, defend claims, pay damages for breach of contract or copyright infringement, grant licenses to our patents, re-engineer our games or products, discontinue distribution in the event re-engineering cannot be accomplished on a timely basis, or take other remedial action that may divert resources away from our game development efforts, any of which could negatively impact our business. Open source compliance problems can also result in damage to reputation and challenges in recruitment or retention of engineering personnel. Although we have certain policies and procedures in place to monitor our use of open-source software that are designed to avoid subjecting our Platform to open source licensing conditions, those policies and procedures may not be effective to detect or address all such conditions.

Additionally, although we devote significant resources to ensuring the security of our use of open source software on our Platform, we cannot ensure that these security measures will be sufficient to prevent or mitigate the damage caused by a cybersecurity incident or network disruption, and our open source software may be vulnerable to hacking, insider threats, employee error or manipulation, theft, system malfunctions, or other adverse events.

Risks Related to Ownership of our Class A Common Stock

The public trading price of our Class A common stock is volatile and could decline regardless of our operating performance.

To date, the public trading price of our Class A common stock has been volatile, similar to other newly public companies that have historically experienced highly volatile trading prices. The public trading price of our Class A common stock may fluctuate in response to various factors, including those listed in this financial report, some of which are beyond our control. These fluctuations could cause you to lose all or part of your investment in our Class A common stock since you might be unable to sell your shares at or above the price you paid. Factors that could cause fluctuations in the public trading price of our Class A common stock include the following:

- the number of shares of our Class A common stock made available for trading;
- sales or expectations with respect to sales of shares of our Class A common stock by holders of our Class A common stock including our directors, officers, and significant holders;
- price and volume fluctuations in the overall stock market from time to time;
- volatility in the trading prices and trading volumes of technology stocks;
- changes in operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;
- failure of securities analysts to maintain coverage of us, changes in financial estimates by securities analysts who follow us or our failure to meet these estimates or the expectations of investors;
- any plans we may have to provide or not provide disclosure about certain key metrics, financial guidance, or projections, which may increase the probability that our financial results are perceived as not in line with analysts' expectations;
- if we do provide disclosure about certain key metrics, financial guidance, or projections, any changes to such reported items due to changes in our methodology or underlying assumptions for those items and with respect to timing or our failure to meet those projections;
- announcements by us or our competitors of new services or Platform features;
- the public's reaction to our press releases, other public announcements, and filings with the SEC;
- rumors, market speculation, and media reports involving us or other companies in our industry;
- actual or anticipated changes in our results of operations or fluctuations in our results of operations;
- actual or anticipated developments in our business, our competitors' businesses, or the competitive landscape generally;
- litigation involving us, our industry or both, or investigations by regulators into our operations or those of our competitors;
- actual or perceived privacy or security breaches or other incidents;

- developments or disputes concerning our intellectual property or other proprietary rights;
- announced or completed acquisitions of businesses, services, or technologies by us or our competitors;
- new laws or regulations, public expectations regarding new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidelines, interpretations, or principles;
- any significant change in our management or other key personnel;
- other events or factors, including those resulting from war, such as Russia's invasion of Ukraine and the conflict in the Middle East stemming from Hamas' attack against Israel, incidents of terrorism, pandemics, or wildfires, earthquakes or severe weather and power outages or responses to these events; and
- general economic conditions and slow or negative growth of our markets.

In addition, stock markets, and the market for technology companies in particular, have experienced price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. Stock prices of many companies, including technology companies, have fluctuated in a manner often unrelated to the operating performance of those companies. In the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources. In addition, we may be subject to stockholder activism, which can lead to additional substantial costs, distract management, and impact the manner in which we operate our business in ways we cannot currently anticipate.

The dual class stock structure of our common stock has the effect of concentrating voting control in David Baszucki, our Founder, President, CEO, and Chair of our Board of Directors, which limits or precludes your ability to influence corporate matters, including the election of directors and the approval of any change of control transaction.

Our Class B common stock has 20 votes per share, and our Class A common stock has one vote per share. Our Founder, President, CEO, Chair of our Board of Directors, and largest stockholder, David Baszucki, and his affiliates, beneficially own 100% of our outstanding Class B common stock, together as a single class, representing a substantial percentage of the voting power of our capital stock, which voting power may increase over time as Mr. Baszucki exercises or vests in his equity awards. Mr. Baszucki and his affiliates could exert substantial influence over matters requiring approval by our stockholders. This concentration of ownership may limit or preclude your ability to influence corporate matters for the foreseeable future, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval. In addition, this may prevent or discourage unsolicited acquisition proposals or offers for our capital stock that you may believe are in your best interest as one of our stockholders. We believe we are eligible for, but do not intend to take advantage of, the "controlled company" exemption to the corporate governance rules for NYSE-listed companies. We cannot predict whether our dual class structure will result in a lower or more volatile trading price of our Class A common stock, in adverse publicity, or other adverse consequences. The dual class structure of our common stock may trigger actions or publications by stockholder advisory firms or institutional investors critical of our corporate governance practices or capital structure, which could result in the trading price of our Class A common stock being adversely affected. Delaware law and provisions in our amended and restated certificate of incorporation and amended and restated bylaws could make a merger, tender offer, or proxy contest difficult, thereby depressing the market price of our Class A common stock.

If securities or industry analysts or other third parties do not publish research or publish inaccurate or unfavorable research about us, our business, or our market, or if they change their recommendation regarding our Class A common stock adversely, the market price and trading volume of our Class A common stock could decline.

The market price and trading volume for our Class A common stock will depend in part on the research and reports that securities or industry analysts and other third parties publish about us, our business, our market or our competitors. The analysts' estimates are based upon their own opinions and are often different from our estimates or expectations or incorrect. If any of the analysts who cover us change their recommendation regarding our Class A common stock adversely, provide more favorable relative recommendations about our competitors or publish inaccurate or unfavorable research about our business, the price of our Class A common stock would likely decline. If few securities analysts commence coverage of us, or if one or more of these analysts cease coverage of us or fail to publish reports on us regularly, we could lose visibility in the financial markets and demand for our securities could decrease, which could cause the price and trading volume of our Class A common stock to decline. In addition, third parties regularly publish data about us and other mobile, gaming, and social platform companies with respect to DAUs, revenue, bookings, top experience, or game charts, hours engaged and other information concerning social game application usage. These metrics are proprietary to the provider, and in many cases do not accurately reflect the actual levels of bookings, revenue, or usage of our experiences across all platforms. There is a possibility that third parties could change their methodologies for calculating these metrics in the future. For example, short sellers have and may in the future publish reports relying in part on such metrics. These reports appear intended to decrease the price of our Class A common stock and have resulted in and may result in claims, litigation, or investigations due to any published allegations by shareholders, regulators, and others. To the extent that securities analysts or investors base their views of our business or prospects on such third-party data, including reports of short sellers, the price of our Class A common stock may be volatile and may not reflect the performance of our business.

Delaware law and provisions in our amended and restated certificate of incorporation and amended and restated bylaws could make a merger, tender offer, or proxy contest difficult, thereby depressing the market price of our Class A common stock.

Our status as a Delaware corporation and the anti-takeover provisions of the Delaware General Corporation Law may discourage, delay, or prevent a change in control by prohibiting us from engaging in a business combination with an interested stockholder for a period of three years after the date of the transaction in which the person became an interested stockholder, even if a change of control would be beneficial to our existing stockholders. In addition, our amended and restated certificate of incorporation and amended and restated bylaws will contain provisions that may make the acquisition of our company more difficult, including the following:

- any amendments to our amended and restated certificate of incorporation or our amended and restated bylaws will require the approval of at least 66 2/3% of our then-outstanding voting power;
- our Board of Directors is classified into three classes of directors with staggered three-year terms and stockholders will only be able to remove directors from office for cause;
- upon the conversion of our Class A common stock and Class B common stock into a single class of common stock, our stockholders will only be able to take action at a meeting of stockholders and will not be able to take action by written consent for any matter;
- our amended and restated certificate of incorporation does not provide for cumulative voting;
- vacancies on our Board of Directors will be able to be filled only by our Board of Directors and not by stockholders;
- a special meeting of our stockholders may only be called by the chairperson of our Board of Directors, our CEO, our President, or a majority of our Board of Directors;
- certain litigation against us can only be brought in Delaware;
- our amended and restated certificate of incorporation authorizes 100 million shares of undesignated preferred stock, the terms of which may be established and shares of which may be issued without further action by our stockholders; and
- advance notice procedures apply for stockholders to nominate candidates for election as directors or to bring matters before an annual meeting of stockholders.

These provisions, alone or together, could discourage, delay, or prevent a transaction involving a change in control of our company. These provisions could also discourage proxy contests and make it more difficult for stockholders to elect directors of their choosing and to cause us to take other corporate actions they desire, any of which, under certain circumstances, could limit the opportunity for our stockholders to receive a premium for their shares of our Class A common stock, and could also affect the price that some investors are willing to pay for our Class A common stock.

Our amended and restated bylaws provide that the Court of Chancery of the State of Delaware and the federal district courts of the United States will be the exclusive forums for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or employees.

Our amended and restated bylaws provide that the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, another State court in Delaware or the federal district court for the District of Delaware) is the exclusive forum for the following (except for any claim as to which such court determines that there is an indispensable party not subject to the jurisdiction of such court (and the indispensable party does not consent to the personal jurisdiction of such court within ten days following such determination), which is vested in the exclusive jurisdiction of a court or forum other than such court or for which such court does not have subject matter jurisdiction):

- any derivative action or proceeding brought on behalf of us;
- any action asserting a claim of breach of a fiduciary duty;
- any action asserting a claim against us arising under the Delaware General Corporation Law, our amended and restated certificate of incorporation or our amended and restated bylaws (as either may be amended from time to time); and
- any action asserting a claim against us that is governed by the internal affairs doctrine.

This provision would not apply to suits brought to enforce a duty or liability created by the Exchange Act, or any other claim for which the U.S. federal courts have exclusive jurisdiction.

Our amended and restated bylaws further provide that the federal district courts of the U.S. will be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act. These exclusive-forum provisions may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers, or other employees, which may discourage lawsuits against us and our directors, officers, and other employees. Any person or entity purchasing or otherwise acquiring any interest in any of our securities shall be deemed to have notice of and consented to these provisions. There is uncertainty as to whether a court would enforce such provisions, and the enforceability of similar choice of forum provisions in other companies' charter documents has been challenged in legal proceedings. We also note that stockholders cannot waive compliance (or consent to noncompliance) with the federal securities laws and the rules and regulations thereunder. It is possible that a court could find these types of provisions to be inapplicable or unenforceable, and if a court were to find either exclusive-forum provision in our amended and restated bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving the dispute in other jurisdictions, which could significantly harm our business.

We do not expect to pay dividends in the foreseeable future.

We have never declared nor paid cash dividends on our capital stock. We currently intend to retain any future earnings to finance the operation and expansion of our business, and we do not anticipate declaring or paying any dividends to holders of our capital stock in the foreseeable future. Consequently, you may need to rely on sales of our Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on your investment.

Risks Related to our Indebtedness

We may not be able to generate sufficient cash to service our debt and other obligations, including our obligations under the 2030 Notes.

Our ability to make payments on our indebtedness, including the 2030 Notes, and our other obligations will depend on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business, and other factors beyond our control. We cannot assure you that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness, including the 2030 Notes, and other obligations.

If we are unable to service our debt and other obligations from cash flows, we may need to refinance or restructure all or a portion of our debt obligations prior to maturity. Our ability to refinance or restructure our debt and other obligations will depend on various factors, including the condition of the capital markets and our financial condition at such time. Any refinancing or restructuring could be at higher interest rates, less favorable terms, or may require us to comply with more onerous covenants, which could further restrict our business operations. If our cash flows are insufficient to service our debt and other obligations, we may not be able to refinance or restructure any of these obligations on commercially reasonable terms or at all. Any refinancing or restructuring could have a material adverse effect on our business, results of operations, or financial condition.

If our cash flows are insufficient to fund our debt and other obligations and we are unable to refinance or restructure these obligations, we could face substantial liquidity problems and may be forced to reduce or delay investments and capital expenditures, or to sell material assets or operations to meet our debt and other obligations. We cannot assure you that we would be able to implement any of these alternative measures on satisfactory terms (if at all) or that the proceeds from such alternatives would be adequate to meet any debt or other obligations then due. If it becomes necessary to implement any of these alternative measures, our business, results of operations, or financial condition could be materially and adversely affected.

Our indebtedness could have adverse consequences to us.

Our indebtedness could have adverse consequences to us, including the following:

- making it more difficult for us to satisfy our obligations with respect to the 2030 Notes and our other indebtedness;
- requiring us to dedicate a substantial portion of our cash flow from operations to debt service payments on our and our subsidiaries' debt, which reduces the funds available for working capital, capital expenditures, acquisitions, and other general corporate purposes;
- requiring us to comply with restrictive covenants in the Indenture, which limit the manner in which we conduct our business;
- limiting our flexibility in planning for, or reacting to, changes in the industry in which we operate;
- placing us at a competitive disadvantage compared to any of our less leveraged competitors;
- increasing our vulnerability to both general and industry-specific adverse economic conditions; and
- limiting our ability to obtain additional debt or equity financing to fund future working capital, capital expenditures, acquisitions or other general corporate requirements and increasing our cost of borrowing.

General Risks

If we are unable to maintain effective disclosure and internal controls over financial reporting, our ability to produce timely and accurate financial statements or comply with applicable regulations may be impaired.

We are subject to the reporting requirements of the Securities Exchange Act of 1934, as amended ("the Exchange Act"), the Sarbanes-Oxley Act, and the rules and regulations of the listing standards of the NYSE. The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. Our disclosure controls and other procedures are designed to ensure that information required to be disclosed by us in the reports that we will file with the SEC is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms and that information required to be disclosed in reports under the Exchange Act is accumulated and communicated to our principal executive and financial officers.

Our current controls and any new controls that we develop may become inadequate because of changes in conditions in our business. In addition, changes in accounting principles or interpretations could also challenge our internal controls and require that we establish new business processes, systems, and controls to accommodate such changes. If these new systems, controls, or standards and the associated process changes do not operate as intended, it could adversely affect our financial reporting systems and processes, our ability to produce timely and accurate financial reports, or the effectiveness of internal control over financial reporting. Moreover, our business may be harmed if we experience problems with any new systems and controls that result in delays in their implementation or increased costs to correct any post-implementation issues that may arise. We have identified in the past, and may identify in the future, deficiencies in our controls, which could harm our results of operations or cause us to fail to meet our reporting obligations and may result in a restatement of our financial statements for prior periods. If we are not able to, or if we are perceived as being unable to, comply with the requirements of the Sarbanes-Oxley Act in a timely manner, or if we are unable to, or if we are perceived as being unable to, maintain proper and effective internal controls over financial reporting, we may not be able to produce timely and accurate financial statements. If that were to happen, our investors could lose confidence in our reported financial information, the trading price of our Class A common stock could decline, and we have been and could be subject to increased regulatory scrutiny, including sanctions or investigations by the SEC or other regulatory authorities. Any failure to implement and maintain effective internal control over financial reporting also could adversely affect the results of periodic management evaluations and annual independent registered public accounting firm attestation reports.

Any legal proceedings or claims against us could be costly and time-consuming to defend and could harm our reputation regardless of the outcome.

We are and/or may in the future become subject to legal proceedings and claims that arise in the ordinary course of business, including intellectual property, privacy, biometrics, cybersecurity, data protection, product liability, consumer protection, false and misleading advertising, employment, class action, whistleblower, contract, securities, tort, civil Racketeer Influenced and Corrupt Organizations Act, human trafficking, unfair competition, and other litigation claims, including claims related to our advertising practices and use of generative AI, and governmental and other regulatory investigations and proceedings. As a result of disclosure of information in filings required of a public company, our business and financial condition will become more visible, which may result in threatened or actual litigation, including by competitors. We are and may continue to be subject to legal proceedings asserting claims arising from allegations that we have facilitated gambling by users of our Platform including by minors, that we have misrepresented the safety of our Platform, that our Platform is addictive or otherwise unsafe, that we unlawfully or unfairly benefit from child labor, and that we have misrepresented information about our user base, that we have engaged in copyright infringement, that we have engaged in unlawful employment practices, and suits related to our refund policies. In lawsuits brought on behalf of child users, the court may allow minors to disaffirm or avoid enforcement of our Terms of Use, depending on the circumstances. We have and may continue to be subject to legal proceedings asserting claims on behalf of shareholders related to allegations that discussions of our growth prospects have been misleading and unsustainable due to concerns related to safety and our implementation of parental controls on the Platform and claims that our leadership has engaged in insider trading. In particular, on August 1, 2023, a putative class action was filed against us in the United States District Court for the Northern District of California captioned *Colvin v. Roblox* asserting various claims arising from allegations that minors used third-party virtual casinos to gamble Robux and on March 14, 2024, *Gentry v. Roblox* was filed in the United States District Court for the Northern District of California premised on substantially identical allegations as *Colvin v. Roblox*. The two cases were consolidated on April 18, 2024. Such matters can be time-consuming, divert management's attention and resources, cause us to incur significant expenses or liability, or require us to change our business practices. The expense of litigation and the timing of this expense from period to period are difficult to estimate, subject to change, and could adversely affect our financial condition and results of operations. Because of the potential risks, expenses, and uncertainties of litigation, we may, from time to time, settle disputes, even where we have meritorious claims or defenses, by agreeing to settlement agreements. Any of the foregoing could adversely affect our business, financial condition, and results of operations.

Catastrophic events may disrupt our business.

Natural disasters or other catastrophic events may cause damage or disruption to our operations, international commerce, and the global economy, and thus could harm our business. We have our headquarters and a large employee presence in San Mateo, California, an area which in recent years has been increasingly susceptible to fires, severe weather events, and power outages, any of which could disrupt our operations, and which contains active earthquake zones. In the event of a major earthquake, hurricane, or catastrophic event such as fire, power loss, rolling blackouts or power loss, telecommunications failure, pandemic, geopolitical conflict such as the Russian invasion of Ukraine and the conflict in the Middle East stemming from Hamas' attack against Israel, cyber-attack, war, other physical security threats or terrorist attack, we may be unable to continue our operations and may endure system interruptions, reputational harm, delays in our Platform development, lengthy interruptions in our Platform, breaches of security, and loss of critical data, all of which would harm our business, results of operations, and financial condition. Acts of terrorism and similar events would also cause disruptions to the internet or the economy as a whole. Global climate change could also result in natural disasters occurring more frequently or with more intense effects, which could cause business interruptions. The long-term effects of the COVID-19 pandemic and recovery from it on society and developer, creator, and user engagement remain uncertain, and a subsequent health crisis or pandemic, as well as the actions taken by various governmental, business and individuals in response, will impact our business, operations and financial results in ways that we may not be able to accurately predict. In addition, the insurance we maintain would likely not be adequate to cover our losses resulting from disasters or other business interruptions. Our disaster recovery plan may not be sufficient to address all aspects of any unanticipated consequence or incident, we may not be able to maintain business continuity at profitable levels or at all, and our insurance may not be sufficient to compensate us for the losses that could occur.

Our operations are subject to the effects of changing inflation rates and volatile global economic conditions.

The United States, Europe, and other key global markets have recently experienced historically high levels of inflation. If the inflation rate continues to increase, it will likely affect all of our expenses, including, but not limited to, employee compensation expenses and energy expenses and it may reduce consumer discretionary spending, which could affect the buying power of our users, developers, and creators and lead to a reduced demand for our Platform.

Geopolitical developments, such as the war in Ukraine, the conflict in the Middle East stemming from the Hamas attack against Israel, and tensions with China, and the responses by central banking authorities to control inflation, can increase levels of political and economic unpredictability globally and increase the volatility of global financial markets. Adverse macroeconomic conditions, including lower consumer confidence, persistent unemployment, wage and income stagnation, slower growth or recession, changes to fiscal and monetary policy, inflation, changes in interest rates, currency fluctuations, economic and trade sanctions, the availability and cost of credit, and the strength of the economies in which we and our users are located, have adversely affected and may continue to adversely affect our consolidated financial condition and results of operations.

Additionally, we maintain cash balances at third-party financial institutions in excess of the Federal Deposit Insurance Corporation (the "FDIC") insurance limit. If the financial conditions affecting the banking industry and financial markets cause additional banks and financial institutions to enter receivership or become insolvent, our ability to access our existing cash, cash equivalents and investments, or to draw on our existing lines of credit, may be threatened and could have a material adverse effect on our business and financial condition.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

We have an enterprise-wide information security program that is designed to identify, protect, detect, and respond to significant cybersecurity risks and threats and we have integrated this program into our overall enterprise risk management systems and processes. We routinely assess material risks from cybersecurity threats, including taking reasonable steps to detect any potential unauthorized occurrence on or behaviors conducted through our information systems that may result in adverse effects on the confidentiality, integrity, or availability of our information systems or any information residing therein. We maintain an incident response plan designed to identify, evaluate, respond to, and recover from a cybersecurity incident. The plans are designed to be flexible so that they may be adapted to an array of potential scenarios, and provide for the creation of cross-functional incident response teams in the event of a cybersecurity incident. We also periodically conduct testing, simulations, and tabletop exercises to help support our overall preparedness for a cybersecurity incident.

Risk Management and Strategy

We conduct periodic risk assessments to identify significant cybersecurity threats that may affect information systems that are vulnerable to such cybersecurity threats and regularly review these risk assessments for changes in our business practices and the external cybersecurity landscape as well as the impacts of our security processes. These risk assessments include identification of reasonably foreseeable internal and external risks and evaluation of the likelihood and potential damage that could result from the realization of such risks.

Following our risk assessments, we evaluate when and how to design, implement, and maintain reasonable safeguards to minimize the identified risks and address any identified gaps in existing safeguards, and proceed with such design, implementation, and maintenance as deemed appropriate. We devote significant resources and designate high-level personnel, including our Chief Information Security Officer ("CISO") who reports to our Chief People and Systems Officer, to manage the risk assessment and mitigation process. Our CISO has served in various roles in information technology and information security for over 15 years, including leading information security initiatives and incident response at two other large public companies and serving as the Chief Security Officer for the Arkansas Department of Human Services and working for the United States Department of Defense. He has an MS in Information Assurance from the University of Advanced Technology in Arizona and a BS in Computer Science from the University of Arkansas at Little Rock.

All employees receive cybersecurity training during their onboarding. In addition, we have implemented a cybersecurity awareness program designed to educate employees on best security practices, emerging risk areas, and how to identify and report security threats. We include security expectations in employee performance management systems. We also engage third-party service providers in connection with our risk assessment process and certain risk management processes. Our collaboration with these third-party service providers includes threat assessments, risk analyses, assessments of the effectiveness of our cybersecurity program, policies and practices, and consultations on opportunities and potential enhancements to strengthen our cybersecurity program.

We perform risk-tiered information security risk reviews for certain third-party service providers who have access to sensitive Company, user or employee information, reviewing areas such as data protection, endpoint management and protection, phishing, business continuity, and incident response management. We contractually require certain third-party service providers with access to our information technology systems, sensitive business data, and/or personal information to implement and maintain appropriate security controls and provide for contractual restrictions on their ability to use our data. Certain of our service providers are contractually required to notify us promptly of information security incidents that may affect our systems or data, including personal information.

We also share and receive threat intelligence with federal, state, and local government agencies, peers and other organizations, information sharing and analysis centers, and cybersecurity associations.

Governance

Our Board of Directors has the ultimate responsibility for the oversight of our risk management framework, which is designed to identify, assess, and manage risks to which our Company is exposed, as well as to foster a corporate culture of integrity. Management is responsible for the day-to-day oversight and management of strategic, operational, legal and compliance, cybersecurity, and financial risks.

The Audit and Compliance Committee (the "ACC") is central to the Board of Directors' oversight of cybersecurity risks and has been delegated the primary responsibility for this domain. The ACC is composed of independent board members with diverse expertise including risk management, technology, and finance, equipping them to oversee cybersecurity risks effectively. The ACC has also engaged a cybersecurity advisor to assist them in cybersecurity matters. In overseeing the Company's cybersecurity risks and mitigation strategies, at least quarterly the CISO, members of management, and the ACC's cybersecurity advisor, review and discuss with the ACC guidelines, practices and policies to identify, monitor, and address enterprise risks, including cybersecurity risks. The ACC then oversees and monitors management's plans to address such risks.

Our CISO, and management committee on cybersecurity consisting of our Chief People and Systems Officer, General Counsel, Chief Financial Officer, and CISO, are primarily responsible for assessing and managing our material risks from cybersecurity threats and overseeing our cybersecurity policies and processes, including those described in "Risk Management and Strategy" above. The processes by which our CISO, and our management committee on cybersecurity, are informed about and monitor the prevention, detection, mitigation, and remediation of cybersecurity incidents includes both manual reviews and automated reviews of our systems and data, a bug bounty program, self-reporting, participation in information sharing forums on cybersecurity, proactive education of our service providers and product and application security reviews.

In the event of a cybersecurity incident, the CISO is equipped with a well-defined incident response plan to guide response actions. This incident response plan includes immediate actions to assess and mitigate the impact of the incident, long-term strategies for remediation and prevention of future incidents, and provides for internal notification of the incident functional areas (e.g. legal) as well as senior leadership and the ACC of the Board of Directors, as appropriate.

Our CISO provides briefings to the ACC at least quarterly regarding, among other topics, recent notable cybersecurity incidents, even if immaterial, and the Company's response, cybersecurity systems testing results, the Company's cybersecurity threat landscape, which includes emerging risks and threats, compliance with regulatory requirements and industry standards.

Notwithstanding the extensive approach we take to cybersecurity, including managing associated risks, we may not be successful in managing risks from cybersecurity threats, including identifying, preventing, or mitigating a cybersecurity incident that could have a material adverse effect on us. While we maintain cybersecurity insurance, the costs related to cybersecurity threats or disruptions may not be fully insured.

During the last fiscal year, we did not identify any risks from cybersecurity threats, including as a result of any previous cybersecurity incidents, that materially affected the Company, including its business strategy, results of operations, or financial condition. However, we face ongoing and increasing cybersecurity risks, including those from threat actors who are becoming more sophisticated and effective over time. If realized, these risks may materially affect the Company.

For additional information regarding the cybersecurity risks we face, please refer to Item 1A, "Risk Factors," in this annual report on Form 10-K, including the risk factors entitled "Risks Related to Our Business: If the security of our Platform is compromised, it could compromise our and our developers', creators', and users' private information, disrupt our internal operations, and harm public perception of our Platform, which could cause our business and reputation to suffer."

Item 2. Properties

On January 1, 2025, we relocated our corporate headquarters to a new leased office complex in San Mateo, California. As of December 31, 2024, all of our San Mateo-based employees had been re-located to the new corporate headquarters, which consists of approximately 752,546 square feet, with lease terms expiring between 2029 and 2035.

In addition, we continue to lease approximately 427,271 square feet of office space at our prior corporate headquarters in San Mateo, California, with lease terms expiring between 2027 and 2031. We have sub-leased approximately 140,684 square feet of the office space from our prior corporate headquarters to various sub-lessees, with sub-lease terms expiring in 2027.

We lease additional office space internationally in Canada, the United Kingdom, China, South Korea, and India. We also operate several data centers in the U.S. in Florida, Georgia, Illinois, New Jersey, Texas, Virginia, California, and Washington and around the world including in France, Germany, Hong Kong, Japan, Singapore, the Netherlands, India, Australia, and the United Kingdom pursuant to various lease agreements.

We believe our existing facilities are adequate to meet our current requirements and for our operations in the foreseeable future.

Item 3. Legal Proceedings

The information set forth under the heading "Legal Proceedings" in Note 9, Commitments and Contingencies, in Part II, Item 8 of this Annual Report on Form 10-K is incorporated herein by reference.

Item 4. Mine Safety Disclosures

None.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our Class A common stock, par value \$0.0001 per share, is listed on the New York Stock Exchange ("NYSE"), under the symbol "RBLX" and began trading on March 10, 2021. Prior to that date, there was no public trading market for our Class A common stock.

Our Class B common stock is not listed nor traded on any stock exchange, but is convertible into shares of our Class A common stock on a one-for-one basis.

Holders of Record

As of February 3, 2025, there were 1,689 stockholders of record of our Class A common stock. The actual number of holders of our Class A common stock is greater than the number of record holders and includes stockholders who are beneficial owners, but whose shares are held in street name by brokers or other nominees. The number of holders of record presented here also does not include stockholders whose shares may be held in trust by other entities.

As of February 3, 2025, there were 3 holders of record of our Class B common stock. All shares of our Class B common stock are beneficially owned by David Baszucki.

Dividend Policy

We have never declared or paid any cash dividends on our capital stock. We currently intend to retain any future earnings and do not expect to pay any dividends in the foreseeable future. Any future determination to declare cash dividends will be made at the discretion of our Board of Directors, subject to applicable laws, and will depend on a number of factors, including our financial condition, results of operations, capital requirements, contractual restrictions, general business conditions and other factors that our Board of Directors may deem relevant.

Stock Performance Graph

The performance graph below shall not be deemed "soliciting material" or to be "filed" with the SEC, for purposes of Section 18 of the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any of our filings under the Securities Act.

The performance graph below shows the cumulative total return to our stockholders between March 10, 2021 (the date that our Class A common stock commenced trading on the NYSE) through December 31, 2024, in comparison to the S&P 500 Index and the S&P 500 Information Technology Index. The graph assumes (i) that \$100 was invested in our Class A common stock at its closing price on March 10, 2021 and in each of the S&P 500 Index and the S&P 500 Information Technology Index at their respective closing prices on February 28, 2021, and (ii) reinvestment of gross dividends. The stock price performance shown in the graph represents past performance and should not be considered an indication of future stock price performance.

*\$100 invested on March 10, 2021 in Roblox Class A common stock or February 28, 2021 in index, including reinvestment of dividends. Fiscal year ending December 31.

Unregistered Sales of Equity Securities

Other than any sales that were already disclosed under a Current Report on Form 8-K or Quarterly Report on Form 10-Q, there have been no other sales of unregistered securities by the Company during the years ended December 31, 2024, 2023, and 2022.

Issuer Purchases of Equity Securities

None.

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition, results of operations, and cash flows should be read in conjunction with the consolidated financial statements, and the related notes appearing under "Consolidated Financial Statements and Supplementary Data" in Item 8 of this filing. This discussion and analysis and other parts of this Annual Report on Form 10-K contain forward-looking statements, such as those relating to our plans, objectives, expectations, intentions, and beliefs, that involve risks, uncertainties and assumptions. Our actual results could differ materially from these forward-looking statements as a result of many factors, including those discussed in the section titled "Risk Factors," "Special Note Regarding Forward-Looking Statements," and "Special Note Regarding Operating Metrics" included elsewhere in this Annual Report on Form 10-K. Our historical results are not necessarily indicative of the results that may be expected for any periods in the future. Unless the context otherwise requires, all references in this report to "Roblox," the "Company," "we," "our," "us," or similar terms refer to Roblox Corporation and its subsidiaries.

This section of our Annual Report on Form 10-K discusses our financial condition as of and results of operations for the fiscal years ended December 31, 2024 and 2023, as well as year-to-year comparisons between fiscal years 2024 and 2023. A discussion of our financial condition as of and results of operations for the fiscal year ended 2022 and year-to-year comparisons between fiscal years 2023 and 2022 that is not included in this Annual Report on Form 10-K can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2023.

Amounts reported in millions are rounded based on the amounts in thousands. As a result, the sum of the components reported in millions may not equal the total amount reported in millions due to rounding. In addition, percentages presented are calculated from the underlying numbers in thousands and may not add to their respective totals due to rounding.

Overview

People from around the world come to Roblox every day to connect with friends. Together they create, play, work, learn, and connect with each other in experiences built by our global community of creators. Our Platform is powered by user-generated content and draws inspiration from gaming, entertainment, social media, and even toys.

Our free to use immersive platform for connection and communication consists of the Roblox Client, the Roblox Studio, and the Roblox Cloud (collectively, the "Roblox Platform" or the "Platform"). Roblox Client is the free application that allows users to explore 3D immersive experiences. Roblox Studio is the free toolset that allows developers and creators to build, publish, and operate 3D immersive experiences and other content accessed with the Roblox Client. Roblox Cloud includes the services and infrastructure that power our Platform. We are continually innovating our Platform by investing in high fidelity avatars, more realistic experiences, artificial intelligence ("AI") tools, and other social features.

Our mission is to connect a billion users with optimism and civility. We are constantly improving the ways in which our Platform supports shared experiences, ranging from how these experiences are built by an engaged community of developers and creators to how they are enjoyed and safely accessed by users across the globe. We also believe there is a strong potential to capture a greater percentage of global gaming revenue within the Roblox ecosystem. Our goal is to make it as easy as possible for creators and developers to build better experiences, including games, expand content into new genres, and ultimately reach more users.

Consistent with our free to play business model, a small portion of our users have historically been payers. For example, in the year ended December 31, 2024, of our 82.9 million average DAUs, only approximately 1.0 million represented our average daily unique paying users. Similarly, in the year ended December 31, 2024, our average daily bookings per DAU was \$0.14, whereas our average daily bookings per daily unique paying user was \$11.48. We believe that maintaining and growing our overall number of DAUs, including the number of DAUs who may not purchase and spend Robux, is important to the success of our business. As a result, we believe that the number of DAUs who choose to purchase and spend Robux will continue to constitute a small portion of our overall users.

In the second half of 2024 and into 2025, we have implemented, and expect to continue to implement, certain Platform policy and other changes in anticipation of and in response to regulatory requirements and evolving guidance from leading global organizations focused on child and internet safety in the United States and abroad. These changes could impact user engagement, revenue, and bookings, particularly from younger users.

Our primary areas of investment have been, and we expect will continue to be, our developer and creator community, and the people, technology, and infrastructure, including our trust and safety systems, required to keep improving the Roblox Platform while maintaining and building a safe and civil online community. These areas of focus are how we drive the business, and along with payment processing fees, represent our primary operating costs.

Key Metrics

We believe our performance is dependent upon many factors, including the key metrics described below that we track and review to measure our performance, identify trends, formulate financial projections, and make strategic decisions.

Operating Metrics

We manage our business by tracking several operating metrics, including those outlined below. As a management team, we believe each of these operating metrics provides useful information to investors and others. For complete definitions and limitations of these metrics, refer to the section titled “Special Note Regarding Operating Metrics” of this Annual Report on Form 10-K.

Average Daily Active Users (“DAUs”)

We define a DAU as a user who has logged in and visited Roblox through our website or application on a unique registered account on a given calendar day. If a registered, logged in user visits Roblox more than once within a 24-hour period that spans two calendar days, that user is counted as a DAU only for the first calendar day. We track DAUs as an indicator of the size of the audience engaged on our Platform. We believe that the long-term growth in DAUs reflects the increasing value of our Platform.

Hours engaged

We define hours engaged as the time spent by our users on the Platform. We calculate total hours engaged as the aggregate of user session lengths in a given period. We estimate this length of time using internal company systems that track user activity on our Platform as discrete events, and aggregate these discrete activities into a user session. A given user session on our Platform may include, among other things, time spent in experiences, in Roblox Studio, in Platform features such as chat and avatar personalization, in the Creator Store, and some amount of non-active time due to limits within the tracking systems and our estimation methodology. We believe that the growth in hours engaged reflects the increasing value of our Platform.

Bookings

Bookings is a non-GAAP financial measure and represents the sales activity in a given period without giving effect to certain non-cash adjustments. Bookings is presented for supplemental informational purposes only and should not be considered in isolation from, or as a substitute for, financial information presented in accordance with GAAP. Refer to the section "Non-GAAP Financial Measures" below for further discussion on this measure, including its limitations.

Below we also include revenue calculated in accordance with GAAP, the most directly comparable financial measure to bookings.

We believe that DAUs, hours engaged, and bookings are highly correlated and over long periods of time, we would expect hours engaged to grow slightly faster than DAUs, and bookings to grow faster than hours engaged. There are many reasons, but generally over long periods of time, as the content on our Platform improves and DAUs increase in tenure, hours engaged tends to go up. Similarly, over time as the content improves and our Platform functionality gets better, we expect more users to become payers and for payers, on average, to increase their purchase of Robux which drives up both average bookings per monthly unique payer and overall bookings per hour engaged. Further, we expect growth in our payers and monetization to lead to growth in revenue and bookings. Within any given month or quarter, the behavior of the metrics has not been, and will not always be, consistent.

Average Bookings per DAU ("ABPDAU")

We define ABPDAU as bookings in a given period divided by the DAUs for the same period. We use ABPDAU as a way to understand our monetization across our users.

Refer to the section titled "Non-GAAP Financial Measures" for the definition of and discussion on bookings, including its limitations as a non-GAAP financial measure.

Average New and Returning Monthly Unique Payers and Monthly Repurchase Rate

We define new monthly unique payers as user accounts that made their first payment on the Platform, or via redemption of prepaid cards, during a given month. Average new monthly unique payers for a specified period is the average of the new monthly unique payers for each month during that period.

We define returning monthly unique payers as user accounts that have made a payment on the Platform, or via redemption of prepaid cards, in the current month and in any prior month. Average returning monthly unique payers for a specified period is the average of the returning monthly unique payers for each month during that period.

We define monthly repurchase rate as the returning monthly unique payers in the current month, divided by the sum of the prior month's new monthly unique payers and returning monthly unique payers. Average monthly repurchase rate for a specified period is the average of the monthly repurchase rates for each month during that period.

We use these measures to understand our monetization across our payers.

Average Bookings per Monthly Unique Payer

We define average bookings per monthly unique payer as bookings in the specified period divided by the average monthly unique payers for the same specified period. We use this measure to understand our monetization across our payers through the sale of virtual currency and subscriptions. Refer to the section titled “Non-GAAP Financial Measures” for the definition of and discussion on bookings, including its limitations as a non-GAAP financial measure.

Non-GAAP Financial Measures

In addition to our results determined in accordance with GAAP, we believe the following non-GAAP financial measures are useful in evaluating our performance. We use this non-GAAP financial information to evaluate our ongoing operations, for internal planning and forecasting purposes, and to evaluate our operating performance. We believe that this non-GAAP financial information may be helpful to investors because it provides consistency and comparability with past financial performance. However, non-GAAP financial measures have limitations in their usefulness to investors because they have no standardized meaning prescribed by GAAP and are not prepared under any comprehensive set of accounting rules or principles. In addition, other companies, including companies in our industry, may calculate similarly titled non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our non-GAAP financial information as a tool for comparison. As a result, our non-GAAP financial information is presented for supplemental informational purposes only and should not be considered in isolation from, or as a substitute for financial information presented in accordance with GAAP.

Bookings

Bookings represent the sales activity in a given period without giving effect to certain non-cash adjustments, as detailed below. Substantially all of our bookings are generated from sales of virtual currency, which can ultimately be converted to virtual items on the Roblox Platform. Sales of virtual currency reflected as bookings include one-time purchases or monthly subscriptions purchased via payment processors or through prepaid cards. Bookings are initially recorded in deferred revenue and recognized as revenues over the estimated period of time the virtual items purchased with the virtual currency are available on the Roblox Platform (estimated to be the average lifetime of a paying user) or as the virtual items purchased with the virtual currency are consumed. Bookings also include an insignificant amount from advertising and licensing arrangements.

We believe bookings provide a timelier indication of trends in our operating results that are not necessarily reflected in our revenue as a result of the fact that we recognize the majority of revenue over the estimated average lifetime of a paying user. The change in deferred revenue constitutes the vast majority of the reconciling difference from revenue to bookings. By removing these non-cash adjustments, we are able to measure and monitor our business performance based on the timing of actual transactions with our users and the cash that is generated from these transactions. Over the long-term, the factors impacting our revenue and bookings trends are the same. However, in the short-term, there are factors that may cause revenue and bookings trends to differ.

The following table presents a reconciliation of revenue, the most directly comparable financial measure calculated in accordance with GAAP, to bookings, for each of the periods presented (in thousands):

	Year Ended December 31,	
	2024	2023
Reconciliation of revenue to bookings:		
Revenue	\$ 3,601,979	\$ 2,799,274
Add (deduct):		
Change in deferred revenue	792,434	742,308
Other	(25,317)	(20,802)
Bookings	<u>\$ 4,369,096</u>	<u>\$ 3,520,780</u>

Adjusted EBITDA

Adjusted EBITDA represents our GAAP consolidated net loss, excluding interest income, interest expense, other (income)/expense, provision for/(benefit from) income taxes, depreciation and amortization expense, stock-based compensation expense, and certain other nonrecurring adjustments and differs from Covenant Adjusted EBITDA which is used in certain covenant calculations specified in the indenture governing our senior notes due 2030 (the "Indenture"). Refer to the section titled "Liquidity and Capital Resources" for the definition of and discussion on Covenant Adjusted EBITDA.

We believe that, when considered together with reported GAAP amounts, Adjusted EBITDA is useful to investors and management in understanding our ongoing operations and ongoing operating trends. Our definition of Adjusted EBITDA may differ from the definition used by other companies and therefore comparability may be limited.

The following table presents a reconciliation of consolidated net loss, the most directly comparable financial measure calculated in accordance with GAAP, to Adjusted EBITDA, for each of the periods presented (in thousands):

	Year Ended December 31,	
	2024	2023
Reconciliation of consolidated net loss to Adjusted EBITDA:		
Consolidated net loss	\$ (940,614)	\$ (1,158,937)
Add (deduct):		
Interest income	(179,531)	(141,818)
Interest expense	41,184	40,707
Other (income)/expense, net	11,530	527
Provision for/(benefit from) income taxes	4,114	454
Depreciation and amortization expense ⁽¹⁾	226,437	208,142
Stock-based compensation expense	1,015,794	867,967
RTO severance charge ⁽²⁾	1,274	5,228
Other non-cash charges ⁽³⁾	—	6,988
Adjusted EBITDA	<u>\$ 180,188</u>	<u>\$ (170,742)</u>

- (1) For the twelve months ended December 31, 2024, includes a one-time charge of \$17.9 million related to the re-assessment of the estimated useful life of certain software licenses, resulting in the acceleration of their remaining depreciation within infrastructure and trust & safety expenses in the third quarter of 2024.
- (2) Relates to cash severance costs associated with the Company's return-to-office ("RTO") plan announced in October 2023, which required a subset of the Company's remote employees to begin working from the San Mateo headquarters for three days a week, beginning in the summer of 2024.
- (3) Includes impairment expense related to certain operating lease right-of-use assets and related property and equipment.

Free cash flow

We define free cash flow as net cash and cash equivalents provided by operating activities less purchases of property, equipment, and intangible assets acquired through asset acquisitions. We believe that free cash flow is a useful indicator of our unit economics and liquidity that provides information to management and investors about the amount of cash and cash equivalents generated from our core operations that, after the purchases of property, equipment, and intangible assets, can be used for strategic initiatives.

The following table presents a reconciliation of net cash and cash equivalents provided by operating activities, the most directly comparable financial measure calculated in accordance with GAAP, to free cash flow, for each of the periods presented (in thousands):

	Year Ended December 31,	
	2024	2023
Reconciliation of net cash and cash equivalents provided by operating activities to free cash flow:		
Net cash and cash equivalents provided by operating activities	\$ 822,316	\$ 458,180
Deduct:		
Acquisition of property and equipment	(179,646)	(320,667)
Purchases of intangible assets	(1,370)	(13,500)
Free cash flow	<u>\$ 641,300</u>	<u>\$ 124,013</u>

Acquisition of property and equipment primarily includes tenant improvements related to our leased office spaces and data centers, servers, infrastructure equipment, and capitalized software licenses.

Changes in Accounting Estimate

At the onset of each quarter, we complete an assessment of our estimated average lifetime of a paying user, which is used for revenue recognition of durable virtual items and calculated based on historical monthly retention data for each paying user cohort to project future participation on the Roblox Platform. Following that assessment and effective April 1, 2024, we updated our estimated paying user life from 28 months to 27 months, where it remained through December 31, 2024. The decrease was partially attributed to COVID-19 impacted payer cohorts dropping out of the estimated average lifetime of a paying user calculation (as we consider historical monthly retention data), whose average lives generally trended higher than more recent payer cohorts, along with the other qualitative factors including macroeconomic factors, competition, and availability of the Platform. Based on the carrying amount of deferred revenue and deferred cost of revenue as of March 31, 2024, the change resulted in an increase in our fiscal year 2024 revenue and cost of revenue by \$98.0 million and \$20.4 million, respectively.

The estimated paying user life was 28 months throughout the year ended December 31, 2023.

Refer to the heading "Critical Accounting Policies and Estimates — Revenue Recognition" below for a complete discussion on the Company's revenue recognition policies.

Components of Results of Operations

Revenue

We generate substantially all of our revenue through the sale of virtual content or access to virtual content to users, enabling them to enhance their social experience on the Roblox Platform. We recognize revenue over the estimated period of time the virtual items are available to the user on the Roblox Platform (estimated average lifetime of a paying user) or at the time the virtual item is consumed. The estimated average lifetime of a paying user is calculated based on the monthly retention data for each paying user cohort. We then calculate the average retention period by determining the weighted-average period paying users have spent on the Platform and are projected to participate in the Roblox environment.

Other revenue streams include an insignificant amount of revenue from advertising and licensing arrangements. We plan to invest in and expand our advertising business for the foreseeable future.

All of our revenue is recorded net of taxes assessed by a government authority that are both imposed on and concurrent with specific revenue transactions between us and our users, and estimated chargebacks and refunds.

Costs and expenses

We allocate shared costs, such as certain facilities (including rent and depreciation on equipment and leasehold improvements shared by all departments), software costs, and certain other operating expenses, to all departments based on headcount. As such, allocated shared costs are reflected in each expense category, with the exception of cost of revenue and developer exchange fees expense.

Personnel costs generally include employee expenses (salaries, benefits, and stock-based compensation expense) and contractor expenses, and are reflected in each expense category, with the exception of cost of revenue and developer exchange fees. In the years ended December 31, 2024 and 2023, personnel costs were \$1,849.2 million and \$1,654.9 million, respectively.

Cost of revenue

Cost of revenue primarily consists of third-party payment processing fees charged by the various distribution channels in connection with sales of our virtual currency. We initially defer payment processing fees and recognize them as expense over the same period as the respective revenue. Cost of revenue also includes sales tax expense for jurisdictions where the Company does not collect sales tax from the purchaser at the time of the sale and costs associated with the printing of prepaid cards.

Cost of revenue as a percentage of revenue is affected by shifts in user purchasing preferences and trends. While in recent years, we saw a shift of our sales toward prepaid card distribution channels and credit card sales directly through our website, which are subject to lower processing fees compared to other distribution channels, such as the Apple App Store, Google Play Store, and consoles such as Xbox and PlayStation, we have seen this trend moderate over the last several quarters with some seasonal variations. We expect to see the overall distribution channel mix shift based on user purchasing preferences, including those influenced by Robux offerings made by the Company, demographics, and seasonal variations in future periods.

We intend to use nearly all of any efficiencies earned in this area over time to increase earnings for our developers and creators.

Developer exchange fees

Developer exchange fees expense represent the amount earned by developers and creators on the Roblox Platform that are qualified and registered in the Developer Exchange Program. Developers and creators are able to exchange their earned Robux for fiat currency under certain conditions outlined in our Developer Exchange Program. Developers and creators can generally earn Robux through the sale of access to their experiences and enhancements in their experiences, the incorporation of immersive ads, the sale of content and tools between developers through the Creator Store, and the sale of items to users through the Marketplace. Developers can also earn Robux through our engagement-based reward program that rewards developers based on the number of hours spent in their experiences by Roblox Premium subscribers (the “Engagement-Based Payouts” program).

In order to be qualified for our Developer Exchange Program and eligible to exchange earned Robux for fiat currency, developers and creators must meet certain conditions, such as having earned the minimum amount of Robux required to qualify for the program, a verified developer account, and an account in good standing. On January 31, 2022, we reduced the minimum amount of earned Robux required to qualify for the program from 100,000 Robux to 50,000 Robux and subsequently on January 31, 2023, we further reduced the minimum requirement from 50,000 Robux to 30,000 Robux. We believe these reductions in the minimum amounts required further incentivize our developer and creator community, and promote the long term growth and the health of such community. As of December 31, 2024, over 24,500 developers and creators qualified for and were registered in our Developer Exchange Program.

Over the next few years, a major goal is to increase our developer and creator earnings by (i) creating new earnings methods and enhancing existing ones and (ii) passing on efficiencies realized in other areas of our business, while maintaining reasonable margins.

Infrastructure and trust & safety

Infrastructure and trust & safety expenses consist primarily of expenses related to the operation of our data centers and technical infrastructure. These costs include third-party service provider costs, such as cloud computing or other hosting and data storage, facilities-related expenses for our co-located data centers and edge data centers that we lease and operate, and network and bandwidth costs, as well as depreciation and associated support and maintenance costs of our servers and infrastructure equipment. In the years ended December 31, 2024 and 2023, depreciation and amortization expense related to infrastructure and trust & safety was \$195.3 million and \$179.9 million, respectively.

We plan to continue increasing the capacity, capability, and reliability of our infrastructure to support more sophisticated content, more users, and increased engagement. Through the end of 2023, we invested heavily in our infrastructure, and as a result, we were able to moderate our investment in infrastructure throughout fiscal year 2024, but expect to increase our investment over the long-term to support our global infrastructure. We intend to achieve scalability by building and maintaining our own technical infrastructure, while generating operating leverage over the long-term.

Infrastructure and trust & safety expenses also include personnel costs, moderation and customer support related costs, and allocated overhead expenses. We have been and expect to continue investing in AI and automation to increase the accuracy and efficiency of our safety moderation and customer support related efforts, which has increased the quality of our safety and civility systems and led to a decrease in safety moderation and customer support costs in recent periods.

Research and development

Research and development expenses consist primarily of personnel costs and allocated overhead expenses for our engineering, design, product management, data science, and other employees engaged in maintaining and enhancing the functionality of the Platform. Research and development expenses also include costs associated with our Game Fund program, which funds certain developers upfront to develop new experience types for the Platform. We plan to increase research and development expenses for the foreseeable future primarily driven by increased headcount to develop new features, functionality, and innovation of our product. However, we moderated our headcount growth rate throughout 2024 and expect to continue generating operating leverage generally through the end of fiscal year 2025.

General and administrative

General and administrative expenses consist primarily of personnel costs and allocated overhead for our finance and accounting, legal, human resources, talent acquisition, and other administrative teams. General and administrative expenses also include professional services fees such as outside legal, accounting, audit, and outsourcing services, and other corporate expenses, as well as certain accruals and settlements associated with legal proceedings. We generally expect to increase general and administrative expenses for the foreseeable future, primarily to support the growth of our business.

Sales and marketing

Sales and marketing expenses consist primarily of personnel costs and allocated overhead for our marketing, business development, brand partnerships, and developer relations functions, as well as user acquisition expenses. Other expenses include those associated with market research, branding, public relations, and developer relations programs, including our annual Roblox Developer Conference. We plan to increase our sales and marketing expenses for the foreseeable future, primarily to support the growth of our business.

Interest income

Interest income consists primarily of interest earned and net accretion/(amortization) of our short-term investments, long-term investments, and cash equivalents.

Interest expense

Interest expense consists primarily of contractual interest and amortization of debt issuance costs on our 3.875% Senior Notes due 2030 (the "2030 Notes").

Other income/(expense), net

Other income/(expense), net primarily includes foreign currency exchange gains/(losses) and realized gains/(losses) on our short-term and long-term investments, as well as certain insurance recoveries (if any).

Provision for/(benefit from) income taxes

Provision for/(benefit from) income taxes consists primarily of income taxes in foreign jurisdictions and U.S. federal and state income taxes. We maintain a full valuation allowance on our federal, state, and certain foreign deferred tax assets as we have concluded that it is not likely that the deferred assets will be utilized.

Results of Operations

The following tables set forth our results of operations for the periods presented in dollars and as a percentage of our revenue for each period presented (in thousands, except per share data and percentages):

	Year Ended December 31,			
	2024		2023	
Revenue	\$ 3,601,979	100 %	\$ 2,799,274	100 %
Costs and expenses:				
Cost of revenue ⁽¹⁾	801,162	22 %	649,115	23 %
Developer exchange fees	922,821	26 %	740,752	27 %
Infrastructure and trust & safety ⁽²⁾	915,418	25 %	878,361	31 %
Research and development ⁽²⁾	1,444,207	40 %	1,253,598	45 %
General and administrative ⁽²⁾	407,507	11 %	390,055	14 %
Sales and marketing ⁽²⁾	174,181	5 %	146,460	5 %
Total costs and expenses	4,665,296	130 %	4,058,341	145 %
Loss from operations	(1,063,317)	(30)%	(1,259,067)	(45)%
Interest income	179,531	5 %	141,818	5 %
Interest expense	(41,184)	(1)%	(40,707)	(1)%
Other income/(expense), net	(11,530)	— %	(527)	— %
Loss before income taxes	(936,500)	(26)%	(1,158,483)	(41)%
Provision for/(benefit from) income taxes	4,114	— %	454	— %
Consolidated net loss	(940,614)	(26)%	(1,158,937)	(41)%
Net loss attributable to noncontrolling interest ⁽³⁾	(5,230)	— %	(6,991)	— %
Net loss attributable to common stockholders	\$ (935,384)	(26)%	\$ (1,151,946)	(41)%
Net loss per share attributable to common stockholders, basic and diluted	\$ (1.44)		\$ (1.87)	
Weighted-average shares used in computing net loss per share attributable to common stockholders—basic and diluted	647,482		616,445	

(1) Depreciation of servers and infrastructure equipment included in infrastructure and trust & safety.

(2) Includes stock-based compensation expense as follows (in thousands):

	Year Ended December 31,	
	2024	2023
Infrastructure and trust & safety	\$ 113,708	\$ 92,147
Research and development	723,326	607,593
General and administrative	138,444	131,577
Sales and marketing	40,316	36,650
Total stock-based compensation expense	\$ 1,015,794	\$ 867,967

(3) Our consolidated financial statements include our majority-owned subsidiary Roblox China Holding Corp. The ownership interest of a minority investor, Songhua River Investment Limited, is recorded as a noncontrolling interest.

Comparison of the Years Ended December 31, 2024 and 2023

Revenue

	Year Ended December 31,		2023 to 2024
	2024	2023	% Change
	(dollars in thousands)		
Revenue	\$ 3,601,979	\$ 2,799,274	29 %

Revenue in the year ended December 31, 2024 increased \$802.7 million, or 29%, compared to the year ended December 31, 2023. The increase is primarily due to an increase in bookings and higher amortization of prior period deferred revenue in the current period. The increase in bookings was primarily driven by a higher average number of daily unique paying users during 2024, which increased from approximately 852,000 in 2023 to approximately 1,040,000 in 2024. The average number of daily unique paying users represents the number of user accounts that made a payment on the Platform, including via redemption of prepaid cards for Robux, on an average daily basis during the respective period.

The increase in the amortization of prior period deferred revenue was supplemented by the decrease of the estimated average lifetime of a paying user to 27 months in the second quarter of 2024. Refer to the heading “Changes in Accounting Estimate” earlier in this section for more information on the change in paying user life estimate in fiscal year 2024.

Cost of revenue

	Year Ended December 31,		2023 to 2024
	2024	2023	% Change
	(dollars in thousands)		
Cost of revenue	\$ 801,162	\$ 649,115	23 %

Cost of revenue increased \$152.0 million, or 23%, for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily due to a net increase of \$156.8 million in expense for payment processing fees, primarily driven by an increase in current period payment processing fees from the related growth in bookings and higher amortization of prior period deferred cost of revenue. The increase in the amortization of prior period deferred cost of revenue was supplemented by the decrease of the estimated average lifetime of a paying user to 27 months in the second quarter of 2024, as payment processing fees are amortized over the estimated paying user life. Refer to the heading “Changes in Accounting Estimate” earlier in this section for more information on the change in paying user life estimate in fiscal year 2024.

Developer exchange fees

	Year Ended December 31,		2023 to 2024
	2024	2023	% Change
	(dollars in thousands)		
Developer exchange fees	\$ 922,821	\$ 740,752	25 %

Developer exchange fees increased \$182.1 million, or 25%, for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily driven by an increase in amounts earned by developers and creators due to the growth in bookings over the same period.

Infrastructure and trust & safety

	Year Ended December 31,		2023 to 2024	
	2024	2023	% Change	
	(dollars in thousands)			
Infrastructure and trust & safety	\$ 915,418	\$ 878,361	4	%

Infrastructure and trust & safety expenses increased \$37.1 million, or 4%, for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily driven by an increase of \$30.5 million in personnel costs, which includes an increase of \$21.6 million in stock-based compensation expense, primarily due to an increase in headcount to support our infrastructure growth, \$22.3 million related to data center, hosting, and other hardware and software costs (including depreciation and amortization expense), which includes \$17.9 million of accelerated depreciation expense related to the re-assessment of the estimated useful life of certain software licenses in the third quarter of 2024, and \$5.3 million in facilities-related costs, primarily driven by higher rent expense associated with our office leases.

The overall increase was offset by a decrease of \$25.7 million in moderation and customer support related costs, primarily due to internal efficiency gains and automation from AI-driven tools.

Research and development

	Year Ended December 31,		2023 to 2024	
	2024	2023	% Change	
	(dollars in thousands)			
Research and development	\$ 1,444,207	\$ 1,253,598	15	%

Research and development expenses increased \$190.6 million, or 15%, for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily due to an increase of \$154.3 million in personnel costs, which includes an increase of \$115.7 million in stock-based compensation expense, primarily due to continued growth in headcount supporting our engineering, design, and product teams. The increase was further supplemented by an increase of \$28.1 million in facilities-related costs, primarily driven by higher rent expense associated with our office leases.

General and administrative

	Year Ended December 31,		2023 to 2024	
	2024	2023	% Change	
	(dollars in thousands)			
General and administrative	\$ 407,507	\$ 390,055	4	%

General and administrative expenses increased \$17.5 million, or 4%, for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily due to an increase of \$10.7 million in professional services-related expense, \$9.1 million of indirect taxes, of which \$3.6 million relates to a newly enacted digital services tax in Canada, \$4.9 million in facilities-related costs, and \$3.6 million of withholding-related taxes. The increase was offset by an impairment charge of \$7.0 million related to the operating lease right-of-use asset and related leasehold improvements of a portion of our San Mateo headquarters for which a sub-lease agreement was executed during the first quarter of 2023, as well as a decrease of \$2.6 million in personnel costs, primarily due to a decrease in headcount. For more information regarding the sub-lease transaction, refer to Note 3, "Leases" to the notes to consolidated financial statements.

Sales and marketing

	Year Ended December 31,		2023 to 2024
	2024	2023	% Change
	(dollars in thousands)		
Sales and marketing	\$ 174,181	\$ 146,460	19 %

Sales and marketing expenses increased \$27.7 million, or 19%, for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily due to an increase of \$12.1 million in personnel costs, which includes an increase in stock-based compensation expense of \$3.7 million, primarily due to continued growth in headcount to support our sales and marketing teams, \$10.1 million in advertising and promotional expenses, and \$2.4 million in facilities-related costs, primarily driven by higher rent expense associated with our office leases.

Interest income, interest expense, other income/(expense), net, and provision for/(benefit from) income taxes

	Year Ended December 31,		2023 to 2024
	2024	2023	% Change
	(dollars in thousands)		
Interest income	\$ 179,531	\$ 141,818	27 %
Interest expense	\$ (41,184)	\$ (40,707)	1 %
Other income/(expense), net	\$ (11,530)	\$ (527)	2,088 %
Provision for/(benefit from) income taxes	\$ 4,114	\$ 454	806 %

Interest income increased by \$37.7 million for the year ended December 31, 2024 compared to the year ended December 31, 2023. The increase was primarily due to higher average investments in debt securities and higher average interest rates.

Other income/(expense), net changed by \$11.0 million for the year ended December 31, 2024 compared to the year ended December 31, 2023. The change was primarily driven by foreign currency exchange losses.

The changes in interest expense and provision for/(benefit from) income taxes were both relatively insignificant (in terms of amount) for the year ended December 31, 2024 as compared to the year ended December 31, 2023.

Liquidity and Capital Resources

As of December 31, 2024 and 2023, our principal sources of liquidity were cash and cash equivalents and short-term and long-term investments of \$4.0 billion and \$3.2 billion, respectively, which were primarily held for working capital purposes, capital expenditures, and acquisitions. Our investment policy and strategy are focused on the preservation of capital and supporting our liquidity requirements. We do not enter into investments for trading or speculative purposes.

Since our inception, we have financed our operations primarily through cash generated from operations and, to a lesser extent, sales of convertible preferred stock, borrowings under our credit facilities, and the sale of our 2030 Notes. We require payment upfront for substantially all of our bookings.

On October 29, 2021, we issued the 2030 Notes, which will mature on May 1, 2030, unless earlier repurchased or redeemed. Interest is payable semi-annually in arrears on May 1 and November 1 of each year, commencing on May 1, 2022. The net proceeds from the 2030 Notes issuance were approximately \$987.5 million and we intend to use the net proceeds for general corporate purposes, which may include working capital purposes, capital expenditures, and acquisitions.

The 2030 Notes are unsecured obligations and the Indenture contains covenants limiting the Company and its subsidiaries' ability to: (i) create certain liens and enter into sale and lease-back transactions; (ii) create, assume, incur or guarantee indebtedness; or (iii) consolidate or merge with or into, or sell or otherwise dispose of all of substantially all of the Company and its subsidiaries' assets to another person, all of which are limited to amounts not to exceed the greater of \$4.0 billion and 3.5x "Consolidated EBITDA" (as defined in the Indenture and referred to as "Covenant Adjusted EBITDA" throughout this section). Non-compliance with these covenants may result in the acceleration of repayment of the 2030 Notes and any accrued and unpaid interest.

Accordingly, the Company presents Covenant Adjusted EBITDA calculated in accordance with “Consolidated EBITDA” as that term is defined in the Indenture, which is not calculated in accordance with GAAP and may not conform to the calculation of Adjusted EBITDA by other companies. Covenant Adjusted EBITDA should not be considered as a substitute for a measure of our financial performance or other liquidity measures prepared in accordance with GAAP and is also not indicative of income or loss calculated in accordance with GAAP. Management believes that this calculation is useful to investors for purposes of analyzing our compliance with certain covenants specified in the Indenture.

The following table presents the calculation of Covenant Adjusted EBITDA in accordance with the terms of the Indenture, for each of the periods presented (in thousands):

	Year Ended December 31,	
	2024	2023
Calculation of Covenant Adjusted EBITDA:		
Consolidated net loss	\$ (940,614)	\$ (1,158,937)
Add (deduct):		
Interest income	(179,531)	(141,818)
Interest expense	41,184	40,707
Other (income)/expense, net	11,530	527
Provision for/(benefit from) income taxes	4,114	454
Depreciation and amortization expense ⁽¹⁾	226,437	208,142
Stock-based compensation expense	1,015,794	867,967
RTO severance charge ⁽²⁾	1,274	5,228
Other non-cash charges ⁽³⁾	—	6,988
Change in deferred revenue	792,434	742,308
Change in deferred cost of revenue	(164,909)	(139,879)
Covenant Adjusted EBITDA	<u>\$ 807,713</u>	<u>\$ 431,687</u>

(1) For the twelve months ended December 31, 2024, includes a one time charge of \$17.9 million related to the re-assessment of the estimated useful life of certain software licenses, resulting in the acceleration of their remaining depreciation within infrastructure and trust & safety expenses in the third quarter of 2024.

(2) Relates to cash severance costs associated with the Company's return-to-office (“RTO”) plan announced in October 2023, which required a subset of the Company's remote employees to begin working from the San Mateo headquarters for three days a week, beginning in the summer of 2024.

(3) Includes impairment expense related to certain operating lease right-of-use assets and related property and equipment.

As of December 31, 2024, contractual obligations related to the 2030 Notes are remaining payments of \$38.8 million each year from 2025 through 2029 and \$1,019.4 million due in 2030. These amounts represent principal and interest cash payments over the term of the 2030 Notes based on the stated maturity date. Any future redemption of the 2030 Notes could impact the amount or timing of our cash payments. For more information regarding the 2030 Notes, refer to Note 8, “Debt” to the notes to consolidated financial statements.

For all periods presented, we have generated losses from our operations and positive cash flows from operating activities. A substantial source of our net cash and cash equivalents provided by operating activities is our deferred revenue, which is included in our consolidated balance sheet as a liability. Deferred revenue consists of the unearned portion of bookings for which we have not yet satisfied our performance obligations. Our deferred revenue obligation is recognized as revenue over the estimated average lifetime of a paying user or as the virtual items are consumed.

We also expect to continue making investments in our business, including, but not limited to, capital expenditures related to our technology infrastructure.

We believe our existing cash and cash equivalents and short-term investments, together with expected cash to be provided by future operations, will be sufficient to meet our needs for the next 12 months. Our future capital requirements, however, will depend on many factors, including our growth rate, investment in our headcount, capital expenditures to build out new facilities and purchase hardware for infrastructure, timing and extent of spending to support our efforts to develop our Platform, amongst other factors. We may in the future enter into arrangements to acquire or invest in complementary businesses, services, and technologies, including intellectual property rights. In the event that additional financing is required from outside sources, we may seek to raise additional funds at any time through equity, equity-linked arrangements, or debt. If we are unable to raise additional capital when desired and at reasonable rates, our business, results of operations, and financial condition would be adversely affected. See Part 1, Item 1A. “Risk Factors” for more information.

Cash Flows

The following table summarizes our cash flows for the periods presented (in thousands):

	Year Ended December 31,	
	2024	2023
Consolidated Statements of Cash Flow Data:		
Net cash and cash equivalents provided by operating activities	\$ 822,316	\$ 458,180
Net cash and cash equivalents used in investing activities	\$ (852,072)	\$ (2,825,099)
Net cash and cash equivalents provided by financing activities	\$ 65,894	\$ 67,176

Operating activities

Our largest source of operating cash is cash collection from sales of Robux and monthly subscriptions. Our primary uses of net cash and cash equivalents from operating activities are for payment processing fees, personnel-related expenses, data center and infrastructure-related operations, developer exchange fees, and other operating expenses.

During the year ended December 31, 2024, cash and cash equivalents provided by operating activities was \$822.3 million, which consisted of a consolidated net loss of \$940.6 million, adjusted by non-cash charges of \$1,282.0 million and net cash inflows from the change in net operating assets and liabilities of \$481.0 million. The non-cash charges were primarily comprised of stock-based compensation expense of \$1,015.8 million and depreciation and amortization expense of \$226.4 million. The net cash and cash equivalents inflow from the change in our net operating assets and liabilities was primarily due to a \$795.4 million increase in deferred revenue, primarily due to bookings generated in the current period, a \$31.2 million increase in other long-term liabilities, primarily driven by non-income tax-related accruals, and a \$24.7 million increase in our developer exchange liability, primarily driven by the increase in bookings generated in the current period, coupled with the timing of payments. The overall increase was offset by a \$165.7 million increase in deferred cost of revenue, primarily due to payment processing fees associated with bookings generated in the current period, a \$110.5 million increase in our accounts receivable balance, net due to the timing of cash receipts on bookings generated in the current period and collection of prior period bookings and a \$77.4 million decrease in our operating lease liabilities.

Investing activities

During the year ended December 31, 2024, cash and cash equivalents used in investing activities was \$852.1 million, primarily consisting of \$668.2 million of investment purchases — net of sales and maturities and \$179.6 million of capital expenditures.

Financing activities

During the year ended December 31, 2024, cash and cash equivalents provided by financing activities was \$65.9 million, primarily consisting of \$70.3 million from the exercise of stock options and purchase of shares under our employee stock purchase plan, offset by \$4.5 million of financing payments related to acquisitions.

Off-Balance Sheet Arrangements

As of December 31, 2024 and December 31, 2023, we had letters of credit related to office facilities in San Mateo, California and data center facilities in Ashburn, Virginia and Chicago, Illinois of \$8.3 million and \$11.6 million, respectively, which are not reflected in the Company's consolidated balance sheets. We did not have any relationships with unconsolidated entities or financial partnerships, such as structured finance or special purpose entities that were established for the purpose of facilitating off-balance sheet arrangements or other purposes.

Contractual Obligations and Commitments

As of December 31, 2024, we have non-cancellable lease arrangements for office facilities and space for data center operations expiring in various years through 2035. As of December 31, 2024, the Company had fixed lease payment obligations of \$1,028.3 million, with \$144.4 million payable within 12 months. For more information regarding the operating lease commitments, refer to Note 3, "Leases" to the notes to consolidated financial statements.

Our other purchase obligations primarily consist of non-cancellable obligations with our data center hosting providers and software vendors. As of December 31, 2024, we had other purchase obligations of \$325.9 million, with \$233.1 million payable within 12 months. For more information regarding our contractual obligations, refer to Note 9, "Commitments and Contingencies" to the notes to consolidated financial statements.

Critical Accounting Policies and Estimates

The preparation of these financial statements in accordance with U.S. GAAP requires us to make estimates and assumptions that affect the reported amounts in our consolidated financial statements and related notes. Our estimates are based on various factors that we believe are reasonable. Actual results may differ from these estimates. To the extent that there are differences between our estimates and actual results, our future financial statement presentation, financial condition, results of operations, and cash flows will be affected.

An accounting policy is considered to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the consolidated financial statements.

Refer to Note 1, "Overview and Summary of Significant Accounting Policies", to our consolidated financial statements included in this Annual Report on Form 10-K for a full description of our revenue recognition and stock-based compensation expense policies.

Revenue Recognition

Roblox Platform

The Company operates the Roblox Platform as live services that allow users to play and socialize with others for free. However, users can purchase virtual currency ("Robux") to ultimately obtain virtual items to enhance their social experience. Proceeds from the sale of Robux are initially recorded in deferred revenue and recognized as revenue as a user purchases and uses virtual items. The Company classifies deferred revenue as short-term or long-term based on when the Company expects to recognize the revenue. The Company's identified performance obligation is to provide users with the ability to acquire, use, and hold virtual items on the Roblox Platform over the estimated period of time the virtual items are available to the user or until the virtual items are consumed.

Users can purchase Robux as one-time purchases or through monthly subscriptions via payment processors or through prepaid cards. The Company offers prepaid cards through online and physical retailers, as well as on the Company website. The Company estimates expected breakage on prepaid card sales by taking into consideration historical patterns of redemption and escheatment laws as applicable.

Payments from users are non-refundable and relate to non-cancellable contracts for a fixed price that specify Company's obligations. Revenue is recorded net of taxes assessed by government authorities that are both imposed on and concurrent with specific revenue transactions between the Company and its users, and estimated chargebacks and refunds.

The satisfaction of the Company's performance obligation is dependent on the nature of the virtual item purchased and as a result, the Company categorizes its virtual items as either consumable or durable.

- Consumable virtual items represent items that can be consumed by a specific user action (e.g., a one-time boost or the ability to skip or redo an action). Common characteristics of consumable virtual items may include items that are no longer displayed on the user's inventory after a short period of time or do not provide the user any continuing benefit following consumption. For the sale of consumable virtual items, the Company recognizes revenue as the items are consumed.
- Durable virtual items represent items which result in a persistent change to a users' character or item set (e.g., virtual hat, pet, or house). These items are generally available to the customer to hold, use, or display for as long as they are on the Roblox Platform. The Company recognizes revenue from the sale of durable virtual items ratably over the estimated period of time the items are available to the user which is estimated as the average lifetime of a paying user.

To separately account for consumable and durable virtual items, the Company specifically identifies each purchase for the majority of virtual items purchased on the Roblox Platform. For the remaining population, the Company estimates the amount of consumable and durable virtual items purchased based on data from specifically identified purchases and the expected behavior of the users within similar experiences. The estimation of consumable and durable virtual items purchased for the population of purchases not specifically identified requires management's judgment as the Company evaluates and estimates the expected behavior of users in the population using information from known purchases in similar experiences.

At the onset of each quarter, the average lifetime of a paying user estimate is calculated based on historical monthly retention data for each user cohort to project future participation on the Roblox Platform. Determining the estimated average lifetime of a paying user requires management's judgment as the Company analyzes the most recent trends in player cohort activity and other qualitative factors, including changes to paying user behavior influenced by broader product changes and/or content virality, the availability of the Roblox Platform across markets and user demographics, impacts due to macroeconomic factors such as COVID-19, existing and new competition from a variety of entertainment resources for our users, and other factors. The Company also considers results from prior analyses in determining the estimated average lifetime of a paying user. The Company believes this estimate is the best representation of the average life of the durable virtual items.

The estimated average paying user life was 28 months from the third quarter of 2022 through the first quarter of 2024 and decreased to 27 months in the second quarter of 2024. The decrease in the estimated average lifetime of a paying user from 28 months to 27 months was partially attributed to COVID-19 impacted payer cohorts dropping out of the estimated average lifetime of a paying user calculation (as we consider historical monthly retention data), whose average lives generally trended higher than more recent payer cohorts, along with the other qualitative factors including macroeconomic factors, competition, and availability of the Platform. Refer to the heading "Changes in Accounting Estimate" for discussion on the quantitative amount of the change in accounting estimates for the respective periods impacted.

Stock-Based Compensation Expense

The Company measures and recognizes stock-based compensation expense for all stock-based awards, including stock options, unregistered restricted stock awards ("RSAs"), restricted stock units ("RSUs"), and performance stock units ("PSUs") granted to employees, directors, and non-employees, and stock purchase rights granted under the 2020 Employee Stock Purchase Plan (the "2020 ESPP") to employees, based on the estimated grant date fair value of the awards. The Company records forfeitures when they occur for all stock-based awards.

The fair value of each stock option and stock purchase right granted is estimated using the Black-Scholes option-pricing model and is recognized as compensation expense on a straight-line basis over the requisite service period of the awards. The Black-Scholes option pricing model requires certain subjective inputs and assumptions, including the fair value of the Company's Class A common stock, the expected term, risk-free interest rates, expected stock price volatility, and expected dividend yield of our Class A common stock. The assumptions used to determine the fair value of the option awards represent management's best estimates. These estimates involve inherent uncertainties and the application of management's judgment. These assumptions and estimates are as follows:

- Fair value of Class A common stock—Prior to the direct listing of our Class A common stock on the NYSE (the "Direct Listing"), we estimated the fair value of Class A common stock, as discussed below in the section titled "Common Stock Valuations." After the completion of the Direct Listing, the fair value of our Class A common stock is determined based on the NYSE closing price on the date of grant.
- Expected term—The expected term represents the period that stock-based awards are expected to be outstanding. The expected term assumptions are determined based on the vesting terms, estimated exercise behavior, post-vesting cancellations, and contractual lives of the awards.
- Risk-free interest rates—The risk-free interest rate is based on the implied yields in effect at the time of the grant of U.S. Treasury notes with terms approximately equal to the expected term of the award.
- Expected stock price volatility—Prior to the Direct Listing, we used the historical volatility of the Class A common stock price of similar publicly-traded peer companies. After the completion of the Direct Listing, we continued to use the historical volatility of the stock price of similar publicly traded peer companies until the first quarter of 2024, which is the point at which we believed we had sufficient public trading history.
- Expected dividend yield—We utilize a dividend yield of zero, as we have no history or plan of declaring dividends on its common stock.

The fair value of RSUs is estimated based on the fair value of our common stock on the date of grant. Prior to the Direct Listing, we estimated the fair value of Class A common stock, as discussed below in the section titled "Common Stock Valuations." For RSUs granted subsequent to the Direct listing, the fair value of our Class A common stock is determined based on the NYSE closing price on the date of grant.

Common Stock Valuations

Prior to the Direct Listing, due to the absence of a public trading market for our common stock, and in accordance with the American Institute of Certified Public Accountants Accounting and Valuation Guide: Valuation of Privately-Held Company Equity Securities Issued as Compensation, our Board of Directors along with management exercised its reasonable judgment and considered numerous objective and subjective factors to determine the best estimate of fair value of our common stock, including:

- the prices at which we or other holders sold our common and convertible preferred stock to outside investors in arms-length transactions;
- contemporaneous valuations performed by an unrelated third-party valuation firm;
- our operating and financial performance;
- the lack of marketability of our common stock;
- the valuation of comparable companies;
- the industry outlook;
- the likelihood of achieving a liquidity event, such as an initial public offering or a sale of our company given prevailing market conditions; and
- the U.S. and global economic and capital market conditions and outlook.

We determined the fair value of our common stock using the most observable inputs available to us, including income approaches as well as recent sales of our stock. The income approach estimated the value of our business based on the future cash flows we expected to generate discounted to their present value using an appropriate discount rate to reflect the risk of achieving the expected cash flows.

We also considered any secondary transactions involving our capital stock. In our evaluation of those transactions, we considered the facts and circumstances of each transaction to determine the extent to which they represented a fair value exchange. Factors considered include transaction volume, timing, whether the transactions occurred among willing and unrelated parties, and whether the transactions involved investors with access to our financial information.

CEO Long-Term Performance Award

In February 2021, the Leadership Development and Compensation Committee of the Company's Board of Directors granted the CEO a Long-Term Performance Award ("CEO Long-Term Performance Award"), an RSU award that includes a service and a market condition. The fair value of the CEO Long-Term Performance Award was determined using a Monte Carlo simulation model. The fair value of the common stock underlying the award was determined by the Company's Board of Directors along with management by considering a number of objective and subjective factors. The Company estimated the expected term based on the time period from the valuation date to the end of the performance period. The risk-free interest rate was based on the U.S. Treasury yield curve in effect at the time of grant for zero-coupon U.S. Treasury notes. The expected volatility was derived from the historical stock volatility of selected peers over a period equivalent to the expected term of the CEO Long-Term Performance Award. Prior to its cancellation (as discussed below), the associated stock-based compensation was being recorded over the derived service period, using the accelerated attribution method.

On March 1, 2024, the Leadership Development and Compensation Committee (i) approved the cancellation of the CEO Long-Term Performance Award and (ii) granted our CEO a new PSU award (the "2024 CEO PSU Award") and RSU award (collectively, the "2024 CEO Award"). The Class A common stock price targets under the CEO Long-Term Performance Award were not achieved prior to its cancellation and therefore no shares vested under the CEO Long-Term Performance Award.

For more information regarding this transaction, including the modification accounting impact, refer to Note 10, "Stockholders' Equity" to our consolidated financial statements included in this Annual Report on Form 10-K.

Recent Accounting Pronouncements

See section "Recent Accounting Pronouncements" within Item 8. Financial Statements and Supplementary Information, Note 1, "Overview and Summary of Significant Accounting Policies", for discussion of recent accounting pronouncements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks in the ordinary course of our business. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily the result of fluctuations in interest rates and foreign currency exchange rates.

Foreign Currency Exchange Risk

The majority of our revenue is generated in U.S. dollars, with revenue generated in Euros, British pound, Canadian dollars, and Australian dollars primarily comprising the remainder of our revenue. Our expenses are generally denominated in the currencies of the jurisdictions in which we conduct our operations, which are primarily in the U.S., United Kingdom, Canada, Europe, and China. Our results of current and future operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates. We have not entered into derivative or hedging transactions, but we may do so in the future if our exposure to foreign currency becomes more significant.

Due to fluctuations in exchange rates resulting from the current macroeconomic environment, we have, and may in the future, experience negative impacts to our revenue and operating expenses denominated in currencies other than the U.S. dollar.

Interest Rate Risk

As of December 31, 2024, our cash equivalents, short-term investments, and long-term investments primarily consist of debt securities, including corporate debt securities, commercial paper, money market funds, U.S. Treasury securities, and U.S. agency securities totaling \$3.9 billion. Our debt securities are subject to market risk due to changes in prevailing interest rates that may cause their fair values to fluctuate in the future. Based on a sensitivity analysis, we have determined that a hypothetical 100 basis points increase in interest rates would have resulted in a decrease in the fair values of our debt securities of approximately \$31.1 million as of December 31, 2024. Such losses would only be realized if we sold the investments prior to maturity.

We do not enter into investments for trading or speculative purposes. Our investment policy and strategy are focused on the preservation of capital and supporting our liquidity requirements.

In October 2021, we issued \$1.0 billion aggregate principal amount of the 2030 Notes. The 2030 Notes were issued at par and we incurred approximately \$12.5 million in debt issuance costs. Interest on the 2030 Notes is payable semiannually in arrears on May 1 and November 1 of each year, beginning on May 1, 2022, and the entire outstanding principal amount of the 2030 Notes is due at maturity on May 1, 2030. The 2030 Notes have a fixed interest rate; therefore, we have no financial statement risk associated with changes in interest rates with respect to the 2030 Notes. Additionally, on our balance sheet we carry the 2030 Notes at face value less unamortized discount and debt issuance cost, and we present the fair value for disclosure purposes only. The fair value of our 2030 Notes will fluctuate with movements in interest rates, increasing in periods of declining rates of interest and declining in periods of increasing rates of interest, as well as from other factors.

Inflation Risk

Inflationary factors, such as increases in overhead costs, may adversely affect our results of operations. We do not believe that inflation has had a material effect on our business, financial condition or results of operations to date. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition or results of operations. Additionally, increased inflation rates may reduce consumer discretionary spending, which could affect the buying power of our users, developers, and creators and lead to a reduced demand for our Platform.

Item 8. Consolidated Financial Statements and Supplementary Data

ROBLOX CORPORATION

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Roblox Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Roblox Corporation and subsidiaries (the "Company") as of December 31, 2024 and 2023, the related consolidated statements of operations, comprehensive income/(loss), stockholders' equity, and cash flows, for each of the three years in the period ended December 31, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 18, 2025, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the Audit and Compliance Committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Revenue Recognition — Refer to Note 1 to the financial statements

Critical Audit Matter Description

The Company derives substantially all of its revenue from the sale of virtual items on the Roblox platform. The Company's performance obligation when selling virtual items to users is to provide those users with the ability to acquire, use, and hold virtual items on the Roblox platform over the estimated period of time the virtual items are available to the user, which is estimated as the average lifetime of a paying user ("customer life" for durable virtual items) or until the virtual items are consumed (for consumable virtual items). To separately identify, and account for consumable and durable virtual items, the Company specifically categorizes each purchase for the majority of virtual items purchased on the Roblox platform. For the remaining population, the Company estimates the amount of consumable and durable virtual items purchased based on data from specifically categorized purchases and the expected behavior of the users within similar experiences.

Significant judgement is exercised by management when (1) estimating the customer life, which includes analyzing the most recent trends in player cohort activities and (2) estimating the amount of consumable and durable virtual items purchased for the remaining population of purchases that are not specifically categorized ("remaining population allocation"), which includes evaluating and estimating the expected behavior of users in the population using information from known purchases in similar experiences.

Given the complexity of estimating the customer life and the remaining population allocation, auditing these estimates required a high degree of auditor judgement and increased extent of effort when performing audit procedures to evaluate the Company's judgements and conclusions.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the Company's estimated customer life and remaining population allocation included the following, among others:

- We obtained an understanding of the Company's methodology for developing the estimated customer life and remaining population allocation.
- We tested the effectiveness of internal controls related to the review of the methodology and assumptions used in estimating the customer life and remaining population allocation, including the review of inputs and assumptions.
- For the customer life estimate, we (1) tested the accuracy and completeness of the historical monthly retention data for player cohorts, (2) tested the mathematical accuracy of the Company's calculations to project future retention, and (3) assessed the impact of qualitative factors to evaluate management's judgement on future retention utilizing competitor information that is publicly available and most recent historical trends in cohort activity.
- For the remaining population allocation estimate, we (1) tested the underlying data for specifically categorized purchases used in management's analysis by selecting a sample of virtual items that were purchased as well as a sample of items from the Roblox platform and tested that such items were properly categorized between a consumable or a durable virtual item, (2) tested the mathematical accuracy of the percentage of consumable and durable goods for the specifically categorized purchases, (3) compared the composition of the virtual items purchased that were specifically categorized to those that were not specifically categorized to evaluate if the nature of the goods are similar, and (4) tested that the percentage of consumable and durable virtual items for the specifically categorized purchases was applied to the remaining population.

/s/ DELOITTE & TOUCHE LLP

San Jose, California

February 18, 2025

We have served as the Company's auditor since 2019.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Roblox Corporation

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Roblox Corporation and subsidiaries (the "Company") as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2024, of the Company and our report dated February 18, 2025, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ROBLOX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Overview and Summary of Significant Accounting Policies

Organization and Description of Business—Roblox Corporation (the “Company” or “Roblox”) was incorporated under the laws of the state of Delaware in March 2004. The Company operates a free to use immersive platform for connection and communication (the “Roblox Platform” or “Platform”) where people come to create, play, work, learn, and connect with each other in experiences built by our global community of creators. Users are free to immerse themselves in experiences on the Roblox Platform and can acquire experience-specific enhancements or avatar items by using purchased Robux, our virtual currency. Any user can be a developer or creator on the Platform using Roblox Studio, a set of free software tools. Developers and creators build the experiences that are published on Roblox and can earn Robux by monetizing their experience, creating and selling or reselling avatar items, or creating and selling Roblox Studio plugins.

Direct Listing—On March 10, 2021, the Company completed a direct listing of its Class A common stock (“Direct Listing”) on the New York Stock Exchange (“NYSE”).

Basis of Presentation and Summary of Significant Accounting Policies

Fiscal Year—The Company’s fiscal year ends on December 31.

Basis of Presentation—The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (“U.S. GAAP”), and applicable rules and regulations of the Securities and Exchange Commission (“SEC”).

Principles of Consolidation—The consolidated financial statements include the accounts of the Company and subsidiaries over which the Company has control. All intercompany transactions and balances have been eliminated. The consolidated financial statements include 100% of the accounts of wholly owned and majority owned subsidiaries, and the ownership interest of minority investors is recorded as noncontrolling interest.

Use of Estimates—The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Significant estimates and assumptions reflected in the consolidated financial statements include, but are not limited to, the estimated period of time the virtual items are available to the user, which is estimated as the average lifetime of a paying user, and the estimated amount of consumable and durable virtual items purchased for which the Company lacks specific information that is used for revenue recognition, the estimated amount of expected breakage related to prepaid card sales, useful lives of property and equipment and intangible assets, fair value of assets and liabilities acquired through acquisitions, accrued liabilities (including accrued developer exchange fees), contingent liabilities, valuation of deferred tax assets and liabilities, stock-based compensation expense, the discount rate used in measuring our operating lease liabilities, the carrying value of operating lease right-of-use assets, evaluation of recoverability of goodwill, intangible assets and long-lived assets, and as necessary, estimates of fair value to measure impairment losses. Management believes that the estimates, and judgments upon which they rely, are reasonable based upon information available to them at the time that these estimates and judgments are made. Actual results could differ from those estimates and any such differences may be material to the consolidated financial statements. To the extent that there are material differences between these estimates and actual results, the Company’s consolidated financial statements will be affected.

Revenue Recognition

Roblox Platform

The Company operates the Roblox Platform as live services that allow users to play and socialize with others for free. However, users can purchase virtual currency (“Robux”) to ultimately obtain virtual items to enhance their social experience. Proceeds from the sale of Robux are initially recorded in deferred revenue and recognized as revenue as a user purchases and uses virtual items. The Company classifies deferred revenue as short-term or long-term based on when the Company expects to recognize the revenue. The Company’s identified performance obligation is to provide users with the ability to acquire, use, and hold virtual items on the Roblox Platform over the estimated period of time the virtual items are available to the user or until the virtual items are consumed.

Users can purchase Robux as one-time purchases or through monthly subscriptions via payment processors or through prepaid cards. The Company offers prepaid cards through online and physical retailers, as well as on the Company website. The Company estimates expected breakage on prepaid card sales by taking into consideration historical patterns of redemption and escheatment laws as applicable.

Payments from users are non-refundable and relate to non-cancellable contracts for a fixed price that specify Company's obligations. Revenue is recorded net of taxes assessed by government authorities that are both imposed on and concurrent with specific revenue transactions between the Company and its users, and estimated chargebacks and refunds.

The satisfaction of the Company's performance obligation is dependent on the nature of the virtual item purchased and as a result, the Company categorizes its virtual items as either consumable or durable.

- Consumable virtual items represent items that can be consumed by a specific user action (e.g. a one-time boost or the ability to skip or redo an action). Common characteristics of consumable virtual items may include items that are no longer displayed on the user's inventory after a short period of time or do not provide the user any continuing benefit following consumption. For the sale of consumable virtual items, the Company recognizes revenue as the items are consumed.
- Durable virtual items represent items which result in a persistent change to a users' character or item set (e.g., virtual hat, pet, or house). These items are generally available to the customer to hold, use, or display for as long as they are on the Roblox Platform. The Company recognizes revenue from the sale of durable virtual items ratably over the estimated period of time the items are available to the user which is estimated as the average lifetime of a paying user.

To separately account for consumable and durable virtual items, the Company specifically identifies each purchase for the majority of virtual items purchased on the Roblox Platform. For the remaining population, the Company estimates the amount of consumable and durable virtual items purchased based on data from specifically identified purchases and the expected behavior of the users within similar experiences. The estimation of consumable and durable virtual items purchased for the population of purchases not specifically identified requires management's judgment as the Company evaluates and estimates the expected behavior of users in the population using information from known purchases in similar experiences.

At the onset of each quarter, the average lifetime of a paying user estimate is calculated based on historical monthly retention data for each user cohort to project future participation on the Roblox Platform. Determining the estimated average lifetime of a paying user requires management's judgment as the Company analyzes the most recent trends in player cohort activity and other qualitative factors, including changes to paying user behavior influenced by broader product changes and/or content virality, the availability of the Roblox Platform across markets and user demographics, impacts due to macroeconomic factors such as COVID-19, existing and new competition from a variety of entertainment resources for our users, and other factors. The Company also considers results from prior analyses in determining the estimated average lifetime of a paying user. The Company believes this estimate is the best representation of the average life of the durable virtual items.

In the second quarter of 2024, the Company updated its estimated paying user life from 28 months to 27 months, where it remained through December 31, 2024. Based on the carrying amount of deferred revenue and deferred cost of revenue as of March 31, 2024, the change resulted in an increase in revenue and cost of revenue of \$ 98.0 million and \$ 20.4 million, respectively, during fiscal year 2024.

The estimated paying user life was 28 months during fiscal year 2023.

In the first quarter of 2022, the Company updated its estimated paying user life from 23 months to 25 months, which was subsequently updated again to 28 months in the third quarter of 2022. Based on the carrying amount of deferred revenue and deferred cost of revenue as of December 31, 2021, these changes in estimates resulted in a decrease in revenue and cost of revenue of \$ 344.9 million and \$ 79.3 million, respectively, during the year ended December 31, 2022.

Principal Agent Considerations

The Company evaluates the sales of Robux via third-party payment processors to determine whether its revenues should be reported gross or net of fees either retained by the payment processor or paid to the developers and creators ("Developer Exchange Fees"). The Company is the principal in the transaction with the end user as a result of controlling, hosting, and integrating the delivery of the virtual items to the end user. The Company records revenue gross as a principal and records fees paid to payment processors as a component of cost of revenue and fees paid to developers and creators as a component of developer exchange fees expense.

Other Revenue

Other revenue primarily consists of revenue from advertising, licenses, and royalties. The Company recognizes revenue based on the performance obligations of the underlying agreements, in an amount that reflects the consideration that the Company expects to be entitled to.

Cost of Revenue—Cost of revenue primarily consists of third-party payment processing fees charged by various distribution channels in connection with sales of our virtual currency. Cost of revenue also includes sales tax expense for jurisdictions where the Company does not collect sales tax from the purchaser at the time of the sale and costs associated with the printing of prepaid cards.

Deferred Cost of Revenue—The Company defers contract costs that are direct and incremental to obtaining user contracts (i.e., sales of Robux). Deferred cost of revenue consists of payment processing fees charged by third-party payment processors. Payment processing fees are amortized over the estimated period of time the virtual items are available to the user on the Roblox Platform (based on the nature of the virtual item as either consumable or durable) in proportion to the revenue recognized. The Company classifies deferred cost of revenue as short-term or long-term based on when the Company expects to recognize the expense.

Concentration of Credit Risk and Significant Customers—Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents, short-term investments, long-term investments and accounts receivables. Cash is deposited with high quality financial institutions and may, at times, exceed federally insured limits. Management believes that the financial institutions that hold the Company's cash deposits are financially creditworthy and, accordingly, minimal credit risk exists with respect to those balances. Generally, these deposits may be redeemed upon demand and therefore, bear minimal interest rate risk. As it relates to cash equivalents, short-term investments, and long-term investments, the Company's investment policy limits the amount of credit exposure in its portfolio by imposing credit rating minimums and limiting purchases by security type.

The Company uses various distribution channels to collect and remit payments from users. As of December 31, 2024 and 2023, one distribution channel accounted for 29 % and 30 % of our accounts receivable, respectively, while a second distribution channel accounted for 26 % and 26 % of our accounts receivable, respectively.

For the years ended December 31, 2024, 2023, and 2022, one distribution channel processed 30 %, 30 %, and 32 % of our overall revenue transactions, respectively, and a second distribution channel processed 16 %, 17 %, and 18 % of our overall revenue transactions, respectively.

Fair Value Hierarchy—Assets and liabilities recorded at fair value in the consolidated financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, which are directly related to the amount of subjectivity, associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1—Inputs that are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2—Inputs (other than quoted prices included in Level 1) that are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities and which reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model.

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible as well as considers counterparty credit risk in its assessment of fair value.

Cash, Cash Equivalents and Restricted Cash—Cash and cash equivalents primarily consist of cash in hand and money market instruments with maturities of 90 days or less from the date of purchase.

We had no restricted cash balances as of December 31, 2024 and 2023.

Short-Term and Long-Term Investments—Realized gains and losses for all investments are determined using the specific-identification method and are reflected as a component of other income/(expense), net in the consolidated statements of operations.

Debt Securities

Short-term and long-term investments generally include corporate debt securities, commercial paper, U.S. Treasury securities, and U.S. agency securities. Based on our intentions, all debt investments are classified as available-for-sale and are reported at fair value with unrealized gains and losses recorded as a separate component of other comprehensive income, net of tax. The Company determines the appropriate classification of its investments as short-term or long-term at the time of purchase and reevaluates such determination at each reporting period based on their respective maturity dates and the Company's reasonable expectation with regard to those investments (e.g. expectations of future sales or redemptions).

For debt securities in an unrealized loss position, we first consider whether we intend to or it is more likely than not that we will be required to sell the individual security prior to recovery of its amortized cost basis and if so, we adjust the carrying value of security down to its fair value, with the amount of the write-down recorded as a realized loss within other income/(expense), net.

Otherwise, we determine whether a decline in fair value is attributable to a partial or full credit loss by reviewing factors such as the extent to which the fair value is less than the amortized cost basis, changes in interest rates since the purchase of the security, the financial condition of the issuer, including changes in credit ratings, the remaining payment terms of the security, as well as any adverse conditions specifically related to the security, the issuer's industry or its geographic area. If a credit loss exists, we adjust the carrying value by recording expense within other income/(expense), net equal to the amount of the credit loss, with such amount limited to the amount of the unrealized loss. Subsequent recoveries of fair value originally attributed to a credit loss are subsequently recognized as income within other income/(expense), net. Finally, any unrealized loss not deemed to be attributable to a credit loss is recognized as a component of other comprehensive income/(loss), net of tax. The Company has not experienced any material credit losses to date.

For purposes of identifying and measuring credit losses, the Company excludes any related accrued interest from both the fair value and amortized cost basis of the investment. Accrued interest receivable, net of the allowance for credit losses (if any), is recorded as a component of prepaid expenses and other current assets in our consolidated financial statements.

Equity Securities with Readily Determinable Fair Value

Short-term investments include mutual fund investments related to the Company's nonqualified deferred compensation plan, which are held in a rabbi trust. The Company classifies these investments as trading securities as the rabbi trust actively manages the asset allocation to match the participants' hypothetical fund allocations. The Company considers investments held in the rabbi trust to be restricted given their withdrawal and general use is legally restricted.

All equity investments are reported at fair value, with unrealized gains and losses recorded within other income/(expense), net in our consolidated statement of operations.

Deferred Compensation Plan—The Company established the Roblox Corporation Nonqualified Deferred compensation Plan (as amended, the "NQDC Plan") for its non-employee directors and a select group of management employees. Eligible participants may voluntarily elect to participate in the NQDC Plan. Unless otherwise determined by the committee that administers the NQDC Plan, eligible employee participants may elect annually to defer up to 90 % of their base salary, up to 100 % of their cash bonus compensation (if any), and up to 65 % of any RSUs or PSUs granted under the Company's 2020 Plan (if any), and eligible non-employee director participants may elect annually to defer up to 100 % of their cash director fees and any RSUs granted under the Company's 2020 Plan. Obligations of the Company under the NQDC Plan represent at all times unsecured general obligations of the Company to pay deferred compensation in the future in accordance with the terms of the NQDC Plan.

Cash amounts deferred under the plan may only later be settled in cash and are credited or charged with the performance of investment options offered under the NQDC Plan as elected by the participants. The amount credited or charged to each participant's cash deferrals are based on the performance of a hypothetical portfolio of investments which are tracked by an administrator, with such credits or charges included as a component of operating expenses in the Company's consolidated statements of operations. The cash obligations due to participants are presented as other long-term liabilities on the Company's consolidated balance sheet.

The Company generally funds the cash obligations associated with the NQDC Plan by purchasing investments that match the hypothetical investment choices made by the plan participants. The investments (and any uninvested cash) are held in a rabbi trust in order to receive certain tax benefits. The rabbi trust is subject to creditor claims in the event of insolvency, but the assets held in the rabbi trust are not available for general corporate purposes. The investments held in the rabbi trust are presented as short-term investments and any uninvested cash is presented as cash and cash equivalents on the Company's consolidated balance sheet.

As it relates to any deferred RSUs and PSUs, the Company ensures enough shares of its Class A common stock are reserved to settle all obligations under the NQDC Plan. These obligations are settled on the date(s) elected by the participant. The accounting for the RSUs and PSUs deferred under the NQDC Plan is consistent with the accounting for non-deferred RSUs and PSUs.

Accounts Receivable and Related Allowances—Accounts receivable represent amounts due to us based on contractual obligations with our customers. Payments made by the Company's users are collected by payment processors and remitted to the Company generally within 30 days of invoicing. The Company maintains allowances for potential credit losses when deemed necessary. The Company has not experienced any material credit losses to date. In cases where the Company is aware of circumstances that may impair a specific customer's ability to meet its financial obligations, it records a specific allowance as a reduction to the accounts receivable balance to reduce it to its net realizable value. In addition, the Company holds a reserve for chargebacks and refunds based on historical data and current trends and projections. Specific allowances, chargeback, and refund reserves have not been material for any of the periods presented.

Property and Equipment—Net — Property and equipment are recorded at historical cost less accumulated depreciation and amortization. Depreciation and amortization are recorded on a straight line basis over the estimated useful lives of the respective assets. Repair and maintenance costs are expensed as incurred. The estimated useful life for each asset category is as follows:

Property and Equipment	Estimated Useful Life
Servers and related equipment	5 years
Computer hardware and software	2 - 5 years
Furniture and fixtures	2 years
Leasehold improvements	Shorter of remaining lease term or estimated useful life

Goodwill and Intangible Assets—Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination and is allocated to reporting units expected to benefit from the business combination. Goodwill is not amortized but rather tested for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. When conducting our annual goodwill impairment assessment, we perform a quantitative evaluation by comparing the estimated fair value of our single reporting unit, determined using the Company's market capitalization as of the testing date, to its carrying value. Goodwill impairment is recognized when the quantitative assessment results in the carrying value exceeding the fair value, in which case an impairment charge is recorded to the extent the carrying value exceeds the fair value. There were no impairment charges to goodwill during any of the periods presented.

Intangible assets with finite lives are carried at cost, less accumulated amortization. Intangible assets with finite lives are generally amortized on a straight-line basis over the estimated useful life of the respective asset, generally up to 5 years, or in the case of acquired patents, up to 10 years.

Business Combinations and Asset Acquisitions —To determine whether a transaction is accounted for as an asset acquisition or business combination, the Company applies a screen test to evaluate if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets. If the screen test does not result in substantially all of the fair value concentrated in a single identifiable asset or group of similar identifiable assets, the Company performs a second test to evaluate whether the assets and activities transferred include inputs and substantive processes that together, significantly contribute to the ability to create outputs, which would constitute a business. If the result of the second test indicates that the acquired assets and activities constitute a business, the Company accounts for the transaction as a business combination.

For business combinations, the purchase consideration is allocated to the tangible assets acquired, liabilities assumed, and intangible assets acquired based on their respective estimated fair values. The excess of the fair value of purchase consideration over their fair values is recorded as goodwill. The Company's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable, and as a result, actual results may differ from estimates. As a result, during the measurement period, which may be up to one year following the acquisition date, if new information is obtained about facts and circumstances that existed as of the acquisition date, the Company may record adjustments to the fair value of these assets and liabilities, with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded within the accompanying consolidated statements of operations.

The Company accounts for a transaction as an asset acquisition when substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets, or otherwise does not meet the definition of a business. Asset acquisition-related costs are capitalized as part of the asset or assets acquired.

Software Development Costs—The Company incurs costs related to developing the Roblox Platform and related support systems. The Company capitalizes development costs, such as salaries and wages, stock-based compensation expense, and other direct compensation-related costs, once the preliminary project stage is completed, management has authorized and committed project funding, and it is probable that the project will be completed and the software will be used as intended. Development costs meeting the Company's capitalization criteria were not material during any of the periods presented.

Impairment of Long-Lived Assets—The Company periodically evaluates the carrying value of long-lived assets to be held and used when indicators of impairment exist. The carrying value of a long-lived asset to be held and used is considered impaired when the estimated separately identifiable undiscounted cash flows expected to result from the use of the asset and its eventual disposition are less than the carrying value of the asset. In that event, an impairment loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset.

Significant judgment is required to assess the appropriate asset grouping(s) and estimate the amount and timing of future cash flows and the relative risk of achieving those cash flows. Assumptions and estimates about future values and remaining useful lives are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in the Company's business strategy and internal forecasts.

Developer Exchange Fees Expense —The Company has established an incentive program for developers and creators to build and operate virtual experiences within the Roblox environment. Developers and creators can primarily earn Robux through the sale of access to their experiences and enhancements in their experiences, the incorporation of immersive ads, the sale of content and tools between developers through the Creator Store, and the sale of items to users through the Marketplace. Developers can also earn Robux through our engagement-based reward program that rewards developers based on the number of hours spent in their experiences by Roblox Premium subscribers. Under certain conditions, and in compliance with applicable law, these developers and creators are eligible to receive a fiat currency payout based on the amount of accumulated earned Robux through our Developer Exchange Program. In order to be qualified for our Developer Exchange Program and eligible to exchange earned Robux for fiat currency, developers and creators must meet certain conditions, such as having earned the minimum amount of Robux required to qualify for the program, a verified developer account, and an account in good standing. On January 31, 2022, we reduced the minimum amount of earned Robux required to qualify for the program from 100,000 Robux to 50,000 Robux and subsequently on January 31, 2023, we further reduced the minimum requirement from 50,000 Robux to 30,000 Robux.

The Company recognizes the expense associated with the Developer Exchange Program as Robux are earned by developers and creators that are qualified and registered in the Developer Exchange Program.

Infrastructure and Trust & Safety Expense —Infrastructure and trust & safety expense consists primarily of costs related to the operation of our data centers and technical infrastructure in order to deliver our Platform to our users and are expensed as incurred. Infrastructure and trust & safety expenses also include personnel costs, moderation and customer support related costs, and allocated overhead expenses.

Research and Development Cost — Research and development costs consist primarily of personnel costs and allocated overhead expenses for our engineering, design, product management, data science, and other employees engaged in maintaining and enhancing the functionality of the Platform and are expensed as incurred. Research and development costs also include expenses associated with the Game Fund program, which funds certain developers up front to develop new types of experiences for the Platform.

Stock-Based Compensation Expense—The Company measures and recognizes stock-based compensation expense for all stock-based awards, including stock options, unregistered restricted stock awards (“RSAs”), restricted stock units (“RSUs”), and performance stock units (“PSUs”) granted to employees, directors, and non-employees, and stock purchase rights granted under the 2020 Employee Stock Purchase Plan (the “2020 ESPP”) to employees, based on the estimated grant date fair value of the awards. The Company records forfeitures when they occur for all stock-based awards.

The fair value of each stock option and stock purchase right granted is estimated using the Black-Scholes option-pricing model and is recognized as compensation expense on a straight-line basis over the requisite service period of the awards. The Black-Scholes option pricing model requires certain subjective inputs and assumptions, including the fair value of the Company’s Class A common stock, the expected term, risk-free interest rates, expected stock price volatility, and expected dividend yield of our Class A common stock. The assumptions used to determine the fair value of the option awards represent management’s best estimates. These estimates involve inherent uncertainties and the application of management’s judgment. These assumptions and estimates are as follows:

- Fair value of Class A common stock— Prior to the Direct Listing, the fair value of the shares of Class A common stock underlying the stock options and RSUs was historically determined by the Company’s Board of Directors along with management as there was no public market for the underlying common stock. The Company’s Board of Directors along with management determined the fair value of the Company’s common stock by considering a number of objective and subjective factors including: contemporaneous third-party valuations of its common stock, the valuation of comparable companies, sales of the Company’s common and convertible preferred stock to outside investors in arms-length transactions, the Company’s operating and financial performance, the lack of marketability, and the general and industry specific economic outlook, amongst other factors. After the completion of the Direct listing, the fair value of the Company’s Class A common stock is determined based on the NYSE closing price on the date of grant.
- Expected term—The expected term represents the period that stock-based awards are expected to be outstanding. The expected term assumptions are determined based on the vesting terms, estimated exercise behavior, post-vesting cancellations and contractual lives of the awards.
- Risk-free interest rates—The risk-free interest rate is based on the implied yields in effect at the time of the grant of U.S. Treasury notes with terms approximately equal to the expected term of the award.
- Expected stock price volatility— Prior to the Direct Listing, the Company used the historical volatility of the Class A common stock price of similar publicly-traded peer companies. After the completion of the Direct Listing, the Company continued to use the historical volatility of the stock price of similar publicly traded peer companies until the first quarter of 2024, which is the point at which the Company believed it had sufficient public trading history.
- Expected dividend yield—The Company utilizes a dividend yield of zero, as it has no history or plan of declaring dividends on its common stock.

RSUs granted by the Company prior to March 2021 vest upon the satisfaction of both a service-based vesting condition, which is typically four years , and a liquidity event-related performance vesting condition. The liquidity event-related performance vesting condition was satisfied on March 2, 2021 (the “Effective Date”) and the Company recorded a cumulative stock-based compensation expense as of the Direct Listing date for those RSUs for which the service-based vesting condition has been satisfied. Stock-based compensation related to the remaining service-based period after the liquidity event-related performance vesting condition was satisfied is recorded over the remaining requisite service period using the accelerated attribution method. For RSUs granted subsequent to the Direct Listing, we recognize stock-based compensation expense based on grant date fair value on a straight-line basis over the requisite service period for the entire award. The grant date fair value of our Class A common stock associated with our RSUs granted subsequent to the Direct Listing is determined based on the NYSE closing price on the date of grant.

Advertising Expense—Costs for advertising are primarily expensed as incurred and are included in sales and marketing expense in our consolidated statement of operations. Advertising costs totaled \$ 45.4 million, \$ 38.3 million, and \$ 36.2 million during the years ended December 31, 2024, 2023, and 2022, respectively.

Basic and Diluted Net Loss Per Common Share—Basic net loss per share is computed by dividing net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period. Diluted net loss per share is computed by giving effect to all potentially dilutive common stock equivalents to the extent they are dilutive. For purposes of this calculation, convertible preferred stock, stock options, RSUs, PSUs, RSAs, convertible preferred stock warrants, and common stock warrants, as applicable, are considered to be common stock equivalents but have been excluded from the calculation of diluted net loss per share attributable to common stockholders as their effect is anti-dilutive for all periods presented.

Income Taxes—The Company accounts for income taxes using the asset and liability method. Deferred income taxes are recognized by applying enacted statutory tax rates applicable to future years to differences between the consolidated financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statement of operations in the period that includes the enactment date. The measurement of deferred tax assets is reduced, if necessary, by a valuation allowance for any tax benefit for which the future realization is uncertain.

The tax effects of a position are recognized only if it is more likely than not to be sustained based solely on its technical merits as of the reporting date. The Company considers many factors when evaluating and estimating its tax positions and tax benefits, which may require periodic adjustments.

The Company recognizes interest and penalties related to income taxes as components of interest expense and other expense, respectively.

Leases—The Company accounts for lessee and lessor arrangements as follows:

Lessee Arrangements

The Company leases facilities under non-cancellable operating lease agreements primarily for real estate and co-located data centers. These leases have varying terms up to 12 years and generally contain leasehold improvement incentives, rent holidays, and escalation clauses. In addition, some of these leases have renewal options for up to five years after expiration of the initial term. The Company determines if an arrangement contains a lease at inception. The Company determines if a contract contains a lease based on whether we have the right to obtain substantially all of the economic benefits from the use of an identified asset and whether we have the right to direct the use of an identified asset in exchange for consideration.

Operating lease right-of-use (“ROU”) assets represent our right to use an underlying asset for the lease term. Operating lease liabilities represent our obligation to make lease payments arising from the lease at the commencement date and are recognized based on the present value of lease payments over the lease term at the lease commencement date. Operating lease ROU assets are recognized as the lease liability, adjusted for lease incentives received, initial direct costs, and prepayments made, if any.

In determining the present value of lease payments, the Company discounts future lease payments using its incremental borrowing rate (“IBR”) since the implicit rate in our various leases is unknown. The IBR represents the rate of interest the Company would have to pay to borrow on a collateralized basis over a similar term at an amount equal to the lease payments in a similar economic environment. The Company utilizes a market-based approach to estimate the IBR, which requires significant judgment. The Company primarily considers the current economic environment, lease term and currency in which the lease is denominated, as well as (i) yields on corporate bond with a credit rating similar to the Company; (ii) yields on our outstanding unsecured debt; and (iii) indicative pricing on both secured and unsecured debt received from potential lenders (if any).

Certain lease agreements include options to renew or early terminate the lease, and we include such extension periods when it is reasonably certain that they will be exercised and include such periods beyond the early termination date when it is reasonably certain the early terminations will not be exercised.

Lease expense is recognized on a straight-line basis over the lease term.

Variable lease payments are expensed when the underlying uncertainty is resolved, which is generally when the obligation for those costs are incurred and are excluded from the measurement of the right-of-use assets and lease liabilities. Variable lease payments primarily include common-area maintenance, utilities, taxes or other operating costs, which are generally based on a percentage of actual expenses incurred or a fluctuating rate which is unknown at the inception of the contract.

Leases with an initial term of 12 months or less ("short-term leases") are not recognized on the balance sheet. The Company recognizes lease expense for short-term leases on a straight-line basis over the lease term. The Company does not account for lease components (e.g., fixed payments including rent) separately from the non-lease components (e.g., common-area maintenance costs).

Lessor Arrangements

The Company has subleased office space in its former San Mateo, California corporate headquarters. The Company does not separate lease components from non-lease components and therefore allocates the entire consideration in its contracts to the lease components. All of the lease and non-lease components qualify for accounting under *ASC Topic 842 Leases*. The Company presents sublease income as a reduction to lease expense.

Foreign Currency Transactions—Beginning January 1, 2024, the functional currency of certain non-U.S. dollar functional currency international subsidiaries was re-assessed from the U.S. dollar to the local currency that the international subsidiary operates in. Prior to January 1, 2024, the functional currency of the Company's international subsidiaries was primarily the U.S. dollar. The effects of the changes in functional currency were not significant to our consolidated financial statements.

The Company translates the financial statements of non-U.S. dollar functional currency subsidiaries to U.S. dollars using the period-end exchange rate for assets and liabilities and the average exchange rate for the period for revenues and expenses. The effects of foreign currency translation are included in stockholders' equity and periodic movements are summarized as a line item in the consolidated statements of comprehensive loss.

The Company reflects foreign exchange transaction gains and (losses) resulting from the conversion of the transaction currency to the functional currency, which includes gains and losses from the remeasurement of assets and liabilities, as a component of other income/(expense), net. Net foreign exchange losses totaled \$ 14.1 million, \$ 2.0 million, and \$ 5.1 million for the years ended December 31, 2024, 2023, and 2022, respectively.

Reportable Segments—Roblox derives revenue globally and manages its business activities on a consolidated basis, resulting in a single operating and reportable segment, which is at the consolidated level. The technology used in its customer arrangements is primarily based on a similar software application that is available on various platforms, such as mobile devices, consoles, and computers, that is used by customers in a similar manner.

The chief operating decision maker ("CODM") of the Company is its chief executive officer ("CEO") who assesses performance of our single operating segment and decides how to allocate resources based on consolidated net loss that is reported on the consolidated statement of operations, as well as through other performance measures. The CODM considers consolidated net loss in deciding how to reinvest profits into the Company, including to its developer and creator community, people, and technology and infrastructure, including its trust and safety systems, and other areas such as for acquisitions.

The measure of segment assets is reported on the consolidated balance sheet as total assets.

Accounting Pronouncements

Accounting Pronouncements Recently Adopted

In November 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2023-07, "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures," which requires public entities to disclose expanded information about their reportable segment(s)' significant expenses and other segment items on an interim and annual basis. The Company adopted the ASU retrospectively on January 1, 2024 and the adoption did not have a material impact on the Company's consolidated financial statements, outside of the enhanced disclosures under the "Reportable Segments" header above and Note 17, "Reportable Segments".

Accounting Pronouncements Not Yet Adopted

In December 2023, the FASB issued ASU 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures," which requires public entities to disclose specific tax rate reconciliation categories, as well as income taxes paid disaggregated by jurisdiction, amongst other disclosure enhancements. The ASU is effective for financial statements issued for annual periods beginning after December 15, 2024, with early adoption permitted. The ASU can be adopted on a prospective or retrospective basis. The Company is evaluating the disclosure requirements related to the new standard.

In November 2024, the FASB issued ASU 2024-03, "Income Statement: Reporting Comprehensive Income-Expense Disaggregation Disclosures," which requires disclosure of certain costs and expenses in the notes of financial statements, including, amongst others, the amount of employee compensation expense and depreciation and amortization expense within each caption presented on the face of the income statement within continuing operations. Further, the disclosures require a qualitative description of the remaining cost and expense amounts within each relevant expense caption that are not separately disaggregated, as well as a description and the total amount of selling expenses. The ASU is effective for financial statements issued for annual periods beginning after December 15, 2026 and interim periods within fiscal years beginning after December 15, 2027. The ASU can be early adopted and should be applied either prospectively or retrospectively. The Company is currently evaluating the disclosure requirements related to the new standard.

2. Revenue from Contracts with Customers

Disaggregation of Revenue

The following table summarizes revenue by region based on the billing country of users (in thousands, except percentages):

	Year Ended December 31,					
	2024		2023		2022	
	Amount	Percentage of Revenue	Amount	Percentage of Revenue	Amount	Percentage of Revenue
United States and Canada ⁽¹⁾	\$ 2,281,319	63 %	\$ 1,803,812	64 %	\$ 1,465,955	66 %
Europe	659,593	18	505,633	18	404,431	18
Asia-Pacific, including Australia and New Zealand	379,027	11	286,930	10	204,261	8
Rest of world	282,040	8	202,899	7	150,405	7
Total	\$ 3,601,979	100 %	\$ 2,799,274	100 %	\$ 2,225,052	100 %

(1) The Company's revenues in the United States were 59 %, 60 %, and 62 % of consolidated revenues for each of the years ended December 31, 2024, 2023, and 2022, respectively.

No individual country, other than the United States, exceeded 10% of the Company's consolidated revenue for any period presented.

Durable virtual items accounted for 91 %, 91 %, and 90 % of virtual item-related revenue in the years ended December 31, 2024, 2023, and 2022, respectively. Consumable virtual items accounted for 9 %, 9 %, and 10 % of virtual item-related revenue in the years ended December 31, 2024, 2023, and 2022, respectively.

Deferred Revenue

The Company receives payments from its users based on the payment terms established in its contracts. Such payments are initially recorded to deferred revenue and are recognized into revenue as the Company satisfies its performance obligations. The aggregate amount of revenue allocated to unsatisfied performance obligations is included in our deferred revenue balances.

The increase in deferred revenue for the year ended December 31, 2024 was driven by sales during the period exceeding revenue recognized from the satisfaction of our performance obligations, which includes the revenue recognized during the period that was included in the current portion of deferred revenue at the beginning of the period. During the year ended December 31, 2024, we recognized all of the revenue that was included in the \$ 2,406.3 million current deferred revenue balance as of December 31, 2023 and \$ 89.0 million of revenue that was included in the deferred revenue-net of current portion balance as of December 31, 2023.

3. Leases

Lessee Arrangements

In the fourth quarter of 2024, the Company completed the move of its San Mateo, California employees to its new corporate headquarters in San Mateo, California. The Company continues to lease office space at its prior corporate headquarters and has sub-leased certain portions of that office space (refer to "Sublease Arrangements as Lessor" header below). The Company completed its impairment assessment of the non-subleased portion of its prior corporate headquarters in the fourth quarter of 2024, finding no impairment to exist.

The Company took possession of a data center leased space in the first quarter of 2024 and later de-recognized the remaining \$ 70.3 million of right-of-use assets and lease liabilities associated with the lease in the third quarter of 2024 due to an early termination. The early termination did not have a material impact on the results of operations during the fiscal year 2024.

During the year ended December 31, 2023, the Company recognized a \$ 7.0 million impairment loss within general and administrative expenses, which included \$ 4.8 million related to operating lease right-of-use assets and \$ 2.2 million related to property and equipment, net, as a result of the execution of a sub-lease arrangement for a portion of its prior San Mateo, California corporate headquarters.

The components of lease expense were as follows (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Operating lease expense	\$ 174,174	\$ 139,482	\$ 90,933
Variable and short-term lease expense	53,627	31,655	11,586
Net operating lease expense	\$ 227,801	\$ 171,137	\$ 102,519

The following table presents future lease payments under the Company's non-cancellable operating leases, including leases the Company has assigned, as of December 31, 2024 (in thousands):

Year ending December 31,	
2025	\$ 144,431
2026	153,386
2027	132,737
2028	115,569
2029	105,194
Thereafter	377,010
Total lease payments	\$ 1,028,327
Less: imputed interest ⁽¹⁾	(229,419)
Present value of lease liabilities	\$ 798,908

(1) Calculated using each lease's incremental borrowing rate.

In addition, the Company has executed operating leases for real estate and co-located data centers which have not commenced as of December 31, 2024, with lease payments totaling \$ 20.9 million and lease terms ranging between 5 to 6 years.

The following table presents the weighted average remaining lease term and discount rates as of December 31, 2024, and December 31, 2023:

	As of December 31,	
	2024	2023
Weighted average remaining lease term (years)	7.5	7.9
Weighted average discount rate	6.3 %	6.3 %

Supplemental cash and noncash information related to operating leases is as follows (in thousands):

	Year ended December 31,		
	2024	2023	2022
Cash paid for amounts included in the measurement of lease liabilities ⁽¹⁾	\$ 158,381	\$ 105,337	\$ 70,515
Lease liabilities arising from obtaining new right-of-use assets (noncash)	\$ 120,822	\$ 256,500	\$ 373,844

(1) The years ended December 31, 2024, 2023, and 2022 exclude \$ 31.5 million, \$ 16.6 million, and \$ 1.8 million, respectively, of leasehold incentives received from the landlord.

Sublease Arrangements as Lessor

The Company has executed subleases as sub-lessor pursuant to which it has subleased office space in its former San Mateo, California corporate headquarters with lease terms expiring in 2027. The Company recognized \$ 8.4 million and \$ 3.3 million of sublease income in the years ended December 31, 2024 and 2023, respectively.

The following table presents future sublease payments due to the Company under its subleases as of December 31, 2024 (in thousands):

Year ending December 31,	
2025	\$ 9,713
2026	10,530
2027	5,434
Thereafter	—
Total sublease income	\$ 25,677

4. Cash Equivalents and Investments

Financial Assets

The following is a summary of the Company's cash equivalents and short-term and long-term investments (in thousands):

As of December 31, 2024							
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cash Equivalents	Short-Term Investments	Long-Term Investments
Debt Securities							
Level 1							
Money market funds	\$ 615,890	\$ —	\$ —	\$ 615,890	\$ 615,890	\$ —	\$ —
U.S. Treasury securities	2,159,558	1,886	(4,446)	2,156,998	—	1,402,694	754,304
Subtotal	2,775,448	1,886	(4,446)	2,772,888	615,890	1,402,694	754,304

⁽¹⁾ The equity securities relate to the Company's nonqualified deferred compensation plan and are held in a rabbi trust. Refer to Note 1, "Overview and Summary of Significant Accounting Policies", section titled "Deferred Compensation Plan" to the notes to the consolidated financial statements for more information.

As of December 31, 2024, all of the Company's short-term debt investments have contractual maturities of one year or less and all of the Company's long-term debt investments have contractual maturities between one and five years .

Changes in market interest rates, credit risk of borrowers and overall market liquidity, amongst other factors, may cause our short-term and long-term debt investments to fall below their amortized cost basis, resulting in unrealized losses. For those debt securities in an unrealized loss position as of December 31, 2024, the unrealized losses were primarily driven by increases in interest rates following the date of purchase and the Company does not intend to sell, nor is it more likely than not it will be required to sell, such securities before recovering the amortized cost basis.

The following table presents fair values and gross unrealized losses, aggregated by investment category and the length of time that individual securities have been in a continuous loss position (in thousands):

	As of December 31, 2024					
	Less Than 12 Months		12 Months or Greater		Total

5. Acquisitions

Speechly, Inc.

On September 18, 2023 (the "Speechly Acquisition Date"), the Company acquired all outstanding equity interests of Speechly, Inc. and its wholly owned Finnish subsidiary Speechly Oy (together, "Speechly"). Speechly was a privately held company that operated a speech recognition software focused on voice moderation. The acquisition has been accounted for as a business combination. The consideration totaled \$ 10.1 million, which included (i) \$ 4.8 million of cash paid on the Speechly Acquisition Date and (ii) \$ 5.3 million of cash held back until certain post-acquisition conditions are satisfied.

The following table summarizes the Company's allocation of the purchase consideration based on the fair value of assets acquired and liabilities assumed at the Speechly Acquisition Date (in thousands):

	September 18, 2023
Cash and cash equivalents	\$ 970
Other current assets acquired	111
Intangible assets, net	
Developed technology, useful life of five years	2,800
Goodwill	7,536
Other current liabilities assumed	\$ (1,117)
Other long-term liabilities assumed	(182)
Total purchase price	<u>\$ 10,118</u>

Goodwill is attributable to the assembled workforce and anticipated synergies arising from the acquisition. The goodwill recognized is not deductible for income tax purposes.

Byfron Technologies, LLC Acquisition

On October 11, 2022 (the "Byfron Acquisition Date"), the Company acquired all outstanding equity interests of Byfron Technologies, LLC ("Byfron"), a privately-held company that operated a security and anti-cheat software for game publishers. The acquisition has been accounted for as a business combination. The consideration totaled \$ 9.6 million, which included \$ 2.0 million of cash to be held back for 18 months following the Byfron Acquisition Date. The aggregate purchase consideration comprised of the following (in thousands):

	Fair Value
Cash paid	\$ 7,603
Cash holdback	2,000
Total purchase price	\$ 9,603

In connection with the acquisition, the Company also entered into agreements with the Byfron founders, which provide them \$ 9.6 million over a three year service period following the Byfron Acquisition Date, subject to their continued service with the Company during that period. The agreements were determined to primarily benefit the Company and were recognized separate from the business combination. The expense associated with these agreements is being recognized ratably over the requisite service period of three years as a component of research and development expense.

The following table summarizes the Company's allocation of the purchase consideration based on the fair value of assets acquired and liabilities assumed at the Byfron Acquisition Date (in thousands):

	October 11, 2022
Cash and cash equivalents	\$ 380
Goodwill	3,882
Identified intangible assets	5,500
Other assets	169
Other current liabilities	\$ (328)
Total purchase price	\$ 9,603

The following table presents details of the identifiable assets acquired (in thousands, except estimated useful life):

	Carrying Amount	Estimated Useful Life (Years)
Developed technology	\$ 5,500	5
Total	\$ 5,500	

Goodwill is primarily attributable to the assembled workforce and anticipated synergies arising from the acquisition. The goodwill recorded in the acquisition is deductible for income tax purposes.

Hamul, Inc. Acquisition

On April 1, 2022 (the “Hamul Acquisition Date”), the Company acquired all outstanding equity interests of Hamul, Inc. (“Hamul”) a privately-held company that provided a platform for connecting gaming communities. The acquisition has been accounted for as a business combination. The fair value of the consideration transferred was \$ 19.3 million, which consisted of \$ 9.2 million paid in cash and 0.4 million shares of Class A common stock with a fair value of \$ 4.0 million. The aggregate purchase consideration was comprised of the following (in thousands):

	Fair Value
Cash paid	\$ 9,185
Common stock issued	4,009
Replacement awards attributable to pre-acquisition service	6,129
Total purchase price	\$ 19,323

In connection with the acquisition, the Company entered into a stock-based consideration revesting agreement with the Hamul founders. The portion of the fair value of the common stock associated with pre-acquisition service of the Hamul founders represented a component of the total purchase consideration, as presented above. The remaining acquisition-date fair value of \$ 7.6 million of these issued shares was excluded from the purchase price. These shares, which are subject to the recipients’ continued service with the Company, are being recognized ratably as stock-based compensation expense as a component of research and development expense over the requisite service period of three years following the Hamul Acquisition Date.

The following table summarizes the Company’s allocation of the purchase consideration based on the fair value of assets acquired and liabilities assumed at the Hamul Acquisition Date (in thousands):

	April 1, 2022
Cash and cash equivalents	\$ 3,020
Goodwill	12,382
Identified intangible assets	4,500
Deferred tax liabilities	(579)
Total purchase price	\$ 19,323

The following table presents details of the identifiable assets acquired (in thousands, except estimated useful life):

	Carrying Amount	Estimated Useful Life (Years)
Developed technology	\$ 4,500	5
Total	\$ 4,500	

Goodwill is attributable to the assembled workforce and anticipated synergies arising from the acquisition. The goodwill recognized is not deductible for income tax purposes.

6. Goodwill and Intangible Assets

Goodwill

The following table represents the changes to goodwill from December 31, 2022 to December 31, 2024 (in thousands):

	Carrying Amount
Balance as of December 31, 2022	\$ 134,335
Additions from acquisitions	7,536
Foreign currency translation adjustments	258
Balance as of December 31, 2023	\$ 142,129
Foreign currency translation adjustments	(441)
Balance as of December 31, 2024	\$ 141,688

There are no accumulated impairment losses for any period presented.

Intangible Assets

The following tables present details of the Company's finite-lived intangible assets as of December 31, 2024 and December 31, 2023 (in thousands):

	As of December 31, 2024		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Developed technology	\$ 75,291	\$ (54,348)	\$ 20,943
Patents	14,200	(2,150)	12,050
Assembled workforce	10,000	(9,750)	250
Trade name	500	(333)	167
Total intangible assets	\$ 99,991	\$ (66,581)	\$ 33,410

	As of December 31, 2023		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Developed technology	\$ 75,455	\$ (39,411)	\$ 36,044
Patents	14,200	(650)	13,550
Assembled workforce	10,000	(7,374)	2,626
Trade name	500	(233)	267
Total intangible assets	\$ 100,155	\$ (47,668)	\$ 52,487

The above tables do not include \$ 0.7 million and \$ 0.6 million of indefinite lived intangible assets as of December 31, 2024 and December 31, 2023, respectively.

As of December 31, 2024, the weighted-average remaining useful lives of our finite-lived intangible assets were 1.4 years for developed technology, 8.2 years for patents, 0.1 years for assembled workforce, 1.7 years for trade names, and 2.2 years in total, for all finite-lived intangible assets.

Amortization expense related to our finite-lived intangible assets was \$ 18.9 million, \$ 19.3 million, and \$ 16.4 million for the years ended December 31, 2024, 2023, and 2022, respectively.

Expected future amortization expenses related to the Company's finite lived intangible assets as of December 31, 2024 are as follows (in thousands):

Year ending December 31:		
2025	\$	15,694
2026		6,660
2027		3,096
2028		1,910
2029		1,500
Thereafter		4,550
Total remaining amortization expense	\$	33,410

7. Other Balance Sheet Components

Prepaid expenses and other current assets

Prepaid expenses and other current assets consisted of the following (in thousands):

	As of December 31,	
	2024	2023
Prepaid expenses	\$ 47,919	\$ 48,555
Accrued interest receivable	19,690	14,697
Other current assets	7,806	11,297
Total prepaid expenses and other current assets	\$ 75,415	\$ 74,549

Property and equipment, net

Property and equipment, net, consisted of the following (in thousands):

	As of December 31,	
	2024	2023
Servers and related equipment and software	\$ 898,598	\$ 914,989
Computer hardware and software licenses	55,002	43,732
Furniture and fixtures	2,121	520
Leasehold improvements	245,150	101,785
Construction in progress	46,158	77,043
Total property and equipment	1,247,029	1,138,069
Less accumulated depreciation and amortization expense	(587,440)	(442,709)
Property and equipment—net	\$ 659,589	\$ 695,360

Construction in progress primarily relates to network equipment infrastructure to support the Company's data centers and leasehold improvements for the Company's leased office buildings and data centers.

Property and equipment, net, by geographic area was as follows (in thousands):

	As of December 31,	
	2024	2023
United States	\$ 615,665	\$ 646,572
Rest of world	43,924	48,788
Total	\$ 659,589	\$ 695,360

In the third quarter of 2024, the Company re-assessed the estimated useful life of certain software licenses, resulting in the acceleration of their remaining depreciation expense of \$ 17.9 million within infrastructure and trust & safety expenses.

Total depreciation and amortization expense of property and equipment was \$ 207.5 million, \$ 188.9 million, and \$ 113.7 million for years ended December 31, 2024, 2023, and 2022, respectively.

Accrued expenses and other current liabilities

Accrued expenses and other current liabilities consisted of the following (in thousands):

	As of December 31,	
	2024	2023
Accrued operating expenses and liabilities	\$ 49,478	\$ 51,921
Short-term operating lease liabilities	128,857	111,293
Accrued interest on the 2030 Notes	6,458	6,458
Taxes payable	54,609	59,632
Accrued compensation and other employee related liabilities	28,147	32,125
Other current liabilities	8,205	9,692
Total accrued expenses and other current liabilities	\$ 275,754	\$ 271,121

8. Debt

2030 Notes

On October 29, 2021, the Company issued \$ 1.0 billion aggregate principal amount of its 3.875 % Senior Notes due 2030 (the "2030 Notes"). The 2030 Notes mature on May 1, 2030. The 2030 Notes bear interest at a rate of 3.875 % per annum. Interest on the 2030 Notes is payable semi-annually in arrears on May 1 and November 1 of each year, commencing on May 1, 2022.

The aggregate proceeds from the offering of the 2030 Notes were approximately \$ 987.5 million, after deducting lenders costs and other issuance costs incurred by the Company. The issuance costs of \$ 12.5 million are amortized into interest expense using the effective interest method over the term of the 2030 Notes.

The Company may voluntarily redeem the 2030 Notes, in whole or in part, under the following circumstances:

- (1) Prior to November 1, 2024, the Company could have, on any one or more occasions, redeemed up to 40 % of the aggregate principal amount of the 2030 Notes at a redemption price of 103.875 % of the principal amount including accrued and unpaid interest, if any, with the net cash proceeds of certain equity offerings; provided that (1) at least 50 % of the aggregate principal amount of 2030 Notes originally issued remained outstanding immediately after the occurrence of such redemption (excluding 2030 Notes held by the Company and its subsidiaries); and (2) the redemption occurred within 180 days of the date of the closing of such equity offerings.
- (2) On or after November 1, 2024, the Company may voluntarily redeem all or a part of the 2030 Notes at the following redemption prices (expressed as percentages of principal amount), plus accrued and unpaid interest, if any, to, but excluding, the applicable redemption date:

Year	Percentage
2024	101.938 %
2025	100.969 %
2026 and thereafter	100.000 %

- (3) Prior to November 1, 2024, the Company could have redeemed all or a part of the 2030 Notes at a redemption price equal to 100 % of the principal amount of 2030 Notes redeemed, including accrued and unpaid interest, if any, plus the applicable "make-whole" premium set forth in the indenture governing the 2030 Notes (the "Indenture") as of the date of such redemption; and
- (4) In connection with any tender offer for the 2030 Notes, including an offer to purchase (as defined in the Indenture), if holders of not less than 90 % in aggregate principal amount of the outstanding 2030 Notes validly tender and do not withdraw such notes in such tender offer and the Company (or any third party making such a tender offer in lieu of the Company) purchases all of the 2030 Notes validly tendered and not withdrawn by such holders, the Company (or such third party) will have the right, upon not less than 10 , but not more than 60 days' prior notice, given not more than 30 days following such purchase date to the holders of the 2030 Notes and the trustee, to redeem all of the 2030 Notes that remain outstanding following such purchase at a redemption price equal to the price offered to each holder of 2030 Notes (excluding any early tender or incentive fee) in such tender offer plus to the extent not included in the tender offer payment, accrued and unpaid interest, if any.

In certain circumstances involving a change of control triggering event (as defined in the Indenture), the Company will be required to make an offer to repurchase all, or at the holder's option, any part, of each holder's 2030 Notes at a repurchase price equal to 101 % of the principal amount, plus accrued and unpaid interest, if any, to the applicable repurchase date.

The 2030 Notes are unsecured obligations and the Indenture contains covenants limiting the Company and its subsidiaries' ability to: (i) create certain liens and enter into sale and lease-back transactions; (ii) create, assume, incur or guarantee certain indebtedness; or (iii) consolidate or merge with or into, or sell or otherwise dispose of all of substantially all of the Company and its subsidiaries' assets to another person. These covenants are subject to a number of limitations and exceptions set forth in the Indenture and non-compliance with these covenants may result in the accelerated repayment of the 2030 Notes and any accrued and unpaid interest.

As of December 31, 2024, the Company was in compliance with all of its covenants under the Indenture.

The net carrying amount of the 2030 Notes, which is presented as a component of long-term debt in the Company's consolidated financial statements, was as follows (in thousands):

	As of December 31,	
	2024	2023
2030 Notes		
Principal	\$ 1,000,000	\$ 1,000,000
Unamortized issuance costs	(8,329)	(9,700)
Net carrying amount	\$ 991,671	\$ 990,300

Interest expense related to the 2030 Notes was as follows (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Contractual interest expense	\$ 38,750	\$ 38,750	\$ 38,642
Amortization of debt issuance costs	1,371	1,316	1,261
Total interest expense	<u>\$ 40,121</u>	<u>\$ 40,066</u>	<u>\$ 39,903</u>

The debt issuance costs for the 2030 Notes are amortized to interest expense over the term of the 2030 Notes using an annual effective interest rate of 4.05 %.

As of December 31, 2024, and 2023, the estimated fair value of the 2030 Notes was approximately \$ 901.5 million and \$ 891.8 million, respectively, determined based on the last trading price of the 2030 Notes during the reporting period (a Level 2 input).

Future interest and principal payments related to the 2030 Notes, as of December 31, 2024, were as follows (in thousands):

Year ending December 31,	
2025	\$ 38,750
2026	38,750
2027	38,750
2028	38,750
2029	38,750
Thereafter	1,019,370
Total future interest and principal payments related to the 2030 Notes	<u>\$ 1,213,120</u>

Joint Venture Financing

Refer to Note 14, "Joint Venture", in the notes to the consolidated financial statements for additional information on debt issued by the Company's consolidated subsidiary, Roblox China Holding Corp.

9. Commitments and Contingencies

Purchase Obligations— Non-cancellable contractual purchase obligations, primarily consisting of contracts associated with data center and software vendors, were as follows as of December 31, 2024 (in thousands):

Year ending December 31,	
2025	\$ 233,121
2026	89,981
2027	2,458
2028	312
2029	77
Thereafter	—
Total non-cancellable contractual purchase obligations	<u>\$ 325,949</u>

Letters of Credit—The Company has letters of credit in connection with its operating leases which are not reflected in the Company's consolidated balance sheets as of December 31, 2024 and 2023. The Company has not drawn down from the letters of credit and had \$ 8.3 million and \$ 11.6 million available in aggregate as of December 31, 2024 and 2023, respectively.

Legal Proceedings—The Company is and, from time to time may in the future become, involved in legal proceedings, claims and litigation in the ordinary course of business.

As of December 31, 2024 and 2023, the Company accrued for immaterial losses related to litigation matters that the Company believes to be probable and for which an amount of loss can be reasonably estimated. The Company considered the progress of these cases, the opinions and views of its legal counsel and outside advisors, its experience and settlements in similar cases, and other factors in arriving at the conclusion that a potential loss was probable. The Company cannot determine a reasonable estimate of the maximum possible loss or range of loss for all of these matters given that they are at various stages of the litigation process and each case is subject to the inherent uncertainties of litigation. The Company may incur substantial legal fees, which are expensed as incurred, in defending against these legal proceedings. The maximum amount of liability that may ultimately result from any of these matters cannot be predicted with absolute certainty and the ultimate resolution of one or more of these matters could ultimately have a material adverse effect on our operations.

On August 1, 2023, a putative class action was filed against the Company in the United States District Court for the Northern District of California, captioned *Colvin v. Roblox* (the “Colvin matter”), asserting various claims arising from allegations that minors used third-party virtual casinos to gamble Robux. On December 15, 2023, the Company filed a motion to dismiss and on March 26, 2024, the motion to dismiss was granted in part and denied in part, allowing plaintiffs’ negligence and California Unfair Competition Law claims to proceed. On March 28, 2024, a supplemental order clarified that plaintiffs’ claims for unjust enrichment and equitable relief could proceed as well. On April 9, 2024, plaintiffs filed an amended complaint realleging the California Consumer Legal Remedies Act and New York General Business Law claims that had been dismissed.

Separately, on March 14, 2024, *Gentry v. Roblox* was filed in the United States District Court for the Northern District of California premised on substantially identical allegations as the Colvin matter. On April 18, 2024, the *Gentry v. Roblox* matter was consolidated with the Colvin matter. Plaintiffs filed a consolidated complaint on April 23, 2024. The consolidated complaint seeks monetary damages, including actual, punitive, and statutory damages, restitution, attorneys’ fees and costs, and declaratory and injunctive relief. The Company filed a motion to dismiss the consolidated complaint on May 14, 2024, which the court granted in part and denied in part on September 19, 2024. The Court dismissed with prejudice plaintiffs’ fraud-based claims and claims for injunctive relief, but allowed plaintiffs’ claims under California’s Unfair Competition Law and for negligence and unjust enrichment to proceed. On October 30, 2024, the Company filed an answer denying plaintiffs’ claims. On November 20, 2024, the Company filed an Amended Answer, again denying Plaintiffs’ claims, and adding cross-claims against virtual casino defendants for intellectual property infringement, violation of the Computer Fraud and Abuse Act, breach of contract, tortious interference, and indemnification, among others. Discovery is underway.

The Company intends to defend itself vigorously against all claims asserted. At this time, the Company is unable to reasonably estimate the loss or range of loss, if any, arising from the above-referenced matter.

Indemnification—In the ordinary course of business, the Company enters into agreements that may include indemnification provisions. Pursuant to such agreements, the Company may indemnify, hold harmless and defend an indemnified party for losses suffered or incurred by the indemnified party. Some of the provisions will limit losses to those arising from third-party actions. In some cases, the indemnification will continue after the termination of the agreement. The maximum potential amount of future payments the Company could be required to make under these provisions is not determinable. To date, the Company has not incurred material costs to defend lawsuits or settle claims related to these indemnification provisions.

The Company has also entered into indemnification agreements with its directors and officers that may require the Company to indemnify its directors and officers against liabilities that may arise by reason of their status or service as directors or officers to the fullest extent permitted by Delaware corporate law. To date, the Company has not incurred any material costs and has not accrued any liabilities related to such obligations. The Company also has directors’ and officers’ insurance.

10. Stockholders’ Equity

Preferred Stock —The Company’s amended and restated certificate of incorporation authorizes the issuance of 100.0 million shares of convertible preferred stock with a par value of \$ 0.0001 per share.

Common Stock —The Company's amended and restated certificate of incorporation authorizes the issuance of Class A common stock and Class B common stock. As of December 31, 2024, the Company is authorized to issue 4,935.0 million shares of Class A common stock and 65.0 million shares of Class B common stock. Holders of Class A common stock and Class B common stock are entitled to dividends on a pro rata basis, when, as, and if declared by the Company's Board of Directors, subject to the rights of the holders of the Company's convertible preferred stock. Holders of Class A common stock are entitled to one vote per share, and holders of Class B common stock are entitled to 20 votes per share. Each share of our Class B common stock is convertible into one share of our Class A common stock at any time and will convert automatically upon certain transfers and upon the earliest of (i) the date that is specified by the affirmative vote of the holders of two-thirds of the then-outstanding shares of Class B common stock, (ii) the date on which less than 30 % of the Class B common stock that was outstanding on March 2, 2021 continues to remain outstanding, (iii) March 10, 2036, (iv) nine months after the death or permanent disability of Mr. David Baszucki, and (v) nine months after the date on which Mr. Baszucki no longer serves as our CEO or as a member of our Board of Directors. Class A common stock and Class B common stock are not redeemable at the option of the holder.

During the years ended December 31, 2024 and 2023, respectively, 1.8 million and 1.3 million shares of Class B common stock held by entities affiliated with Mr. Baszucki, Founder, President, CEO and Chair of our Board of Directors (the "CEO") were converted to Class A common stock.

Class A and Class B common stock are referred to as common stock throughout the notes to the consolidated financial statements, unless otherwise noted.

The Company had reserved shares of common stock for future issuance as follows (in thousands):

	As of December 31,		
	2024	2023	2022
Stock options outstanding	27,458	40,159	51,591
RSUs outstanding	35,012	39,846	30,322
PSUs outstanding ⁽¹⁾	2,304	905	415
CEO Long-Term Performance Award ⁽¹⁾⁽²⁾	—	11,500	11,500
2020 Equity Incentive Plan	91,642	66,114	59,945
2020 Employee Stock Purchase Plan	20,855	16,075	11,093
Stock warrants outstanding	264	264	264
RSAs outstanding	32	149	500
Total	177,567	175,012	165,630

(1) Represents the shares of common stock reserved for future issuance at the maximum achievement levels.

(2) On March 1, 2024, the Leadership Development and Compensation Committee (i) approved the cancellation of the CEO Long-Term Performance Award, which was previously granted to the CEO under the 2017 Amended and Restated Equity Incentive Plan and (ii) granted Mr. Baszucki a new PSU award and RSU award. The PSUs and RSUs granted to Mr. Baszucki on March 1, 2024 are included in those respective rows above as of December 31, 2024. Refer to Note 11, "Stock-Based Compensation Expense", to the notes to the consolidated financial statements for further discussion.

11. Stock-Based Compensation Expense

2004 Incentive Stock Plan

In 2004, the Company approved the 2004 Incentive Stock Plan (the "2004 Plan"), under which the Board of Directors may grant incentive stock options to employees and nonstatutory stock options to employees, members of the Board of Directors and consultants of the Company and its subsidiaries.

Under the 2004 Plan, incentive stock options and nonstatutory stock options may be granted at a price not less than fair value and 85 % of the fair value, respectively (110 % of fair value for incentive stock options granted to holders of 10 % or more of voting stock). Fair value is determined by the Board of Directors. Options are exercisable over periods not to exceed 10 years (five years for incentive stock options granted to holders of 10 % or more of the voting stock) from the date of grant.

The 2004 Plan was terminated on the effective date of the 2017 Amended and Restated Equity Incentive Plan, and accordingly, no shares are available for issuance under the 2004 Plan. The 2004 Plan continues to govern outstanding awards granted thereunder.

2017 Amended and Restated Equity Incentive Plan

In 2017, the Company approved the 2017 Amended and Restated Equity Incentive Plan (the “2017 Plan”), under which the Board of Directors may grant incentive stock options to employees and nonstatutory stock options, stock appreciation rights, restricted stock, and RSUs, to employees, members of the Board of Directors and consultants of the Company and its subsidiaries.

Under the 2017 Plan, stock options may be granted at a price not less than fair value (110 % of fair value for incentive stock options issued to holders of 10 % or more of voting stock). Stock appreciation rights may be granted at a price not less than fair value. Fair value is determined by the Board of Directors. Options are exercisable over periods not to exceed 10 years (five years for incentive stock options granted to holders of 10 % or more of the voting stock) from the date of grant.

In connection with the Direct Listing, the 2017 Plan was terminated effective immediately prior to the effectiveness of the 2020 Equity Incentive Plan, and accordingly, no shares are available for issuance under the 2017 Plan. The 2017 Plan continues to govern outstanding awards granted thereunder.

2020 Equity Incentive Plan

In 2020, the Company's Board of Directors adopted, and its stockholders approved, the 2020 Equity Incentive Plan (the “2020 Plan”), which became effective on the business day immediately prior to the effective date of the registration statement for the Company's Direct Listing. Under the 2020 Plan, the Board of Directors may grant incentive stock options to employees and stock appreciation rights, RSAs, and RSUs, performance units and performance shares to employees, members of the Board of Directors and consultants of the Company and its subsidiaries.

Under the 2020 Plan, incentive stock options, nonstatutory stock options, and stock appreciation rights may be granted at a price not less than 100 % of the fair market value of the underlying common stock on the date of grant (110 % of fair value for incentive stock options issued to holders of 10 % or more of voting stock). Options and stock appreciation rights are exercisable over a period not to exceed 10 years (five years for incentive stock options granted to holders of 10 % or more of the voting stock) from the date of grant.

Under the 2020 Plan, 60.0 million shares of Class A common stock were initially reserved for future issuance. The number of shares of our Class A common stock reserved for future issuance under our 2020 Plan automatically increases on January 1 of each year by the least of (i) 75.0 million shares; (ii) five percent (5 %) of the outstanding shares of all classes of the Company's common stock as of December 31 of the preceding fiscal year; or (iii) a number of shares that may be determined by the Company's Board of Directors. Stock-based awards under the 2020 Plan that expire or are forfeited, cancelled, or repurchased generally are returned to the pool of shares of Class A common stock available for issuance under the 2020 Plan. In addition, subject to the adjustment provisions of the 2020 Plan, the shares reserved for issuance under the 2020 Plan also include (i) any shares that, as of the day immediately prior to the effective date of the registration statement, have been reserved but not issued pursuant to any awards granted under the 2017 Plan and are not subject to any awards thereunder and (ii) any shares subject to stock options, RSUs or similar awards granted under our 2017 Plan and 2004 Plan that, after the effective date of the registration statement, expire or otherwise terminate without having been exercised or issued in full, are tendered to or withheld by the Company for payment of an exercise price or for tax withholding obligations, or are forfeited to or repurchased by the Company due to failure to vest.

Employee Stock Purchase Plan

In 2020, the Company's Board of Directors adopted, and its stockholders approved, the 2020 ESPP, which became effective in connection with the Direct Listing. The 2020 ESPP authorizes the issuance of shares of common stock pursuant to purchase rights granted to employees. At inception, 6.0 million shares of the Company's Class A common stock were reserved for future issuance under the 2020 ESPP. The number of shares of our Class A common stock reserved for future issuance under our 2020 ESPP automatically increases on January 1 of each year by the least of (i) 15.0 million shares; (ii) one percent (1 %) of the outstanding shares of all classes of the Company's common stock as of December 31 of the preceding fiscal year; or (iii) a number of shares that may be determined by the Company's Board of Directors

The 2020 ESPP plan is a compensatory plan and includes two components: a component that allows the Company to make offerings intended to qualify under Section 423 of the Internal Revenue Code of 1986 (the "Code") and a component that allows the Company to make offerings not intended to qualify under Section 423 of the Code. Subject to any limitations contained therein, the 2020 ESPP allows eligible employees to contribute (in the form of payroll deductions or otherwise to the extent permitted by the administrator) an amount established by the administrator from time to time in its discretion to purchase Class A common stock at a discounted price per share. The price at which Class A common stock is purchased under the 2020 ESPP is equal to 85 % of the fair market value of a share of the Company's Class A common stock on the enrollment date or exercise date, whichever is lower. Offering periods are generally 24 months long and begin on the first trading day on or after February 25 and August 25 of each year with each offering period having four purchase periods of approximately six months each.

Stock-based compensation expense

Stock-based compensation expense included in the consolidated statements of operations was as follows (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Infrastructure and trust & safety	\$ 113,708	\$ 92,147	\$ 56,197
Research and development	723,326	607,593	398,899
General and administrative	138,444	131,577	109,607
Sales and marketing	40,316	36,650	24,795
Total stock-based compensation expense	<u>\$ 1,015,794</u>	<u>\$ 867,967</u>	<u>\$ 589,498</u>

Stock Options

The following table summarizes the Company's stock option activity (in thousands, except per option data and remaining contractual term):

	Options Outstanding			
	Number of Shares Subject to Options	Weighted- Average Exercise Price (per Option)	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balances as of December 31, 2021	63,267	\$ 2.82	6.97	\$ 6,348,395
Granted	—	—		
Cancelled, forfeited, and expired	(2,061)	\$ 4.06		
Exercised	(9,615)	\$ 2.37		
Balances as of December 31, 2022	51,591	\$ 2.85	6.00	\$ 1,321,183
Granted	—	—		
Cancelled, forfeited, and expired	(762)	\$ 4.60		
Exercised	(10,670)	\$ 2.23		
Balances as of December 31, 2023	40,159	\$ 2.98	5.16	\$ 1,716,171
Granted	—	—		
Cancelled, forfeited, and expired	(203)	\$ 4.80		
Exercised	(12,498)	\$ 2.75		
Balances as of December 31, 2024	<u>27,458</u>	\$ 3.08	4.24	\$ 1,504,261
Exercisable as of December 31, 2024	27,278	\$ 3.06	4.23	\$ 1,494,815
Vested and expected to vest at December 31, 2024	27,458	\$ 3.08	4.24	\$ 1,504,261

The aggregate intrinsic value of options exercised for the years ended December 31, 2024, 2023, and 2022 was \$ 530.0 million, \$ 373.4 million, and \$ 423.3 million, respectively. Aggregate intrinsic value represents the difference between the exercise price of the options and the estimated fair value of the Company's Class A common stock at the time of exercise. The aggregate grant-date fair value of options that vested during the years ended December 31, 2024, 2023, and 2022 was \$ 23.5 million, \$ 51.9 million, and \$ 64.1 million, respectively.

As of December 31, 2024, the Company had \$ 2.6 million of unrecognized stock-based compensation related to unvested options, which is expected to be recognized over a weighted-average remaining requisite service period of less than one year .

RSUs and RSAs

The following table summarizes the Company's RSU and RSA activity (in thousands, except per share data):

	RSUs		RSAs	
	Number of Shares	Weighted- Average Grant Date Value per Share	Number of Shares	Weighted- Average Grant Date Value per Share
Unvested as of December 31, 2021	14,684	\$ 68.03	468	\$ 57.37
Granted	25,540	\$ 41.09	298	\$ 46.00
Vested and released	(8,169)	\$ 57.65	(266)	\$ 53.67
Cancelled	(1,733)	\$ 57.58	—	—
Unvested as of December 31, 2022	30,322	\$ 48.73	500	\$ 52.55
Granted	27,377	\$ 37.59	—	—
Vested and released	(14,812)	\$ 45.97	(351)	\$ 55.31
Cancelled	(3,041)	\$ 46.79	—	—
Unvested as of December 31, 2023	39,846	\$ 42.25	149	\$ 46.00
Granted	22,604	\$ 40.54	—	—
Vested and released	(21,170)	\$ 42.83	(92)	\$ 46.00
Cancelled	(6,268)	\$ 40.68	(25)	\$ 46.00
Unvested as of December 31, 2024	35,012	\$ 41.07	32	\$ 46.00

As of December 31, 2024, the Company had \$ 1,339.2 million of unrecognized stock-based compensation related to RSUs, which is expected to be recognized over the weighted-average remaining requisite service period of 1.9 years.

RSUs granted prior to our Direct Listing vest upon the satisfaction of both the service condition and a liquidity event-related performance vesting condition which was satisfied on the Effective Date. Stock-based compensation related to the remaining service-based period after the liquidity event-related performance vesting condition was satisfied is being recorded over the remaining requisite service period using the accelerated attribution method.

RSUs granted subsequent to our Direct Listing only have service conditions, which historically have been satisfied generally over four years . For grants made during and subsequent to July 2022, the service condition is satisfied generally over three years .

As of December 31, 2024, the amount of unrecognized stock-based compensation related to RSAs was not material.

CEO PSUs and RSUs

CEO Long-Term Performance Award

In February 2021, the Leadership Development and Compensation Committee of the Company's Board of Directors granted the CEO a Long-Term Performance Award under the 2017 Plan, which provided him the opportunity to earn a maximum number of 11,500,000 shares of Class A common stock. On March 1, 2024 (the "Modification Date"), the Leadership Development and Compensation Committee (i) approved the cancellation of the CEO Long-Term Performance Award and (ii) granted the CEO a new PSU award (the "2024 CEO PSU Award") and RSU award (collectively, the "2024 CEO Award") (refer to "2024 CEO PSUs and RSUs" header below for more information on the modified award). As of the Modification Date, \$ 84.4 million of stock-based compensation expense remained unrecognized related to the CEO Long-Term Performance Award.

The CEO Long-Term Performance Award would have been eligible to vest based upon the satisfaction of a service condition and achievement of certain Class A common stock price targets (referred to as a “Company Stock Price Hurdle”) over various performance periods, with the first performance period beginning two years after the Effective Date and ending on the seventh anniversary of the Effective Date. The CEO Long-Term Performance Award was divided into seven performance periods that were eligible to vest based on the achievement of various Company Stock Price Hurdles, measured based on an average of our stock price over a consecutive 90 -day trading period applicable to the performance period. In addition, Mr. Baszucki must have remained employed as our CEO through the date a Company Stock Price Hurdle was achieved in order to earn the RSUs that relate to the applicable Company Stock Price Hurdle. The following table summarizes the various Company Stock Price Hurdles and associated RSUs that would have been eligible to vest over each performance period (in thousands, except Company Stock Price Hurdles):

	Company Stock Price		Number of RSUs Eligible to Vest	Performance Period
	Hurdle			Commencement Dates as Measured from the Effective Date
1	\$ 165.00		750	2 years
2	\$ 200.00		750	3 years
3	\$ 235.00		2,000	4 years
4	\$ 270.00		2,000	5 years
5	\$ 305.00		2,000	5 years
6	\$ 340.00		2,000	5 years
7	\$ 375.00		2,000	5 years

The Company estimated the grant date fair value of the CEO Long-Term Performance Award using a model based on multiple stock price outcomes developed through the use of a Monte Carlo simulation that incorporates into the valuation the possibility that the Company Stock Price Hurdles may not be satisfied. A Monte Carlo simulation model requires use of various assumptions, including the underlying stock price, volatility, and the risk-free interest rate as of the valuation date, corresponding to the length of time remaining in the performance period, and expected dividend yield. The weighted-average grant date fair value of the CEO Long-Term Performance Award was estimated to be \$ 20.19 per share, and the Company estimated that as of the grant date, it would have recognized total stock-based compensation expense of approximately \$ 232.2 million over the derived service period of each of the seven separate tranches which was between 3.45 – 5.38 years, using the accelerated attribution method.

2024 CEO PSUs and RSUs

The Company determined that the concurrent cancellation of the CEO Long-Term Performance Award and granting of the 2024 CEO Award represented a modification of the CEO Long-Term Performance Award. As of the Modification Date, total subsequent stock-based compensation expense to be recognized was measured as (i) the remaining unrecognized stock-based compensation expense related to the grant date fair value of the CEO Long-Term Performance Award and (ii) the incremental fair value resulting from the modification, if any. To estimate the incremental fair value resulting from the modification (if any), the Company first estimated the fair value of the modified CEO Long-Term Performance Award immediately prior to the Modification Date using a model based on multiple stock price outcomes developed through the use of a Monte Carlo simulation that incorporated into the valuation the possibility that the stock price targets may not be satisfied. A Monte Carlo simulation model requires the use of various assumptions, including the underlying stock price, volatility, and the risk-free interest rate as of the valuation date, corresponding to the length of time remaining in the performance period, and expected dividend yield. On the Modification Date, the estimated fair value of the CEO Long-Term Performance Award immediately prior to the modification was greater than the estimated fair value of the 2024 CEO Award (which was generally estimated based on the Modification Date fair value of the Class A common stock underlying the 2024 CEO Award, with consideration of the probability of achievement against the pre-established performance measures). As a result, the modification did not result in any incremental stock-based compensation expense. As of the Modification Date, total subsequent stock-based compensation expense to be recognized totaled \$ 84.4 million. Of the total estimated stock-based compensation expense, 75 % of the value was allocated to the 2024 CEO PSU Award with the remaining 25 % allocated to the RSUs, based on the relative value of the two awards on the Modification Date.

Under the 2024 CEO PSU Award, the number of shares that can be earned will range from 0 % to 200 % of the target number of shares based on the Company's performance against two independent performance measures relative to pre-established thresholds during a two-year performance period ending on December 31, 2025. The two independent performance measures include the Company's cumulative (i) bookings during the performance period, as defined in the grant agreement with the CEO and (ii) Adjusted EBITDA during the performance period, which correlates to the covenant adjusted EBITDA calculation used in certain covenant calculations specified in the indenture governing our 2030 Notes (the "PSU Adjusted EBITDA"). Further, the awards are subject to Mr. Baszucki's continuous service with the Company through each vesting date, with the initial vesting date to occur in the first quarter of 2026 (of which 67 % of the award earned, if any, will vest) and the remaining vesting dates to occur in four equal quarterly installments beginning in the second quarter of 2026. The Company will recognize stock-based compensation expense for the 2024 CEO PSU Award on an accelerated attribution method over the requisite service period of each separately vesting tranche. Actual performance against the pre-established threshold under the 2024 CEO PSU Award will have no impact on the subsequent stock-based compensation expense recognized.

The target number of the 2024 CEO PSU Award was 446,534 in aggregate, with 80 % of the target number of shares allocated to the cumulative bookings performance measure and 20 % of the target number of shares allocated to the cumulative PSU Adjusted EBITDA performance measure.

The Company recorded \$ 32.6 million of stock-based compensation expense related to the 2024 CEO PSU Award and CEO Long-Term Performance Award, in total, during the year ended December 31, 2024 within general and administrative expenses. The Company recorded \$ 48.9 million of stock-based compensation expense related to the CEO Long-Term Performance Award during each of the years ended December 31, 2023 and 2022 within general and administrative expenses. Unrecognized stock-based compensation expense related to the 2024 CEO PSU Award was \$ 38.7 million as of December 31, 2024, which is expected to be recognized over the remaining derived service period of each respective tranche.

The number of RSUs granted under the 2024 CEO Award totaled 148,844 and the RSUs will vest quarterly over a three-year service period beginning March 1, 2024, subject to Mr. Baszucki's continued service with the Company on each vesting date.

Other PSUs

2024 Executive PSU Awards

During the first quarter of 2024, the Leadership Development and Compensation Committee granted PSU awards to certain members of management (the "2024 Executive PSU Awards"). The vesting requirements, performance metrics, and performance period of the 2024 Executive PSU Awards are consistent with those of the 2024 CEO PSU Award.

The target number of 2024 Executive PSU Awards was 353,241 in total, with 80 % of the target number of shares allocated to the cumulative bookings performance measure and 20 % of the target number of shares allocated to the cumulative PSU Adjusted EBITDA performance measure.

The Company recognizes stock-based compensation expense for the 2024 Executive PSU Awards based upon the per-share grant date fair value of \$ 41.32 on an accelerated attribution method over the requisite service period of each separately vesting tranche. At each reporting period, the amount of stock-based compensation is determined based on the probability of achievement against the pre-established performance measures and if necessary, a cumulative catch-up adjustment is recorded to reflect any revised estimates regarding the probability of achievement.

During the year ended December 31, 2024, \$ 11.3 million of stock-based compensation expense was recorded related to the 2024 Executive PSU Awards. Based on the expected probability of achievement against the pre-established performance measures as of December 31, 2024, unrecognized stock-based compensation expense related to the 2024 Executive PSU Awards was \$ 17.8 million, which is expected to be recognized over the remaining derived service period of each respective tranche.

2023 PSU Awards

During the second quarter of 2023, the Leadership Development and Compensation Committee granted PSU awards to certain members of management (the "2023 PSU Awards"). The number of shares that can be earned will range from 0 % to 200 % of the target number of shares, based on the Company's performance against two independent performance measures relative to pre-established thresholds during a two-year performance period ending on December 31, 2024. The two independent performance measures include the Company's cumulative (i) bookings during the performance period, as defined in the respective grant agreements with each employee and (ii) PSU Adjusted EBITDA during the performance period. Further, the awards are subject to continuous employment, with the first vesting to occur in the first quarter of 2025 (in which 50 % of any awards earned will vest) and the second vesting to occur in the second quarter of 2026 (in which the remaining 50 % of any awards earned will vest).

As of December 31, 2024, the target number of shares under the 2023 PSU Awards totaled 213,502 , with 80 % of the target number of shares allocated to the cumulative bookings performance measure and 20 % of the target number of shares allocated to the cumulative PSU Adjusted EBITDA performance measure. Based on actual performance through the end of the performance period ending on December 31, 2024, a total of 373,029 shares were earned under the 2023 PSU Awards, subject to each employees continuous employment through the required vesting dates.

The Company recognizes stock-based compensation expense for the 2023 PSU Awards based upon the per-share grant date fair value of \$ 45.70 on an accelerated attribution method over the requisite service period of each separately vesting tranche. At each reporting period, the amount of stock-based compensation is determined based on the probability of achievement against the pre-established performance measures and if necessary, a cumulative catch-up adjustment is recorded to reflect any revised estimates regarding the probability of achievement.

On August 1, 2024, Michael Guthrie, the Company's Chief Financial Officer, notified Roblox of his intent to resign as Chief Financial Officer. The Company entered into a Separation and Transition Agreement with Mr. Guthrie on September 30, 2024 (the "Transition Agreement"), pursuant to which Mr. Guthrie's employment with the Company will terminate upon the commencement of employment of the Company's next Chief Financial Officer. Following his termination of employment, Mr. Guthrie will continue to serve the Company as an advisor until March 1, 2025, or, if later, the one-month anniversary of his termination date. Pursuant to his agreement, on the determination date (as defined in his applicable PSU agreement and which is expected to occur in the first quarter of 2025), Mr. Guthrie will vest into the first 50 % of his 2023 PSUs, contingent upon the Company achievement of performance measures. The Company concluded that the Transition Agreement constitutes a modification of the remaining requisite service period for the modified portion of Mr. Guthrie's 2023 PSU Award and the remaining expense related to the modified tranche was recognized in the fourth quarter of 2024.

The Company recorded \$ 6.7 million and \$ 6.4 million of stock-based compensation expense related to the 2023 PSU Awards during the years ended December 31, 2024 and 2023, respectively. Unrecognized stock-based compensation expense related to the 2023 PSU Awards was \$ 4.0 million as of December 31, 2024, which is expected to be recognized over the remaining derived service period of each respective tranche.

2022 PSU Awards

During the second quarter of 2022, the Leadership Development and Compensation Committee granted PSU awards to certain members of management (the "2022 PSU Awards"). On the grant date, the target number of 2022 PSU Awards was 207,284 . The number of shares that can be earned will range from 0 % to 200 % of the target number of shares, based on the Company's stock price performance and achievement of certain stock price hurdles during the last quarter of the second year through the end of the third year of a three-year performance period (the "2022 PSU Awards Stock Price Hurdles") and subject to continuous employment through such date.

The Company estimated the grant date fair value of the 2022 PSU Awards using a model based on multiple stock price outcomes developed through the use of a Monte Carlo simulation which incorporates into the valuation the possibility that the 2022 PSU Awards Stock Price Hurdles may not be satisfied. The grant date fair value of the 2022 PSU Awards was estimated to be \$ 43.13 per share, and the Company estimates that it will recognize total stock-based compensation expense of approximately \$ 6.0 million using the accelerated attribution method over the derived service period of each tranche which is equal to five measurement periods commencing with the last quarter of the second year and ending with the last quarter of the third year. If the 2022 PSU Awards Stock Price Hurdles are met sooner than the derived service period, the stock-based compensation expense will be adjusted to reflect the cumulative expense associated with the vested award. Stock-based compensation expense will be recognized over the requisite service period if the members of management continue to provide service to the Company, regardless of whether the 2022 PSU Awards Stock Price Hurdles are achieved.

The Company recorded a stock-based compensation benefit of \$ 0.3 million during the year ended December 31, 2024, primarily driven by the departure of an executive in the second quarter of 2024, and stock-based compensation expense of \$ 3.2 million and \$ 3.0 million during the years ended December 31, 2023 and 2022, respectively, related to the 2022 PSU Awards. As of December 31, 2024, unrecognized stock-based compensation expense related to the 2022 PSU awards was not material.

Employee Stock Purchase Plan

The following table presents the assumptions used in estimating the grant date fair value of purchase rights granted under the 2020 ESPP for the offerings made in the respective years including reset and rollover:

	Year Ended December 31,								
	2024			2023			2022		
Risk-free interest rate	3.91 %	-	5.34 %	4.78 %	-	5.61 %	0.71 %	-	3.35 %
Expected volatility	44.43 %	-	76.08 %	47.92 %	-	75.99 %	54.16 %	-	81.51 %
Dividend yield	— %			— %			— %		
Expected terms (in years)	0.50	-	2.00	0.49	-	2.00	0.50	-	2.01

The Company recorded \$ 18.5 million, \$ 32.0 million, and \$ 25.7 million of stock-based compensation expense related to the 2020 ESPP during the years ended December 31, 2024, 2023, and 2022, respectively.

12. Accumulated Other Comprehensive Income (Loss)

The following table shows a summary of changes in accumulated other comprehensive income/(loss) by component for the periods presented (in thousands):

	Foreign Currency Translation	Unrealized Gains/(Losses) on Available-For-Sale Debt	
		Securities	Total
Balance as of December 31, 2022	\$ 671	\$ —	\$ 671
Other comprehensive income/(loss), net of tax, before reclassifications	771	(1,845)	(1,074)
Amounts reclassified from accumulated other comprehensive income/(loss), net of tax	—	1,939	1,939
Change in accumulated other comprehensive income/(loss), net of tax	771	94	865
Balance as of December 31, 2023	\$ 1,442	\$ 94	\$ 1,536
Other comprehensive income/(loss), net of tax, before reclassifications	(3,609)	(3,130)	(6,739)
Amounts reclassified from accumulated other comprehensive income/(loss), net of tax	—	1,308	1,308
Change in accumulated other comprehensive income/(loss), net of tax	(3,609)	(1,822)	(5,431)
Balance as of December 31, 2024	\$ (2,167)	\$ (1,728)	\$ (3,895)

13. Employee Benefits

Defined Contribution Plan

The Company sponsors a 401(k) defined contribution retirement plan for eligible employees. For the years ended December 31, 2024 and 2023, the Company matched 100 % of all employee contributions, up to 50 % of the Internal Revenue Service ("IRS") deferral limit. For the year ended December 31, 2022, the Company matched 100 % of the first 3 % of employee contributions and 50 % of the next 2 % for each employee, subject to the maximum total contribution mandated by the IRS.

The Company made matching contributions in the amounts of \$ 28.0 million, \$ 24.9 million, and \$ 14.6 million for the years ended December 31, 2024, 2023, and 2022, respectively.

14. Joint Venture

Background

In February 2019, the Company entered into a joint venture agreement with Songhua River Investment Limited (“Songhua”), an affiliate of Tencent Holdings Ltd. (“Tencent Holdings”), to create Roblox China Holding Corp. (in which Roblox holds a 51 % ownership interest as it relates to the voting shares). Songhua contributed \$ 50.0 million in capital in exchange for a 49 % ownership interest in Roblox China Holding Corp. The business of the joint venture (either directly or indirectly through the joint venture’s wholly owned subsidiaries) is to engage in the (i) development, localization, and licensing of the Roblox application to Shenzhen Tencent Computer Systems Co., Ltd. for operation and publication as a game in China, and (ii) development, localization, and licensing to creators of a Chinese version of the Roblox Studio and to oversee relations with local Chinese developers.

The joint venture is consolidated into the Company’s consolidated financial statements as the Company maintains a controlling financial interest through voting rights, while the minority member of the joint venture does not have substantive participating rights or veto rights. The Company classifies the 49 % ownership interest held by Songhua as a noncontrolling interest on its consolidated balance sheet.

Joint Venture Financing

On May 10, 2023, Roblox China Holding Corp. (the “Borrower”) issued \$ 30.0 million aggregate principal debt which matures on May 10, 2026 (the “2026 Notes”), unless earlier prepaid by the Borrower or converted by the holders into the Borrower’s voting shares. Further, the Borrower, at its sole election, may extend the maturity date by two years .

The 2026 Notes were funded by the Company and Songhua (the “Lenders”) in the amounts of \$ 15.3 million and \$ 14.7 million, respectively. The 2026 Notes bear interest at a rate of 6.0 % per annum, with accrued interest payable on the final maturity date.

At any point, the Lenders may voluntarily convert the 2026 Notes into voting shares of the Borrower, provided that immediately after such conversion, the Lenders continue to own the same percentage of voting shares in the Borrower as they did immediately prior to the conversion. The conversion ratio will be determined at the time of such conversion (if any), and will be determined by dividing the then fair value of the Borrower’s voting shares (as mutually agreed to by the Lenders and Borrower) into the sum of the unpaid principal and accrued interest.

The portion of the 2026 Notes outstanding to Songhua is reflected in the Company’s consolidated financial statements as long-term debt, net, at its principal amount, while the portion outstanding to the Company – including any related interest expense – is eliminated upon consolidation. Interest expense related to the 2026 Notes was \$ 0.9 million and \$ 0.5 million for the years ended December 31, 2024 and 2023, respectively.

15. Income Taxes

The components of loss before income taxes were as follows (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Domestic	\$ (935,487)	\$ (1,151,493)	\$ (916,592)
Foreign	(1,013)	(6,990)	(13,997)
Loss before income taxes	\$ (936,500)	\$ (1,158,483)	\$ (930,589)

The components of the provision for/(benefit from) income taxes were as follows (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Current provision:			
Federal	\$ —	\$ (144)	\$ 144
State	2,007	(561)	2,405
Foreign	2,691	1,255	1,582
Total current provision	4,698	550	4,131
Deferred provision:			
Federal	—	—	(474)
State	—	—	(105)
Foreign	(584)	(96)	—
Total deferred provision	(584)	(96)	(579)
Provision for/(benefit from) income taxes	\$ 4,114	\$ 454	\$ 3,552

The provision for/(benefit from) income taxes differs from the amount estimated by applying the statutory income/(loss) before taxes as follows:

	Year Ended December 31,		
	2024	2023	2022
Federal tax at statutory rate	21 %	21 %	21 %
State tax at statutory rate, net of federal benefit	2	2	2
Research and development credits	9	6	2
Change in valuation allowance	(35)	(27)	(21)
Stock-based compensation	3	(3)	(4)
Other	0	1	0
Provision for/(benefit from) income taxes	0 %	0 %	0 %

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The following table presents the components of the Company's deferred tax assets/(liabilities) for the periods presented (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Deferred tax assets:			
Accrued expenses	\$ 17,730	\$ 14,231	\$ 13,593
Intangible assets	2,050	—	—
Deferred revenue	285,033	246,144	198,130
Net operating loss carryforwards	599,380	599,804	490,309
Tax credit carryforwards	234,868	155,246	85,527
Stock-based compensation	31,089	29,083	28,238
Operating lease liabilities	186,229	176,007	130,688
Capitalized research and development	605,278	366,898	178,488
Other	5,650	2,914	1,988
Total gross deferred tax asset	1,967,307	1,590,327	1,126,961
Less: valuation allowance	(1,551,700)	(1,222,211)	(907,226)
Net deferred tax assets	415,607	368,116	219,735
Deferred tax liabilities:			
Fixed assets	(40,178)	(28,645)	(92,009)
Intangible assets	—	(2,735)	(6,694)
Operating lease right-of-use assets	(155,121)	(154,334)	(121,032)
Deferred cost of revenue	(219,859)	(182,495)	—
Total deferred tax liabilities	(415,158)	(368,209)	(219,735)
Net deferred tax assets/(liabilities)	\$ 449	\$ (93)	\$ —

We have not provided U.S. income taxes or foreign withholding taxes on the undistributed earnings of our profitable foreign subsidiaries because we intend to permanently reinvest such earnings in foreign operations. As of December 31, 2024 and 2023, the cumulative amount of earnings upon which income taxes have not been provided is not material.

The Company accounts for deferred taxes under ASC 740, Income Taxes, which requires a reduction of the carrying amounts of deferred tax assets by a valuation allowance if, based on available evidence, it is more likely than not that such assets will not be realized. Accordingly, the need to establish valuation allowances for deferred tax assets is assessed periodically based on the ASC 740 more-likely-than-not realization threshold criterion. This assessment considers matters such as future reversals of existing taxable temporary differences, projected future taxable income, tax-planning strategies and results of recent operations. The evaluation of the recoverability of the deferred tax assets requires that we weigh all positive and negative evidence to reach a conclusion that it is more likely than not that all or some portion of the deferred tax assets will not be realized. The weight given to the evidence is commensurate with the extent to which it can be objectively verified. Due to our lack of U.S. earnings history, the net U.S. deferred tax assets have been fully offset by a valuation allowance. There are valuation allowances on net deferred tax assets in certain foreign jurisdictions. The deferred tax assets and deferred tax liabilities in other foreign jurisdictions without valuation allowances are immaterial.

The Company's valuation allowance increased by \$ 329.5 million, \$ 315.0 million, and \$ 195.9 million, in the years ended December 31, 2024, 2023, and 2022, respectively.

As of December 31, 2024, we had federal net operating loss carryforwards of \$ 2,382.3 million, which do not expire, federal net operating loss carryforwards of \$ 10.7 million, which begin to expire in 2037, state net operating loss carryforwards of \$ 1,433.7 million, which begin to expire in 2025, and foreign net operating loss carryforwards of \$ 64.8 million, which begin to expire in 2025.

As of December 31, 2024, we had U.S. federal and California research and development tax credits of approximately \$ 304.7 million and \$ 210.0 million, respectively. The federal research and development credits begin to expire in 2030, while California credits do not expire.

Under Internal Revenue Code Section 382 ("Section 382"), an ownership change generally occurs if one or more stockholders or groups of stockholders who own at least 5% of our stock increase their ownership by more than 50 percentage points over their lowest ownership percentage within a rolling three-year period. Similar rules may apply under state tax laws. The Company did experience one or more ownership changes in financial periods ending on or before December 31, 2024. In this regard, the Company has determined that based on the timing of the ownership change and the corresponding Section 382 limitations, none of its net operating losses or other tax attributes appear to expire subject to such limitation.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows (in thousands):

	As of December 31,		
	2024	2023	2022
Unrecognized tax benefits at beginning of year	\$ 172,389	\$ 96,372	\$ 72,919
Increases related to current year tax positions	89,881	59,917	25,458
Increases related to prior year tax positions	61	16,100	865
Decreases related to prior year tax positions	(1,176)	—	(2,870)
Unrecognized tax benefits at end of year	<u>\$ 261,155</u>	<u>\$ 172,389</u>	<u>\$ 96,372</u>

We classify uncertain tax positions as non-current liabilities unless expected to be paid within one year or otherwise directly related to an existing deferred tax asset, in which case the uncertain tax position is recorded as an offset to the deferred tax asset on the consolidated balance sheet. As of December 31, 2024, we had gross unrecognized tax benefits of approximately \$ 261.2 million, of which \$ 3.1 million would impact income tax expense if recognized. As of December 31, 2023, we had gross unrecognized tax benefits of approximately \$ 172.4 million. The Company does not anticipate any significant change within twelve months of this reporting date.

The Company accrued interest and penalties of \$ 0.7 million, \$ 0.4 million, and \$ 0.2 million in the years ended December 31, 2024, 2023 and 2022, respectively.

The Company is subject to taxation in the United States, various states, and foreign jurisdictions. All tax years for U.S. federal and California tax returns currently remain open for examination by the tax authorities. As of December 31, 2024, we are no longer subject to foreign examinations by tax authorities for years before 2019. As of December 31, 2024, the Company is under examination in a foreign jurisdiction and is not under examination by the Internal Revenue Service or any state tax jurisdictions.

16. Basic and Diluted Net Loss Per Common Share

The following table presents the calculation of basic and diluted net loss per share (in thousands, except per share data):

	Year ended December 31,		
	2024	2023	2022
Basic and diluted net loss per share			
<i>Numerator</i>			
Consolidated net loss	\$ (940,614)	\$ (1,158,937)	\$ (934,141)
Less: net loss attributable to noncontrolling interest	(5,230)	(6,991)	(9,775)
Net loss attributable to common stockholders	<u>\$ (935,384)</u>	<u>\$ (1,151,946)</u>	<u>\$ (924,366)</u>
<i>Denominator</i>			
Weighted-average common shares used in computing net loss per share attributable to common stockholders, based and diluted	<u>647,482</u>	<u>616,445</u>	<u>595,559</u>
Net loss per share attributable to common stockholders, basic and diluted	<u>\$ (1.44)</u>	<u>\$ (1.87)</u>	<u>\$ (1.55)</u>

The potential shares of common stock that were excluded from the computation of diluted net loss per share because including them would have been anti-dilutive are as follows (in thousands):

	As of December 31,		
	2024	2023	2022
Stock options outstanding	27,458	40,159	51,591
RSUs outstanding	35,012	39,846	30,322
2020 ESPP	1,634	3,347	2,311
2023 PSUs Awards based on performance target achievement at period-end ⁽¹⁾	373	9	—
Stock warrants outstanding	264	264	264
RSAs outstanding	32	149	500
Total	64,773	83,774	84,988

(1) Represents the actual or hypothetical number of shares earned under the Company's 2023 PSU Awards, based on actual performance as of the respective balance sheet date.

Except for the 2023 PSU Awards, all other PSUs were excluded from the above table because the respective stock price or performance targets had not been met as of the periods presented.

17. Reportable Segments

The following represents segment information for the Company's single operating segment, for the periods presented (in thousands):

	Year ended December 31,		
	2024	2023	2022
Revenue	\$ 3,601,979	\$ 2,799,274	\$ 2,225,052
Add (deduct):			
Cost of revenue ⁽¹⁾	\$ (801,162)	\$ (649,115)	\$ (547,658)
Developer exchange fees	(922,821)	(740,752)	(623,855)
Adjusted infrastructure expenses ⁽²⁾	(465,782)	(458,753)	(423,654)
Adjusted trust & safety expenses ⁽²⁾	(254,300)	(239,711)	(157,412)
Personnel costs, excluding stock-based compensation expense and excluding infrastructure and trust & safety personnel costs	(729,424)	(691,899)	(526,491)
Stock-based compensation expense, excluding infrastructure and trust & safety stock-based compensation expense	(902,086)	(775,820)	(533,301)
Depreciation and amortization expense	(226,437)	(208,142)	(130,083)
Other segment items ⁽³⁾	(374,814)	(294,676)	(212,126)
Interest income	179,531	141,818	38,842
Interest expense	(41,184)	(40,707)	(39,903)
(Provision for)/benefit from income taxes	(4,114)	(454)	(3,552)
Consolidated net loss	\$ (940,614)	\$ (1,158,937)	\$ (934,141)

(1) Depreciation of servers and infrastructure equipment included in infrastructure and trust & safety expenses in the Company's consolidated statement of operations.

(2) Adjusted infrastructure and adjusted trust & safety expenses exclude depreciation and amortization expense.

(3) Other segment items primarily include expenses for facilities, professional services, advertising and promotions, non-capitalized software and equipment, and other income/(expense), net.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognizes that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable assurance that the objectives of the disclosure controls and procedures are met. Based on the evaluation of our disclosure controls and procedures as of December 31, 2024, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) of the Exchange Act. Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer and oversight of our Audit & Compliance Committee, our management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework). Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2024. Deloitte & Touche LLP, an independent registered public accounting firm, has issued an audit report with respect to the effectiveness of our internal control over financial reporting as of December 31, 2024, which is included in Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the three months ended December 31, 2024, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures and internal control over financial reporting, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures and internal control over financial reporting must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Item 9B. Other Information

During our most recent fiscal quarter, the below directors and officers, as defined in Rule 16a-1(f), adopted a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement" as defined in Regulation S-K Item 408. Each of these trading arrangements begins trading after the termination of any outstanding prior trading arrangements for the relevant director or officer, as applicable.

On November 4, 2024, David Baszucki, our Chief Executive Officer and member of our Board of Directors, adopted a Rule 10b5-1 trading arrangement as an individual, as trustee of The Baszucki Family Foundation, and as a representative of the Bessemer Trust Company of Delaware who serves as trustee for the 2020 Jan Baszucki Gift Trust, dated April 3, 2020 and the 2020 David Baszucki Gift Trust, dated April 3, 2020. The trading arrangement provides for the sale from time to time of an aggregate of up to 8,781,047 shares of Class A Common Stock at or above specified market prices and the gift of an aggregate of up to 1,914,015 shares of Class A Common Stock to charitable organizations. The trading arrangement expires on February 24, 2026, or earlier if all transactions under the trading arrangement are completed. The trading arrangement was entered into during an open insider trading window and is intended to satisfy the affirmative defense in Rule 10b5-1(c) and the Company's policies regarding insider transactions.

On November 15, 2024, Anthony Lee, a member of our Board of Directors, adopted a Rule 10b5-1 trading arrangement, as a trustee of the Fallen Leaf Revocable Trust. The trading arrangement provides for the sale from time to time of an aggregate of up to 660,000 shares of Class A Common Stock at or above specified market prices. The trading arrangement expires on March 31, 2026, or earlier if all transactions under the trading arrangement are completed. The trading arrangement was entered into during an open insider trading window and is intended to satisfy the affirmative defense in Rule 10b5-1(c) and the Company's policies regarding insider transactions.

On November 14, 2024, Greg Baszucki, a member of our Board of Directors, adopted a Rule 10b5-1 trading arrangement as trustee of the Greg & Christina Baszucki Living Trust, dated August 18, 2016. The trading arrangement provides for the sale from time to time of an aggregate of up to 1,168,650 shares of Class A Common Stock at or above specified market prices and the gift of an aggregate of up to 350,595 shares of Class A Common Stock to a charitable organization. The trading arrangement expires on March 6, 2026, or earlier if all transactions under the trading arrangement are completed. The trading arrangement was entered into during an open insider trading window and is intended to satisfy the affirmative defense in Rule 10b5-1(c) and the Company's policies regarding insider transactions.

On November 12, 2024, Michael Guthrie, our Chief Financial Officer, adopted a Rule 10b5-1 trading arrangement providing for the sale from time to time of an aggregate of up to 500,000 shares of Class A Common Stock at or above specified market prices. The trading arrangement expires on November 21, 2025, or earlier if all transactions under the trading arrangement are completed. The trading arrangement was entered into during an open insider trading window and is intended to satisfy the affirmative defense in Rule 10b5-1(c) and the Company's policies regarding insider transactions.

On November 5, 2024, Arvind Chakravarthy, our Chief People and Systems Officer, adopted a Rule 10b5-1 trading arrangement providing for the sale from time to time of an aggregate of up to 143,194 shares of Class A Common Stock plus an additional number of shares determined based on a written formula that is calculated based on a specified net number of shares of Class A Common Stock resulting from the vesting of RSU granted and ESPP shares purchased after the adoption date of the Rule 10b5-1 trading arrangement at or above specified market prices. The trading arrangement expires on December 31, 2025, or earlier if all transactions under the trading arrangement are completed. The trading arrangement was entered into during an open insider trading window and is intended to satisfy the affirmative defense in Rule 10b5-1(c) and the Company's policies regarding insider transactions.

On November 1, 2024, Mark Reinstra, our Chief Legal Officer and Corporate Secretary, adopted a Rule 10b5-1 trading arrangement providing for the sale from time to time of an aggregate of up to 310,000 shares of Class A Common Stock, with the actual number of shares sold determined based on a written formula at specified market prices. The trading arrangement expires on May 19, 2026, or earlier if all transactions under the trading arrangement are completed. The trading arrangement was entered into during an open insider trading window and is intended to satisfy the affirmative defense in Rule 10b5-1(c) and the Company's policies regarding insider transactions.

Other than as disclosed above, no other officers or directors, as defined in Rule 16a-1(f), adopted or terminated a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement" as defined in Regulation S-K Item 408, during the last fiscal quarter.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspection

Not applicable.

Part III

Item 10. Directors, Executive Officers and Corporate Governance

Information responsive to this item is incorporated herein by reference to our definitive proxy statement with respect to our 2025 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

Item 11. Executive Compensation

Information responsive to this item is incorporated herein by reference to our definitive proxy statement with respect to our 2025 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

Item 12. Security Ownership of Certain Beneficial Owner and Management and Related Stockholder Matters

Information responsive to this item is incorporated herein by reference to our definitive proxy statement with respect to our 2025 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information responsive to this item is incorporated herein by reference to our definitive proxy statement with respect to our 2025 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

Item 14. Principal Accounting Fees and Services

Information responsive to this item is incorporated herein by reference to our definitive proxy statement with respect to our 2025 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

Part IV

Item 15. Exhibits and Financial Statement Schedules

Exhibits

The exhibits listed below are filed as part of this Annual Report on Form 10-K or are incorporated herein by reference, in each case as indicated below.

Financial Statement Schedules

All financial statement schedules are omitted because the information called for is not required or is shown either in the consolidated financial statements or in the notes thereto.

EXHIBIT INDEX

Re: Offer of Employment

Dear KC,

I am pleased to offer you a position with Roblox Corporation, a Delaware corporation (the "Company"), as Chief People and Systems Officer. If you decide to join us, you will receive an annual wage of \$715,000, which will be paid semi-monthly in accordance with the Company's normal payroll procedures. All forms of compensation referred to in this offer letter are subject to reduction to reflect applicable withholding and payroll taxes and other deductions required by law. This is a full-time position. While you render services to the Company, you agree that you will not engage in any other employment, consulting, or other business activity (whether full-time or part-time) that would create a conflict of interest with the Company. By signing this offer letter, you confirm to the Company that you have no contractual commitments or other legal obligations that would prohibit you from performing your duties for the Company. As an employee, you will also be eligible to receive certain employee benefits including those explained in Exhibit A. You should note that the Company may modify job titles, salaries and benefits from time to time as it deems necessary.

In addition, if you decide to join the Company, it will be recommended at the first meeting of the Company's Board of Directors (or its designated committee) following your start date, that the Company grant you restricted stock units ("RSUs") with a value of \$14,250,000. The number of shares of the Company's Class A Common Stock covered by the RSU grant will be determined by dividing \$14,250,000, as applicable, by the 20 trading day average closing price of the Company's Class A Common Stock on the NYSE, as of the last trading day of the calendar month immediately prior to the calendar month that includes your start date. When determining the number of RSUs subject to your grant(s), any partial RSUs will be rounded down to the nearest whole RSU. The shares subject to such RSU grant(s) shall vest according to the vesting schedule approved by the Board of Directors (or its designated committee) and subject to your continuing employment with the Company. The RSU grant(s) shall be subject to the terms and conditions of the Company's Equity Incentive Plan and RSU Agreement(s), including vesting requirements. No right to any stock is earned or accrued until such time that vesting occurs, nor does the grant confer any right to continue vesting or employment.

You will be eligible to receive awards of stock options, restricted stock units, or other equity awards pursuant to any plans or arrangements the Company may have in effect from time to time. The Company's Board of Directors or its Compensation Committee will determine in its discretion whether you will be granted any such equity awards and the terms of any such award in accordance with the terms of any applicable plan or arrangement that may be in effect from time to time.

In connection with your employment, you will be eligible to enter into the Change in Control Severance Agreement attached hereto as Exhibit B (the "Severance Agreement"). The Severance Agreement specifies the severance payments and benefits you may become entitled to receive in connection with certain qualifying terminations of your employment with the Company. In order to be eligible to receive any benefits under the Severance Agreement, you must sign and deliver the Severance Agreement to the Company.

The Company is excited about your joining and looks forward to a beneficial and productive relationship. Nevertheless, you should be aware that your employment with the Company is for no specified period and constitutes at-will employment. As a result, you are free to resign at any time, for any reason or for no reason. Similarly, the Company is free to conclude its employment relationship with you at any time, with or without cause, and with or without notice. We request that, in the event of resignation, you give the Company at least two-week notice.

The Company reserves the right to conduct background investigations and/or reference checks on all of its potential employees. Your job offer, therefore, is contingent upon a clearance of such a background investigation and/or reference check, if any.

For purposes of federal immigration law, you will be required to provide to the Company documentary evidence of your identity and eligibility for employment in the United States. Such documentation must be provided to us within three (3) business days of your date of hire, or our employment relationship with you may be terminated.

We also ask that, if you have not already done so, you disclose to the Company any and all agreements relating to your prior employment that may affect your eligibility to be employed by the Company or limit the manner in which you may be employed. It is the Company's understanding that any such agreements will not prevent you from performing the duties of your position and you represent that such is the case. Moreover, you agree that, during the term of your employment with the Company, you will not engage in any other employment, occupation, consulting or other business activity directly related to the business in which the Company is now involved or becomes involved during the term of your employment, nor will you engage in any other activities that conflict with your obligations to the Company. Similarly, you agree not to bring any third party confidential information to the Company, including that of your former employer, and that in performing your duties for the Company you will not in any way utilize any such information.

As a Company employee, you will be expected to abide by the Company's rules and standards. Specifically, you will be required to sign an acknowledgment that you have read and that you understand the Company's Code of Ethics and Business Conduct.

As a condition of your employment, you are also required to sign and comply with an At-Will Employment, Confidential Information, Invention Assignment and Arbitration Agreement ("Employment Agreement") which requires, among other provisions, the assignment of patent rights to any invention made during your employment at the Company, and non-disclosure of Company proprietary information. In the event of any dispute or claim relating to or arising out of our employment relationship, you and the Company agree that (i) any and all disputes between you and the Company shall be fully and finally resolved by binding arbitration, (ii) you are waiving any and all rights to a jury trial but all court remedies will be available in arbitration, (iii) all disputes shall be resolved by a neutral arbitrator who shall issue a written opinion, (iv) the arbitration shall provide for adequate discovery, and (v) the Company shall pay all but the first \$125 of the arbitration fees. Please note that we must receive your signed Employment Agreement before your first day of employment.

To accept the Company's offer, please sign and date this letter in the space provided below. If you accept our offer, your employment will commence at a date to be mutually agreed upon by the Parties in writing. This letter, along with the Employment Agreement and any other agreements relating to proprietary rights between you and the Company, set forth the terms of your employment with the Company and supersede any prior representations or agreements including, but not limited to, any representations made during your recruitment, interviews or pre-employment negotiations, whether written or oral. This letter, including, but not limited to its at-will employment provision, may not be modified or amended except by a written agreement signed by the Company and you. This offer of employment will terminate if it is not accepted, signed and returned within two (2) business days of April 30, 2023, or if your employment has not commenced within three (3) months from April 30, 2023.

We look forward to your favorable reply and to working with you at Roblox Corporation. Sincerely,

/s/David Baszucki

David Baszucki

**CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER PURSUANT TO
RULE 13a-14(a) OR 15d-14(a) OF THE SECURITIES EXCHANGE ACT OF 1934,
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, David Baszucki, certify that:

1. I have reviewed this Annual Report on Form 10-K of Roblox Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
